TUESDAY MORNING APRIL 20, 1897. EDHEM PASHA NEARLY TAKEN

The Turkish General Attempts to Cut Off the Greeks From Larissa.

But His Line Is Broken in Two Places and His Army Fails to Force Reveni Pass.

HIS DEAD REPORTED TO NUMBER SEVEN THOUSAND.

This Estimate Probably Excessive—The Moslem Forces Footed Up Over Ten Thousand Men-Wildest Rejoicing Follows the Receipt of the News at Athens-Gens. Demopoulos and Mavromochale Unite Their Victorious Divisions Near Damasi-Hellenes Advancing to Occupy Their Old Positions at Milouna and Gritzovali-Fall of Prevesa Imminent-An Expedition Sets Off to Janina-Fillipiad Forts Almost Destroyed by Bombardment-Gossip from London and Washington.

LONDON, April 19 .- (By Atlantic Cable. Associated Press Copyright 1897.)-9 p.m.-Gen. Smolenitz, ex-Minister of War, is in command of 14,000 Greeks at Reveni not far from Tyrnavos, northwest of Larissa. At this point, Edhem Pasha, closely pressed, was nearly taken prisoner. His plan was to force the pass of Reveni, to enter the plain of Larissa and to cut off the retreat of the Greek army with his cavalry and thus take Larissa without resistance.

But this plan was defeated. Gen. Demopoulos, at the head of one Greek division forced the Turkish line at Boughaiz close to Tyrnavos and Gen Mavromochale broke through at Koniskos. The two generals united their troops near Damasi. The news of this. success at Reveni and of the imminent fall of Prevesa, has changed the dismay caused at Athens by the loss of Milouna into the wildest rejoicing.

The latest advices tonight are that the Greek troops are advancing to re-occupy their positions at Milouna and Gritzovali, the latter of which. it is alleged, was abandoned, owing to a misunderstanding by the general in command, who interpreted as an order to retreat what was really intended as an order. to advance. Capt. Tagardo, who was wounded at Gritzovali, shot himself in order to avoid falling into the hands of the Turks.

The Greeks report that the Turks lost 7000 killed and wounded at Reveni, but this estimate is probably excessive. The Greek engineers constructed a bridge at Pachyskalos to enable their troops to cross the river. It is said that the Turkish forces attacking Reveni numbered more than 10,000 men.

ATHENS, April 19.—(By Atlantic Cable.)—While the incidents of the day along the eastern portion of the frontier have not been of notable importance, the situation at the Gulf of Arta and in the vicinity of the Albanian frontier has become more favorable for the Greeks. The bombardment of Prevesa was resumed at day-break, with but feeble replies from the Turkish batteries at Hamadieh and Pantocratores. The position of the Turks is untenable, and it is believed the town will fall into the hands of the large Greek force in the vicinity, which is waiting for the demolition of the remaining batteries. The Greek battleship Shelzia has taken the lead in the bombardment.

By an order received at Prevesa from Constantinople at noon today, the Gulf of Arta was officially closed to all but Turkish ships.

Col. Manos, with 25,000 men, having crossed the Arakphos under the protection of the Greek artillery batteries, is now in Epirus, where, it is believed, his force is considerably in excess of the Turkish force. It is reported here that a large body of Albanians, estimated at upwards of 2000, who had crossed the Greek frontier with the avowed intention of pushing on to Larissa, have re-crossed and are now ravaging Epirus. Arta is practically deserted. The mayor has transferred the public office and records

MIDNIGHT-The Greeks have occupied several strategic positions around Damasi, including Viglia. Three thousand armed peasants have joined the troops. It is alleged that 22,000 Turks attacked Reveni.

It is feared that a massacre has taken place at Prevesa during the bombardment

SITUATION IN THE EAST.

Foreign Officers of Four Powers LONDON, April 19-7 p.m.-[By Atantic Cable. Associated Press Copyright, 1897.] In spite of the fact that the hostilities on the Greek frontier have caused but little excitement here, communications have been in progress all day long between the Foreign Office and Rome, France and Athens. It is reported tonight that among matters considered is the expediency of ordering the international fleets leave Cretan waters and to go in the lirection of Salonica and the Darda nelles to watch the fighting, with eview to localizing it, if necessary, by naval intervention. Should this sugges tion, which is expected to emanate from the Italian Foreign Office, be acted upon, it is expected that only half the fleet of foreign warships would be withdrawn for such a purpose, the other half remaining to continue the Cretan blockade.

There is said to be a sharp difference of opinion between the military powers, Russia, Austro-Hungary and Germany and the maritime powers, Great Brit ain, France and Italy, as to the mos expeditious and least violent methods compelling a cessation of hostilities should this result not be reached by the exercise of diplomatic pressure Athens and Constantinople. The likeli good is that the force to be employed by Burope, if a resort to force become necessary, would be by sea, as the con tingencies of military intervention might be more serious than the hostilities now in progress. It is reported at the Foreign Offic

that the communication received here from the Marquis of Salisbury, after his interview with Queen Victoria at Nice supports the theory that the British government is using its utmost energy to persuade both the combatants to make cessation of the conflict at the stage which it has now reached. M. Hanotaux, who received the Greek Minister to France today, is inderstood to have assured him that while France could not tolerate the indefinite prolongation of war and would never consent to any essential modification of the existing terri tories of Greece and Turkey, she would continue for the present her policy of non-interference, except so far as intervention might be necessary to prevent the spread of the contest to other

The situation on the frontier has not, according to the latest advices, been materially modified today. Both the Turks and the Greeks are resting from the tremendous exertions of Friday, Saturday and Sunday. The troops of Edhem Pasha were half dead with fa tigue and hunger when the firing slackened last night. Most of them flung themselves down where they stood or the bare ground to sleep. The Turkish commander-in-chief prudently decided to allow his army to rest today. As details come in, it becomes more

and more apparent that the fighting in Milouna Pass was of the most stubborn and savage character. The Turks fought like devils, and the Greeks re sisted in the spirit of their ancestors. most inexplicable fact in conne tion with the whole engagement is the comparatively small number killed. All the special correspondents agree as to The Turkish forces appeared to have fired as wildly with their rifles at Milouna Pass as they did at Arta, where the firing consisted of an artillery duel between the rival batteries on each side of the river, lasting about four hours in the afternoon. There they fired only one out of five shots with any effect, and their batteries soon silenced by the Greeks, whose marksmanship was very much

The Turkish losses at Arta are believed to have been very heavy. On the Greek side there was not a man killed. WELL SCATTERED.

Firing at Points Along the Frontier-Positions Taken.
[BY ASSOCIATED PRESS WIRE.]

ATHENS, April 19 .- [By Atlantic Cable.] Firing commenced this morning en the Greeks and Turks at several points along the frontier. Manos, at the head of . 25,000 Greek troops, has crossed the River Arakaphos on the frontier of Epirus, and is now entering that part of South Albania. after having driven back the Turkish

The bombardment of Prevesa was resumed at daybreak. The landing force has not yet attacked the place. A dispatch from Greek headquarters this afternoon says that three important positions were occupied today near Menexa by the Greek troops. Nicholas of Greece; third son of King George, has been ordered to the front in command of a battery of artillery Later in the day confirmation was re ceived of the report that a large Greek force had crossed the river Arakphos.

e.Greek battleship Spetzia has been taking part in the bombardment of Pre-Firing recommenced at 5:30 o'clock this morning. A body of Greek insurgents landed at Syrako, Epirus, and began marching on Fillipiada Numerous other bands of insurgents have entered Epirus.

GULF OF ARTA CLOSED. CONSTANTINOPLE, April 19 .- The Turkish authorities at Prevesa have proclaimed the Gulf of Arta closed to all but Turkish troops.

BATTLE OF THE PASS. Splendid Examples of Turkish Bravery. [BY ASSOCIATED PRESS WIRE.]

ELASSONA (Headquarters of the Turkish army in Macedonia,) April 18 .-9 p.m. [Delayed in transmission.] After a most fatiguing day with the headquarters staff in the Milouna Pass, the dent of the Associated Press

ing the Turks possession of Milouna Pass, was waged with admirable courage and determination on both sides. The whole pass rang with the roar of artillery and the rattle of musketry. It was, however, around the two Greek blockhouses that the most furious conflict occurred. They were de-fended with the utmost valor and tenacity. The correspondent was greatly struck with the coolness and disciplin of the Turks. In the midst of the hottest firing four Turkish soldiers, advancing in skirmishing order under a deadly fire, became detached from the main body. Nevertheless they con tinued to advance with perfect selfpossession, amid a half of bullets. One of the men was hit and fell. Then the

The most important Greek blockhouse near Kritchoy was strongly fortified and defended by earthworks. The Turks mostly attacked in skirmishing order, firing independently. They seldom fired vollevs.

second man was hot, and the third re-

ceived a bullet wound, but the fourth

man calmly continued firing without re-

The scene while the engagement was at its height was exceedingly picturesque. Edham Pasha surrounded by a brilliant staff, was the center of a strik

# A HARD FIGHT

PRICE On Streets and Trains | 50

# To Get a Cent a Pound on Citrus Fruit.

Senator White on Deck to Bear a Hand in the Fray.

gard for his personal safety, until the Democratic Senators Will Lend Hearty Support.

> Our Steve" Will See Secretary Alger Today About the Harbor and Will Insits on Definite Action— Senate Proceedings.

(BY THE TIMES' SPECIAL WIRE.) WASHINGTON, April 19.—[Special Dispatch.] Senator White, who arrived yesterday, had a long conference with

Senator Perkins this morning. After it was closed he said for publication:
"There is going to be a hard fight necessary to obtain a cent a pound on citrus fruits. Senator Perkins will pos-itively insist upon that rate, and I will do all in my power to secure it. "As to the tariff as a whole, the Dem-

ocratic policy at present is only one of inaction waiting to see what the Re-publicans will present. There will be strong Democratic opposition to the bill, but the Democrats will support the

cent a pound on citrus fruits."

As to the harbor matter, he said:
"I am going to see Secretary Alger tonorrow morning and insist most positively on his taking some definite ac-tion, either agreeing or refusing to carry out the law. Until after I have seen the Secretary, I can say nothing definite."

Ex-Representative McLachlan has se-cured a strong eastern petition to offset those of the importers. There are not enough letters from States other than California. Californians have responded well to the suggestions of The Times, and their work has been of effective aid here. Now if every citrusfruit grower would stir up his friends in other States, especially fruit-dealers, and have them send petitions to Senator Perkins, it will do very great good. There is enough time, but not too much. The work should start at once. Condi-tions are more favorable than a week ago, but the fight is a hard one, and whether or not it will win. depends upon the efforts of the fruit-growers.

## POWERFUL APPEALS.

Republican State Central Committee Helping the Fruit-growers.
[BY ASSOCIATED PRESS WIRE.]

SAN FRANCISCO, April 19.-During he past week Maj. McLaughlin, chair man of the Republican State Central Committee, has been in daily confer-ence with George Frost, chairman of the California Citrus Fruit-growers' Tariff Committee, and Frank A. Miller of Riverside. The purpose has been to secure the legislation desired by the ruit-growers in the Tariff Bill now before Congress. The result has been the sending of powerful telegraphic appeals to United States Senators Allison, Morrill, Platt of Connecticut, Aldrich and Wolcott.

WHITE AT WORK.

Tariff and Harbor Matters Claim His Earnest Attention.

[BY THE TIMES' SPECIAL WIRE.] WASHINGTON, April 19.-[Spe Dispatch.] As soon as Senator White appeared in the chamber this morning crats on the Finance Committee: at once learned not a single schedule has been submitted by the Republicans to the Democratic members, for the reason that none are yet settled. It was said this was especially true of the wool and sugar schedules, which will be held back until the day the bill is ready to go to the printer, so there may be no possible forecasts of their

It is understood that as a comprom's there will be placed on sugar a duty of three-quarters of a cent specific, and 20 per cent. ad valorem on 90 deg Senstor Perkins will stand firm for a 11/2 cent duty.

Senator White found the conditions favorable for winning the fight on a 1-cent rate on citrus fruits, and the classification of Zante currants as raisins at the Dingley Bill rate of 21/2 cents per pound for both. On the tin rebate the Senator says he will insist, as failure to secure it will prevent the exportation of canned goods from Cal-

Senator White made an appointment to call on Secretary Alger in connec-tion with the San Pedro advertisements. He it was who suggested to Secretary Alger that by calling for bids the question of the cost of the improve-

ments would be settled definitely.
The applications of Thomas II.
bee, Thomas B. Lamb, C. F. Hen and B. D. Claughton of San Diego to be Collector of Customs at that port were filed in the Treasury Department today.

FIFTY-FIFTH CONGRESS.

EXTRA SESSION. BY ASSOCIATED PRESS WIRE.

WASHINGTON, April 19.—SENATE.

—The Senate passed the Indian Appropriation Bill today. It is substantially the same as it passed the House, and can occasion little diversion, save on the amendment opening up the Uncompahere Indian reservation. Resolutions of inquiry were agreed to asking the Secretary of State as to the operation

Secretary of State as to the operation of the reciprocity treaties made under the McKinlev act.

Mr. Vest introduced his resolution declaring illegal the recent order of the Secretary of the Treasury relative to Imports arriving after April 1. The Senator gave notice of pressing the resolution tomorrow, and it may afford another test on the tariff.

After the executive session the Senators

ate adjourned, as a mark of respect to Representative Milliken, deceased.

The Rev. Hugh Johnson, in his opening prayer, invoked divine blessing on those nations struggling for eivil and religious liberty, and prayed for the speedy termination of all wars. He referred also to the suffering along the Mississippi River.

A resolution for a committee of five Senators to inquire into the issuance of land patents to the Pacific railroads and to the California and Oregon Railway, and the amounts of subsidies paid to the Pacific Mail Steamship Company was favorably reported, but on sugrestion of Senator Stewart of Nevada, went over. went over.

During the debate on the Indian Bill

Mr. Allen of Nebraska offered an amendment for the establishment of an amendment for the establishment of an Indian supply warehouse at Omaha.

Mr. Gear of Iowa said this was designed to take the warehouse away from Chicago. If this was to be done, he would propose Sioux City, Iowa, as well as Omaha, as an Indian supply

led to extended debate as to the relative merits of various cities as sup-ply points for the Indians, which re-sulted in the Allen amendment being agreed to.

An amendment by Mr. Hoar for two additional Federal judges in the Indian

\*\*artitors was adopted, \*\*Arter a contest, an amendment by Mr. Berry of Arkansas was agreed to, uniting the rolls of tribes to certain designated classes.

At 1:50 p.m., on motion of Mr. Davis, the Senate went into executive session on the arbitration treaty, and at 2:15 p.m. adjourned.

### REPUBLICAN SENATORS

### Committee Organization and Tariff Discussed in Caucus.

[BY ASSOCIATED PRESS WIRE.] WASHINGTON, April 19 .- The Republican Senators were in caucus today nearly two hours, and adjourned when the Senate met without reaching an agreement. The entire time was consumed in a discussion of committee organization, with incidental mention of the tariff. The proposition which had been submitted by the Democratic managers to the Republican commit-tee was opposed by many Senators, more especially by Senators Chandler, Baker and Elkins. The caucus ad-fourned to meet at the call of the com-mittee having the reorganization in charge.

### SENATOR BUTLER'S BILL.

### It Directs the Government to Seize the Pacific Roads. [BY ASSOCIATED PRESS WIRF.]

WASHINGTON, April 19. - Senator Butler of North Carolina today intro-duced a bill supplemental to the sub-sidy acts of the Union and Central Pacific railroads. It recites the failracine railroads. It recites the fail-ures of the companies to meet their obligations; that by the terms of the acts such failure is to operate as a for-felture of all property rights and fran-chises, and directs the Attorney-Gen-eral to cause such forfeiture to be enforced. The Secretary of the Treasury is directed to take possession of the roads and the land grants in their pos-ession, and the United States shall own the roads, operate them in a continuous line, and shall charge such rates as shall pay expenses and maintain a sinking fund. The Secretary is directed to fund any bonds paramount to the rights of the United States, and to asrtain the cost of purchasing such les owned by the Central and Union maintenance of a continuous line from Omaha or Kansas City to San Francisc, or the construction of such line as may be necessary for this purpose.

## FOUND IN FEMALE GARB.

KELLY THE SUPPOSED MURDERER OF STICKNEY ARRESTED.

He Doubles on His Trail From Montreal, but the Detectives of That City Ferret Him Out as He Is Opening Wine-His "Accom-

[BY ASSOCIATED PRESS WIRE.]

MONTREAL (Que.,) April 19.—Joseph E. Kelly, accused of the murder of J. A. Stickney, cashier of the Great Falls National Bank, Somersworth, N. H., was captured here togight by Detect-ives Campau and O'Keefe in a house of ill-repute. The story that Kelly took the Canadian Pacific road at Cookshire Junction, Que., for Montreal Friday night or Saturday morning, seems to have been true. As far as can be ascertained, he proceeded on the train to Montreal Junction, about fourteen miles west of here. There he jumped from

west of here. There he jumped from the train while it was going at a good speed, and proceeded to St. Justine de Newton. forty miles away.

Taking supper in Berasd's Hotel that evening, he took the Toronto Express back to Montreal, arriving here about 9 o'clock. Upon arriving in Montreal, Kelly, who was in the garb of a woman, procured a cab and drove around town. Stops were made at several drinking resorts, and Aggie Ashton's house was reached about 11:30 o'clock. Kelly was warmly received in the house, and wine flowed freely. About midnight detectives entered the house and confronted the supposed woman. They accused him of being Kelly, and he calmly replied: "I guess you chumps have got your man this time."

On being talken to the Police Station, \$2700 was found in his clothing. On being questioned, he declined to say anything about the murder, except that he had an accomplice. He added that the accomplice told him that he had "fixed" Cashier Stickney. Repeated questions failed to elicit further information from the prisoner.

On Kelly were found two letters, one to his father stating that an accomplice, whose name he claimed he did not know, but who was an inmate with him in a reformatory somewhere in New Hampshire, had done the deed, and that it was at the suggestion of the accomplice that Stickney was murdered. The original design was to secure Stickney by showing a revolver, Kelly waiting outside while his accomplice accomplished his work. The other letter was to a girl named Olive, written in a similar strain.

Bryan Welcomed at Frankfort. FRANKFORT (Ky.,) April 19.—W. J. Bryan arrived from Louisville today and was given an enthusiastic welcome at the depot. A number of the Repub-lican leaders have taken up the plan to hold another caucus and select a nom-inee other than Dr. Hunter.

# TENNES SEE DERBY

BUCKVIDERE BEATS HIS TWO COMPETITORS.

Eight Thousand People Witness Plunge on Typhoon and a Fooling of the Talent,

HE WAS NOT IN THE RACE.

WINNER COMES IN TWO LENGTHS

Phillies Defeat the Bean-enters Railroads and Bicycles-Cyclist Jones and Flying Jib. Ingleside Races.

[BY ASSOCIATED PRESS WIRE.] MEMPHIS (Tenn.,) April 19 .- The Derby, value \$500, was won at Mont gomery Park today by A. Cahn's chestnut colt Buckvidere, by Belvidere out of Elkhorn Lass. Typhoon II finished second, with Algol third. There were only three starters. The attendance

was 8000.

The Derby was the third on the programme. Algol opened at even and was backed to 5 to 5. The small bettors put their faith in Buckvidere at 5 to 1 throughout. Just before the race there was a plunge on Typhoon, and the betting closed with Typhoon, and the betting closed with Typhoon even money each. The start was good. Passing the stand Algol was a neck in front of Typhoon, with Buckvidere two lengths away.

At the first turn Algol showed an appropriate the start was a propriate the start was a propriate the start was length absent of Typhoon. Algol

open length ahead of Typhoon. Algo faltered on the far turn, and on the straightaway Williams let out Buck-videre, who drew away, winning well in hand by two lengths from Typhoon

back, hopelessly beaten.
Tennessee Derby, one mile and an eighth, guaranteed \$5000: Buckvidere, 122 (R. Williams.) 5 to 1, won; Typhoon II, 122 (A. Clayton.) even, second; Algol, 122 (T. Murphy.) even, third; time 1:56%.

# MILITARY TOURNAMENT.

### ort Mason's Representatives Cap ture Four First Places. [BY ASSOCIATED PRESS WIRE.]

SAN FRANCISCO, April 19 .- Inspired by the largest concourse of civilians ever attracted to the Presidio, the representatives of the regiments of the De-partment of California made today, the first day of the great military tournament, one to be talked of for many weeks to come. The weather, although a trifle cold from the spectators' standthe men who sought athletic fame on the parade ground.

the parade ground.

It was Ft. Mason's day. Representatives from that post were entered for six events and secured four firsts and one second. Raines and Roberts, both of Battery E, Third Artillery, especially distinguished themselves. Following is a list of the events and results:

the 100-yard run: Raines won, Puck-tt second; time 10 3-5s. Throwing the 16-pound hammer: Rol-ns won, Hickox second, Williams

Throwing the 16-pound hammer: Rollins won, Hickox second, Williams third.

The 440-yard bicycle race: Roberts won, Fernandez second, Newman third; time 38 2-5s.

Mounted cartridge race: Millner, Troop B, won; Keiltz second, Fonshell third; time 2m. 24 1-5s.

The 220-yard run: Raines won, Woodruff second; O'Marie third; time 24 4-5s. Running high jump: Robert won, Harrison second; height 5ft. 2in.

The 120-yard hurdle race, thirteen flights, 3ft. 6in. high: Cameron won first heat in 0:19 1-5, and Carter won the second in 0:18 4-5.

Spare wheel race: Only one man, Mueller, entered. He went over the course, 100 yards, for the purpose of establishing a record; time 0:22 2-5.

Broadsword contest, two heats: Lomleski, Troop K, won the first with a score of 8 points to 1, and Weber, Battery F, won the second zy 8 to 1, also Running, hop, step and jump: Cameron won, Kelly second; distance 3ftt. lin.

Hasty entrenching: Sergt. Burke.

in.

Hasty entrenching: Sergt. Burke,
First Infantry, won.

Mounted gymnastics: Fernander first,
Victorian second. Harrison second.

The 440-yard run: Puckett won,
Raines second, O'Marle third; time

0:58%.
Tug-of-war: Battery I, First Infantry, won the first heat in 5:00, and Troop K, Fourth Cavalry, won the second heat in 3:11.

## WILL FORCE FITZ.

### Corbett Responds to Calls for Speech at New York. [BY ASSOCIATED PRESS WIRE.]

NEW YORK, April 19 .- The Academ pacity tonight when James J. Corbett appeared for the first time since his recent defeat by Robert Fitzsimmons. The ex-champion was greeted with cheers that lasted fully two minutes when he appeared in the first act of "The Naval Cadet."

the end of the second act he made a speech in response to repeated calls. He said would force Fitzsim-mons to fight him again.

# ERNE BESTS HOPKINS.

# Latter Goes Down with

BUFFALO (N. Y.,) April 19 .- After eighteen rounds of rapid fighting, Frank Erne got the decision over Joe Hopkins (colored) of New York at the Olympic Atheltic Club tonight

From the eighth round Hopkins started to force the fighting, Erne landed hard on the chin and the colored boy went down with a thump his hear striking the floor very hard. The gong saved him from being counted out, but immediately afterward The his seconds threw up the sponge and Erne was declared the winner.

## BIKE AGAINST SULKY.

# N. Jones and Flying Jil Matched for a Race.

[BY ASSOCIATED PRESS WIRE.] SAN FRANCISCO, April 19.—Alian N SAN FRANCISCO, April 19.—Allan N. Jones, the cyclist who made some sensational rides during the indoor tournament here recently, is to be matched for a mile run against Flying Jib, the pacer. The race will be held on the stock-farm track, Pleasanton, on Saturday next and has excited interest among the horsemen. Jones has been training at Livermore during the past fortnight and is in the best of condition. His mentor, R. P. Aylward, looks to Jones to make a remarkable record on the path this season. He hopes to meet the cracks of the national circuit in the East late in the season in the principal meets, and with ordinary good fortune

in the matter of accidents, expects to be able to make a creditable showing.

# SKEMPSTER PARK MEETING.

tocker's Bridegroom Wins th Queen's Prize-Rothschild Plate. [BY ASSOCIATED PRESS WIRE.] LONDON, April 18.—At the Skempste Park Easter meeting today, Martin D Rocker's Bridegroom won the race for the Queen's prize of 1000 sovereigns. A. F. Bassett's Clorane was second, and Leopold B. Rothschild's Jaquemart

The Rothschild welter plate of 103 sovereigns for three-year-olds and up-ward was won by P. C. Patton's Mag-nate, J. C. Rosenthal's Crispus second and James Sherry's Ormas third. Six horses ran, including Richard Croker's Nashville. The course was six furlongs.

# BROKER CHAPMAN'S CASE.

The United States Supreme Court Re

WASHINGTON, April 19.—The Su-preme Court today refused application for a writ of certiorari and habeas corpus by Elverton R. Chapman, the broker who refused to testify in the suger-speculation investigation whether senators had speculated in sugar stocks while the Wilson Tariff Bill was before

Chief Justice Fuller, who delivered the opinion, held that the Senate, under the constitutional right to censure and expel members, had a right to investigate any alleged improper conduct of Senators and could compet the witnesses to give testimony. The sentence of the Supreme Court of the District of Columbia to thirty days in jail and \$100 fine is affirmed and Chapman's application for writs of certiorari and habeas corpus were denied.

In the case of Charles W. Nordstrom, under sentence of death, in Washington State, the court granted a stay of proceedings to await the decision of Nordstrom's appeal to this court from a decision below, refusing him Chief Justice Fuller, who delivered

from a decision below, refusing him a writ of habeas corpus. In the case of the United States, vs In the case of the United States. vs. Clarence R Greathouse, Justice Harlan rendered an opinion holding that the Tucker Act did not repeal the clause of a former law giving six years additional to claimants "beyond the sea" to file claims in the Court of Claims against the government. Greathouse was Consul-General to Japan, and made claim for the return of fees turned into the United States treasury to which it afterward appeared he was entitled. His case turned upon the question whether the case was barred by limitation.

question whether the case was parred by limitation. The petition for a writ of cretiorari in the case of the Mutual Life Insur-ance Company vs. Neille Phinney was granted. The case comes from Cali-fornia, and involves a claim for the payment of an insurance policy of \$100,000.

Justice Harlan handed down the opinion of the court in the case of the Northern Pacific vs. Junius G. Sanders and others. involved the validity of claims of land under the land laws within the limits of the Northern Pacific warms awarent to the court of the oific grant, subsequent to the govern-ment circular of 1872 withdrawing the land, and prior to the definite location of the line of the road. The decision was favorable to the contention of set-tlers that claims made under such laws

VIVID REMINDER OF OLD TIMES.

WAR NEWS FILLS THE SHORTS

Wheat Pit-May Option Scores a Net Gain of Four and

[BY THE TIMES' SPECIAL WIRE.] CHICAGO, April 19.-[Special Dispatch.] At least three men are credited having made more than \$100,000 each in wheat today-John Cudahy, W R. Lynn and John Barrett, the latter stretching to \$150,000. Henry Parker

and John Gates also won heavily.

It was a wild, erratic day in the wheat pit. The excitement was intense and fluctuations sufficiently diverse to remind traders of some of the old-time war bulges. The fact that war was actually raging abroad filled the short with consternation, and it was a fever ish session for a time, during which May, which closed Saturday at 73% cents, sold at 78 cents, a gain of 414

On the opening excitement, Cudahy and Lynn were heavy sellers, supposed to be taking profits on long wheat. The commission-houses, private-wire con cerns, big and little scalpers were al in the market and early excitement was intense, with fluctuations so quick and radical that it was at times impossible to follow them. The trade was vividy reminded of what followed the declaration of war between Russia and Turkey twenty years ago. wheat shot from \$1.26 to \$1.76 in April, fluctuations some days being 10 to 20 cents, but in August following it broke

### PATRONIZING BROKERS

## FIRED ON THE FLAG.

TRUCE IN ABYSSINIA.

The Expedition Under Maj. Bottegs Annihilated by the Africans. Only Two of the Party Escape. The News Comes from Paris.

PARIS, April 19.—[By Atlantic Cable.] The Temps publishes a story this evening saying the Italian expedition under Maj. Bottega has been annihilated in Southern Abyssinia. It appears the Ethiopian general commanding at Baro requested Maj. Bottega to halt until the expedition was authorized by the Negus to proceed. The Italians thereupon fired on the messengers bearing the flag of truce and killed them.

In the fight between the Abyssidains and Italians which followed, only two of the latter succeeded in escaping.

### KENTUCKY'S ASSEMBLY. Only One Ballot for Senator-Th

Flood Sufferers.

[BY ASSOCIATED PRESS WIRE.]

FRANKFORT (Ky.,) April 19.—There was but little interest in the joint ses sion of the General Assembly today According to agreement entered into by the steering committees of the parties, but one joint ballot was cast for each candidate, after which the joint session

Gov. Bradley amended his call for the extra session so that the General As-sembly might relieve the suffering caused by the flood in the counties of Hickman and Fulton in the southwestern part of the State.

It was given out at the Hunter neadquarters this morning, apparently headquarters this morning, apparently by authority, but not by Dr. Hunter himself, that he would withdraw after the ballot tomorrow, and that Senator Jones, chairman of the Republican caucus. would call a new caucus for either tomorrow night or Wednesday morning. The nominee of the new caucus will, of course, be dictated by Hunter. This lets out all thought of Col. St. John Boyle, for whom the bolting Republicans have been voting.

## ON A SPECIAL MISSION.

WHY DR. ANGELL WILL GO TO CONSTANTINOPLE.

Will Undertake to Procure a Set-tlement of the Claims for In-demnity for Americans—The Missionaries.

[BY ASSOCIATED PRESS WIRE ANN ARBOR (Mich.,) April 19 .- Sev eral facts have developed here since Dr. James B. Angell's appointment and his departure for the South which makes it evident that his mission to Turkey is of a special nature, similar to that which he executed in China in 1880 and particularly in the interest of American missionaries who have been persecuted under the Sultans ment. It has become known that Dr Angell first received an offer of appointment as regular minister to Tur it, not wishing to be that long away from the university. Later he claims of American missionaries against the Turkish government, and accepted. When that work is done, his work will have been performed, and he will return to this country.

Dr. Angell's selection for this post is particularly gratifying to the foreign States, which are said to have exercised all the influence they could brin to bear to secure his appointment. Fo several years he has been a corporate several years he has been a corporate member of the American Board of Commissioners for Foreign Missions, and has been active in its work. He has, too, been recognized as one of the ablest men connected with the body, and the members feel confident that he will persuade the Furks to have a greater respect for American rights in the future.

will persuade the Furks to have a greater respect for American rights in the future.

In an interview Dr. Bradshaw, minister of the Congregational Church, of which Dr. Angell is a member, said: "Just what part, if any, the American Board of Foreign Missions took in securing Dr. Angell's appointment, I do not know. I do know, though, that a large part of his duties in Constantinople will carry him stong the same line of work he has been doing in the commission for the board in this country. He was one of the commission appointed by the American board in Toledo, in October last, to urge Fresident Cleveland to force a settlement of the American claims and secure for our missionaries a better protection. There are now pending before the Turkish government claims to the amount of \$750,000 for lives and property of American missionaries destroyed in the outrages perpetrated by

ramount of \$750,000 for lives and propgerty of American missionaries destroyed in the outrages perpetrated by
the Turkish soldiery. In its mild
prosecution of these claims, this government has been ignored and insuited in a way which the powers of
Europe would not tolerate.

"I do not know Dr. Angell's sole
mission in Turkey is to right the wrong
that have been done to missionaries.
I do not know that he has taken anybody into his confidence to the extent
of telling his arrangements. It is
understood here that he will not be absent four years but he will return as
soon as those claims are settled."

Prof. Martin D'Ooge, who will probably serve as acting president of the
university during Dr. Angell's absence,
is at present out of the city, but from
his wife it was learned that Dr. Angell
did not intend to remain in Constanti-

is wife it was learned that Dr. Ang

did not intend to remain in Constanti-nople the full four years.

"Prof. Angell will not give up the presidency of the university." said she, "and will probably not be absent from it more than a year and a half. It was one of the special objects of his going, to secure a settlement of the claims of the American missionaries. understand that Dr. Angell will go Turkey, principally to adjust these sees and that he will return to the niversity when that is done."

to Turkey, principally cases and that he will return to the university when that is done."

President Angell's connection with foreign mission work has extended over a period of many years, and he is recognized as one of the ablest men in the country. He has been assisted by Mrs. Angell, who has been assisted in women's missions as her husband in women's missions as her husband. been with the men's.

ADMINISTRATORS AND HEIRS AGAINST MRS. CRAVEN.

Trial of the Only Remaining Issue in the Fair Will Case Has Begun at San Francisco.

A MILLION OF DOLLARS IN IT

ADDEGED FORGERY OF DEEDS THE MAIN QUESTION.

Weather and Crops at Sacramente Fight with Tramps - Emigrants for Mexico-Russia Desires

[BY ASSOCIATED PRESS WIRE.] SAN FRANCISCO, April 19.—The trial of the only remaining issue in the Fair case was begun today. Instead of contest over the whole estate and a struggle for \$20,000,000, it is a fight for \$1,000,000, the case having narrowed down to a legal battle over the two pleces of real estate which Mrs. Nettle Craven says Senator Fair conveyed to her by pencil deeds a few weeks prior to his death. The administrators and heirs have for the time forgotten their disagreements, and in this action have joined against Mrs. Craven, whom they regard as their common enemy. After considerable discussion by the

attorneys today the court announced that the question at issue was the al-leged forgery of the deeds. This issue leged forgery of the deeds. This issue had been raised by the answer of the administrators to Mrs. Craven's cross-complaint and in so far as the complaint of Miss Virginia Fair raised the same issues, the intervenor would be heard Several days will probably be occupied in securing an advisory jury for Pro-bate Judge Slack.

### JAPANESE FOR MEXICO.

Land for Ten Cents an Acre Freedom from Taxation.

IBY ASSOCIATED PRESS WIRE.1 SAN FRANCISCO, April 19.—The steamer City of Para, which sails this rning for South American ports, carwho arrived here last week on the steamer Gaelic. These men form the irst large lot of emigrants bound for nrst large lot of emigrants bound for the big Mexican free land that have yet left Japan, and their leader, Okena Egato, an army officer, who has been thoroughly educated in European col-leges, is on his way to Mexico to make

theroughly educated in European colleges, is on his way to Mexico to make a complete investigation of the advantages offered.

"Our countrymen get this land for 10 cents an acre, with freedom from all kinds of taxation for the first ten years," he said. "I think the proposition is one that will bring a population of forty thousand Japanese into Mexico inside of the next two years. Several agents are now canvassing all the interior districts of Japan, and are making announcements about the project to all the people, especially the small farmers, and thousands of applications have been received already at Nagasaki and Kobe. Steamers are now being chartered for this traffic alone. Our colony, which borders on San Benito, below Acapulco, is just now in process of formation. These men I have with me now will bring the number of those on the ground up to about three hundred, but there will be 5000 more by July.

"We think that our people will like the country down there, and with their careful habits will be able to amass

"We think that our people will like the country down there, and with their careful habits will be able to amass considerable wealth as soon as they get accustomed to the seasons, and the way to grow a few cereals that are new to them. Our government looks with great fayor on the scheme, because it will relieve our congested districts and, by and-by, will send outside money into circulation in Japan, besides opening up new freight business and traffic routes that may become permanent."

CROPS AND WEATHER.

Fruits and Small Berries Prospered Grain Suffered.
[BY ASSOCIATED PRESS VIRE.]

BY ASSOCIATED PRESS VIRE.]
SACRAMENTO, April 19.—The following crop summary is issued by the State Agricultural Society in cooperation with the United States Weather fornia section, J. A. Barwick, direc-

The average temperature for The average temperature for the week ending Monday, April 19, was as follows: Fresno, 72 deg.; Los Angeles, 62; Red Bluff, 70; Sacramento, 68; San Francisco, 58, and San Diego, As compared with the normal tem-atures there was an excess of heat or the entire State, ranging from 1

over the entire State, ranging from 1 to 10 deg.

There was a deficiency of rainfall over the State ranging from 21 of an inch to .55. The abnormally warm weather has generally been beneficial to fruits and small berries, but was detrimental to grain. The warm wave was accompanied by drying northerly winds, which have crusted the ground, making plowing for summer fallow rather difficult. Rain and cooler weather is needed in the San Joaquin Valley for the wheat, barley and rye crops. Vine-hoppers are bothering the grapevines in various vineyards in the State.

The weather, temperature and sun-

State.

The weather, temperature and sunshine have been more favorable than otherwise for all crops. There is no doubt but a good warm rain of an inch or more would greatly benefit all crops at the present time, if it were not followed by cool weather. The highest temperature was 103 deg. at Hanford, Kings county; the lowest temperature, 30 deg., at Yreka, Siskiyou county, and Cedarville, Modoc county.

FORT ROSS RELICS.

Russia Is Anxious to Repossess the BY ASSOCIATED PRESS WIRE.

[BY ASSOCIATED PRESS WIRE.]
SAN FRANCISCO, April 19.—The
Russian government is anxious to own
once more the land and site of the
settlement in and about Fort Ross on
Bodega Bay, in Sonoma county. The
desire is, if the place can be bought
back, to rebuild it, to care for the
cemetery in which many Russians lie
in their last sleep, and to restore the
church. With the desire of securing
the half-ruined town, and if possible
making some arrangements with the
present American owner, the Rev.
Bishop Nicholas, accompanied by a
few Russian church officials, made a
visit to Fort Ross last week. A detailed report of this visit has been prepared and forwarded to the Russian
government.
The land was owned by the Russians

government.

The land was owned by the Russians until gold was discovered in 1848. Then Sutter obtained from Manager Botchef a certificate of transfer. The commander certified that the Russians had held peaceable possession for over twenty-nine years, and that they sold it to Sutter for 330,000.

The property is now owned by 3. W.

and dome of the Russian Church have faced the winter storms. The wacht towers are decayed. The only but aim good preservation is the Covernor's house, which has been improved by a new roof. These old buildings, with half a dozen new ones, a wharf and a chute at the landing and two dairies constitute the present settlement.

MURDERED WITH AN AX.

Mexican Settler in Merced County Killed by an Unknown.

HOLLISTER, April 19.—Bernardino Asseuro, a Mexican settlers on a tract of land claimed by Joseph Picanco, a Portuguese, was found murdered in the charred remains of his hut in Cleve-land district, twenty-seven miles from here, just over the line in Merced county, by a lad. Investigation shows that Asseuro was murdered with an ax, a large cut being found on the breast. The body was laid on the bed and the hut fired to conceal the crime. The body was badly burned. Picanco, who was living on the land at the time, claims he was at home sick in bed when the tragedy occurred. The murder is supposed to have been com-mitted Thursday or Friday. The land was claimed by several parties. Offi-cers are now on the scene. charred remains of his hut in Cleve-

## ASHEL FEEK DEAD.

One of the Best-known Contractor

on the Pacific Coast. SEATTLE (Wash.,) April 19.-Ashel Feek, one of the best-known contract-ors on the Pacific Coast, died at the Seattle General Hospital of stomach The deceased, about three years ago, secured a contract for build-ing a railroad on Oahu Island one of

the Hawaiian group.

He built fifteen miles of the railroad, which was created for the purpose of tapping the sugar, coffee and fruit plantations. The contract was executed under Queen Liliuokalani's reign, and while the company had it in charge the government promised certain sub-sidies, but when Queen Liliuokalani was dethroned President Dole's government would not stand by the terms of the contract, and Feek was unable to get the money which he claimed was due him.

ROYAL AND SELECT MASTERS. Los Angeles Man Chosen for Prin-

cipal Conductor.

[BY ASSOCIATED PRIES W. IRE.]

SAN FRANCISCO, April 19.—The Grand Council of Royal and Select Masters commenced its thirrieth annual session here today, and elected the following grand officers: Master, Henry Ashcroft, San Francisco: Rober Ash, San Francisco, Deputy Master; A. Wackerbarth, Los Angeles, Principal Conductor of the Work; F. H. Day, San Francisco, Treasurer Alexan der J. Gardiner, Sacramento, Captain der J. Gardiner, Sacramento, Captain of the Guard; J. H. Neff, Auburn, Con-ductor of the World; George Penring-ton, San Francisco, Lecturer; William Scarborough, Los Angeles, Steward; James Oglesby, Sentinel.

RAN NECK AND NECK.

an Equal Vote Cast for Two Candi-

dates for Clerk.
[BY ASSOCIATED PRESS WIRE.]
FRESNO, April 19. — The official count of the votes cast at the late city election was made tonight, and disclosed the fact that an equal Jumber of votes were cast for J. W. Shanklin (Rep.,) and Theodore Madson (Fusionist,) for City Clerk. No action was taken, but the presumption is that a special election will have to be held for the election to fill that office.

Over the Same Route Over the Same Route

SAN FRANCISCO, April 19.—Gen.
Thomas H. Hubbard left for New
York today over the Sunset route. He
will make a careful inspection of the
road. General Manager Kruttschnitt
and Third Vice-President Stubbs will
accompany him as far as New Orleans. C. P. Huntington and H. E.
Huntington have gone on a tour of
inspection over the coast road. Mr.
Huntington may order work to be resumed on the gap between Surf and
Elwood.

Coming by Bont.

wife, Mrs. Hicks, Miss Delan, J. Carrey. For Port Los Angeles—Mrs. Owen, Miss Owen, Miss Elsen, Mrs. Brown, Mrs. Kirkland, C. Chadwick, Theo Carolan, M. Sullivan, Miss Shea and sistet, J. Hawkins and wife, C. White. San Diego—M. Kendall, J. McCrosson, J. Keinsohn, Col. Paine. For Santa Barbara—Miss Turner, F. Dunsbee and wife, Miss Bingham, Mrs. Smith, Mrs. Young, A. Redington.

TRAMPS SHOWED FIGHT.

Deputy Constable Leeper Knocked Down at Reno-He Shoots.

[BY ASSOCIATED PRESS WIRE.]
RENO (Nev., April 19.—This aftertion Deputy Constable R. C. Leeper
cecived a dispatch from the justice
the peace at Wadsworth instructing him to arrest all tramps on a charge of highway robbery. Leeper undertook to arrest a couple of fellows who showed fight, one of them strik-ing the constable on the nead and

ing the constable on the head and knocking him down.

After the assault he started to run, but the constable winged him by a shot in the leg. The two men were arrested, the one who was shot giving his name as Orin Clark. They appear to be desperate characters. The constable was not injured.

"Doc" Matthews's New Job.

SACRAMENTO, April 19.—The State
Board of Health met here tonight. The
old board adjourned sine die, and the
new board organized today, electing Dr.
C. A. Ruggles of Stockton president,
and Dr. Matthews of this city secretary.
Dr. J. F. Morse of San Francisco was
appointed to visit Washington, D. C.,
and confer with the national authorities on quarantine matters.

Suicide of a Normal Student. Salcide of a Normal Student.

SAN JOSE, April 19.—Miss Julia
Cummins was found dead in bed this
morning. Thhe Coroner's jury found
that she committed suicide by strych)nine. Last fall she entered the Normal School to take a teacher's course
and has been attending since. She was
a native of Michigan and 34 years of

Drowned in a Slough. MODESTO, April 19.—Edwin Batten, foreman of the Vivian ranch near Turlock on the bank of the San Joaquin River, was drowned in a slough yesterday by being thrown from a horse while attempting to ford the stream after cattle. His body has not yet been recovered. Batten was aged about 23 years.

A Congregational College. PHOENIX (Ariz.) April 19.—Arrangements are being made for the establishment at Tempe, near Phoenix, of a Congregational denominational college, the first first of that denomination on the Coast.

### BEREA'S EXCITEMENT.

FIRE EATS UP BUSINESS AND A DO

an Eighty Thousand Dollar Confin gration in the Ohio Town-Water Brought a Quarter of a Mile-Tramps Had the Matches.

[BY ASSOCIATED PRESS WIRE.] CLEVELAND (O.,) April 19.—The business portion of the town of Berea was nearly wiped out by fire this morning. The high wind prevailing made it almost impossible to check the flames, which seemed likely to encompass the entire town. The total will reach \$80,000. Berea has no waterworks, and there was mall hope of saving the town. A detachment of the Cleveland fire department, with fourteen men, secured water from a

branch of the river, about a quarter of a mile from the town.

The cause of the fire was attributed to tramps, and Deputy Sheriff Aslinf escorted three of them out of town. To add to the excitement, a dog went mad and bit several people before it was shot. The fire was put under control at noon.

EDITOR DUNLOP'S CASE,

Life May Be Jeopardized Further Imprisonment.

WASHINGTON, April 19.-Presider McKinley had a consultaion with Atty.-Gen. McKenna today about the Atty.-Gen. McKenna today about the case of Joseph Dunlop, proprietor of the Chicago Dispatch, who was sentenced to two years' imprisonment for sending obscene literature through the mails. The Attorney-General in his report on the case said the only mitigating circumstances in Dunlop's case was his physical condition, and the fact his physical condition, and that his life might be jeopardized by

confinement.

Dunlop is said to have had two apoplectic strokes since his sentence. It is probable that President McKinley will reach a decision on his application for a pardon within a few days.

AX AND KNIFE.

Old Man Assaults a Cripple-Then Commits Suicide. [BY ASSOCIATED PRESS WIRE.]

EXETER (R. I.,) April 19.—Joseph Phillips, 80 years of age, assaulted Al-bert F. Wilcox, a cripple, with an ax,

bert F. Wilcox, a cripple, with an ax, and then cut his own throat, as a result of which Wilcox is dead and Phillips is not expected to live. The cause of the trouble is not known.

Hannah Wilcox, a niece of the dead man states that there had been apparently no differences between the two. When they met, Wilcox addressed Phillips, who seized an ax, knocking him down. Warren F. Wilcox ran to the spot. When he saw this man approaching, Phillips drew a knife from his pocket and plunged it into his own throat.

IMPORTANT APPOINTMENT.

Julius Goldschmidt of Milwaukee Consul-General to Berlin. WASHINGTON, April 19.-The Presi-

WASHINGTON, April 19.—The President today informed Representative Barthold of Missouri that Julius Goldschmidt of Missouri that Julius Goldschmidt of Milwaukee, Wis., has been selected Consul-General to Berlin.
Additional applications for appointment to Presidential offices under the Treasury Department have been filed as follows:

As collector of customs—Thomas S. Silsbee, Thomas B. Lamb, C. F. Henkil and B. D. Clugston at San Diego, Cal.
W. A. Jones of Wisconsin and Robert V. Bell of Maryland have been offered and have accepted the respective offices of Commissioner and Asistant Commissioner of Indian Affairs.

BURIED UNDER SNOW.

Three Men Perish North of Brigha

SALT LAKE (Utah.) April 19.—A special to the Tribune from Brigham, Utah, says a snowslide occurred today at the mines of the Consolidated Mining Company, four miles north of Brigham City, resulting in the death of Fred Wolhaupter, Ed Maw and William Turner. David Russell and John Dalton were also snowed under by the slide, but were taken out alive. The slide covered up the mouth of the tunnel and swept away the blacksmith shop.

# LEVEES GIVING WAY.

ANOTHER BAD BREAK BELOW NATCHEZ IN LOUISIANA.

Water Rushing Through Crevasses in Great Torrents That Can not Be Checked.

MANY PLANTATIONS FLOODED.

ING CROPS DESTROYED.

Vicksburg, Natches and Other River Towns Crowded with Refugees.
Everything Possible Done to
Relieve Their Suffering.

IBY ASSOCIATED PRESS WIRE.1 MEMPHIS (Tenn,.) April 19.-Another break in the levee on the Louislana side is reported from a point twenty miles below Natchez, Miss. The details at this writing are meager, and the extent of the break cannot be learned. The situation at Biggs, where the water is rushing through the crev-asse in torrents, is growing worse.

Madison parish is fast becoming in-undated, and the water will extend to other parishes, destroying thousands of acres of newly-planted crops. Vicks burg. Natchez and other river points are crowded with refugees, and every-thing possible is being done to alleviate the sufferings of the poorer classes. The situation through the delta tonight is about the same as yesterday. It was a beautiful day in the flood-stricken district, and the planters hope that the water will be carried away in time to

make a good crop.

At Memphis the river is slowly falling, and at Cairo a decided fall is re-STILL CAVING.

NATCHEZ (Miss.,) April 19.-The first break in the Concordia parish front occurred on Sunday morning, when the Glasscock levee gave way. This levee was located about twentyeight miles below Natchez, and is near the lower end of the levee system of the parish. A large force of men were at work on the levee Sunday morning. raising and strengthening it, when suddenly the laborers saw the muddy water begin to bubble up at the lower end. Almost instantly the seething water tore a great hole through the embankment. The water rushed through at a great rate, and began spreading out in the lowlands adjacent. The water from this break will inun-date the lower part of the parish from Morville down to Brabston, covering a number of fine plantations. The flood from this crevasse will be met by the waters from the Biggs break north of here, covering a vast area. It will en-tail a vast amount of suffering of the people of the neighborhood, and relief will have to be extended to them. Towill have to be extended to them. To-night the crevasse is reported to be from 800 to 1000 feet wide and still cav-

THE MILLDAM BROKE. PINCKNEY (Mich.,) April 19.-The milldam broke today, carrying away bridges, including two large ones in this yicinity. Fences, trees and houses along the bank of the stream were carried away. Damage amounting to \$40,-000 to bridges and mill property was

done in this vicinity alone RELIEF WORK THE FEATURE. VICKSBURG (Miss.,) April 19.—Relief work is the feature of the flood situation here. It is reported today that Louisiana levees are black with people waiting to be ferried over to the city. Lieut. Crowley of the quarter-master's department is here buying supplies for the flooded region in general, and handsome donations are coming in by mail and wire.

Midnight.—Maj. K. H. Willard, U. S. Engineers, has just received a dispatch VICKSBURG (Miss.,) April 19.-Re-

Midnight.—Maj. K. H. Willard, U. S. Engineers, has just received a dispatch from the master of the steamer Florence, ordered last night to Coons' Landing, La., to rescue flood sufferers, asking him to send all the skiffs obtainable by first steamer, as people are drowning and cannot be reached except by skiff. Coon's Landing is about thirty-five miles from this city, and is being flooded by the Biggs crevasse.

A dispatch arrived at midnight from Ashwood, La., saying the water is rushing rapidly into the swamps of Tensas parish. which are inaccessible by steamer, and this dispatch raised many apprehensions. Skiffs cannot be sent tonight.

tonight.

LATER:—A dispatch from the Valley-route operator at Hays, Miss., referring to the foregoing, says the calamity at Coon's Landing is due to a break in the levee there, and another has occurred opposite Rodney. No details have been received. Boats cannot be sent before morning.

DEMANDS HIS RETURN.

Prof. Becker, a Music Teacher, Is Wanted in Germany. IBY ASSOCIATED PRESS WIRE.1

MARION (O.) April 19.-Prof. R. O. Becker, Jr., a graduate of a musical conservatory of Germany, and teacher of music in this city, received a letter yesterday from his father, from Dresden. Germany, notifying him that a den, Germany, notifying him that a military court at Leipsic, Germany, demands his return to Germany and his appearance before the military court to show cause why he left the German military service; that a levy has been made upon his father by the German government of \$2000 yearly for his absence.

sence.

The professor says that he is now an American: that he came to this country six years ago, after serving his time in the German army. In case a demand is made for him through the German representative at Washington, he will appeal to the State Department, and ask the protection of this govern and ask the protection of this govern

Gen. Ewing's Death

Gen. Ewing's Death.

NEW YORK, April 19.—Mrs. Maria
Ewing Martin was awarded \$5000
damages from the Third-avenue Street
Railway Company for the death of herfather, Gen. Thomas Ewing. The general was knocked down and fatally injured by a cable car on January 26,
1896. He was formerly a member of
Congress from Ohio, and was a
cousin of Secretary of State John
Sherman. Mrs, Martin sued for \$50,000 damages.

Canto Bothering the Governmen Canto Bothering the Government,
NEW YORK, April 19.—A dispatch to
the Herald from Valparaiso says that
Gen. Canto will attempt to have the order pensioning him and retiring him
from the army for his hostility to Gen.
Korner rescinded. It is believed in
army circles that he will give the government a great deal of trouble before
his case is finally determined.

Uruguayan Rebels Winning. NEW YORK, April 19.—A dispatch to the Harald from Montevideo says the Uruguayan general Munez has again been defeated by the rebels under La-mos and Saralva. The Argentine gov-ernment will pay interest for June on the foreign debt in full.

# Baking **Powders Analyzed**

Royal," a cream of tartar powder of superior purity and strength.

The following extracts from Certificates of analyses of the Royal Baking Powder, made from time to time, are very helpful to those who wish to be certain as to what baking powder to select in order to get a pure article, free from alum or any form of adulteration.

Your committee have made a very careful examination of the Royal Baking Powder, and are satisfied that it fulfils all the requirements which the public can make of a baking powder. For purity and care in preparation it equals any in the market, and our test shows that it has greater leavening power than any other of which we have any knowledge. W. B. RISING.

State Analyst.

By analyses which I person-ally have had made, it is clearly demonstrated and proven that the Royal Baking Powder is pure and wholesome, and that it stands, as far as strength and purity are concerned, at the head of the baking powders of the United States. The Royal is composed of absolutely pure, harmless and wholesome ingredients of the highest grade and

GRANVILLE McGOWAN, M. D. Health Officer, Los Angeles.

The best baking powder made is, as shown by analysis, the Royal. Its leavening strength has been found superior to other baking powders, and, as far as I know, it is the only powder which will raise large bread perfectly.

CYRUS EDSON, M.D., Com'r of Health, N. Y. City.

CHICAGO, March 1, 1887. As the result of my tests, I find the Royal Baking Powder superior to all the others in every respect. It is entirely free from all adulteration and unwholesome impurity, and in baking it gives off a greater volume of leavening gas than any other powder. It is therefore not only the purest, but also the strongest powder with which I am ac-

quainted. WALTER S. HAINES, M. D., Prof. of Chemistry, Rush Medical College, Consulting Chemist, Chicago Board of Health.

I have analyzed all the principal brands of baking powder sold in this State. Royal has the highest leavening power. nd is composed of pure and wholesome ingredients. No other gave results so satisfactory.

FLOYD DAVIS. Iowa State Chemist.

I have made a large number of analyses of Royal Baking Powder, and have found it to be an absolutely pure cream of tartar powder, entirely free from ammonia and all adulterations and impurities. In leavening power it is of the very highest.

CHARLES W. DREW, Late Chemist Minn. Food and Dairy Commission.

I have carefully analyzed baking powders on sale in this city. The Royal excels all others. It is the highest in strength, in fabrique a faultless arrangement of agents, pure and wholesome, free from adulteration with lime. ammonia or alum.

JAMES E. SULLIVAN, M.D., St. Louis City Chemist.

The Royal Baking Powder is superior to any other powder which I have examined; a baking powder unequaled for purity, strength and wholesome-

BUSINESS OPPORTUNITIES-

WE DON'T TRY TO REACH THE NORTH pole, but you can be reached. Our way of reaching people nowadays is quite different from yours. The Real Estate and Commercial Exchange will do what you can never do. By listing your California or eastern property or business opportunities with us every member of the exchange throughout the United States will list it for one commission—we divide. We publish the National Trader and mail 10,000 copies East monthly, and advertise through George P. Rowell & Co. of New York in 240 leading dailies for free copies, also with Kellog's Ready Country Prints; we reach the masses everywhere. Call for free copy. In union is strength. Is your agent a member of the exchange? EUGENE B. STORK, president, room 20, Farmers' and Merchants' Bank. 20

# EDHEM PASHA.

(CONTINUED FROM FIRST PAGE.)

ing group, with the constant going and oming of orderlies carrying reports instructions, etc., noticeable. The ambulance corps was busy every direction, bringing in t

yound, whose faces were black with powder and covered with blood. Edham Pash gravely followed every phase of the fighting through a field glass, giving orders and receiving reports with imperturbable indifference It was noticed that many of the rewith blood. The officers and men alike were black with the dust of battle, and had not slept, shaved or washed for

two days and nights. Riza Pasha, commanding the Turkish artillery, is a man of magnificent presence. He exhibited masterly skill in placing his batteries and in directing

It is believed that tomorrow's fighting must be decisive. Several additional batteries of artillery and infantry have arrived to take part in the great comba of tomorrow (Monday.) The hill slopes on the northern side of the pass are strewn with Greek dead, mostly Evsplendid men. The faces of many of the dead are as calm as though

asleep. THE ANSWER OF GREECE.

Turks Tried to Violate Neutral Ter

ritory-Other Acts.
[BY ASSOCIATED PRESS WIRE.] ATHENS, April 19.-M. Skouzes, the Greek Minister of Foreign Affairs, has sent a reply to the note which Assim Bey, the retiring Turkish Minister handed to him, announcing that "in consequence of the aggressive attitude of Greece, diplomatic relations be-tween the King of the Hellenes, the Sultan of Turkey, and their respective governments, were broken off." M.

"In wishing to make Greece respon tible for the rupture of the diplomatic relations, the imperial government ap-pears to lose sight of the fact that Greece, far from proceeding to acts of hostility against Turkey, has had to suffer during the last few days from repeated acts of aggressiveness on the part of the Turkish army at several points on the frontier. Owing to the onflict on March 28, the royal government drew the attention of the imperial government to the attitude of Turkish troops, but instead of yielding to the spirit of moderation dictating the step, the imperial government appeared disposed to precipitate events Thus, on Friday, the Turkish army, without provocation, attempted to obtain possession of Analipsis, which was mutually agreed to be neutral terriwas all owing to the persist ence of the Greeks that this attempt to violate neutral territory failed.

"The royal government cannot let officially notified of the rupture of dipomatic relations, and while the King's Minister at Constantinople was only notified at an advanced hour of the fight, the forts at Prevesa opened fire at 5 o'clock in the morning on the Hellenic position at Actium, and sunk the Greek steamer Macedonia.

"In face of these facts, showing there is little foundation for the asser tion of the Sublime Porte to the effect that the Greeks committed acts of hostility, the responsibility for the consequences can in no way rest with the King's government.'

REVENI AND GRITZOVALI.

The Greeks Capture the First but Lose the Latter.
[BY ASSOCIATED PRESS WIRE.]

ATHENS, April 19.-[By Atlantic Cable.] A dispatch from Arta filed at 11:30 o'clock this morning announced that fighting continues between the Greeks and Turks at the entrance to the Gulf of Arta and elsewhere in that vicinity. The Turkish batteries at Hammiden and Pantecratoros are re-plying feebly. The crossing of the River Arakphos by the Greek armies under Col. Manos, numbering about ended by severe fighting during which the Greek artillery batteries distin-guished themselves. This Greek force

s now in Epirus.

Dispatches from the front received bispatches from the front received here this evening say that Turks in considerable force have been attacking Reveni, not far from Tyravera, northwest of Larissa, which would in dicate that the Greeks have not advanced far into Damasi Plain. It is added that the Turks were repulsed at Reveni. Still later dispatches from Revent. Still later dispatches from Gritzovali admit that the Turks have recaptured that place. In the second engagement at Gritzovali, the Greek brigade commanded by Gen. Mestro-pas, was able to reform, after giving way, under the command of Gen. Minelos, and is hurrying to reinforce Jen. Mastropas.

LEFT FOR JANINA.

ATHENS, April 19.—A telegram re-ceived this evening from Arta says the troops have left that point for Janina. The sea off Prevesa is very rough. The firing there today was desultory. BOMBARDING THEIR WAY.

ISLAND OF CORFU (Noon,) Apri -The Greek troops, as this dispatch is sent, are advancing on Filipiad, northwest of Arta. The Turkish forts at that place have been almost completely destroyed by the bombardment of the Greek fleet. Many forts have been reduced to ashes.

TRYING TO FLANK THEM. LARISSA, April 19, 5 p.m.—The Greeks have defeated the Turks at Reveni, and the two Greek brigades have entered Turkish territory in difhave entered Turkish territory in dif-ferent directions and penetrated to Damasi, northeast of Zarkos. Another division is trying to fiank the Turks, who are retreating in disorder. Heavy fighting is in progress at Gritzovali. It has been going on since noon. The Greeks are trying to re-capture the place.

GREEK BOULE ADJOURNS. ATHENS, April 18.—At the second sitting of the legislative assembly last night, the House voted various meas-

ures proposed by the government and then adjourned sine die. The session lasted until 2 o'clock this morning. CONSTANTINE GOES TO TYRNAVO. LARISSA, April 19.-Crown Prince Constantine has gone to Tyrnavo. BANK FURNISHES A HOSPITAL government to establish at Elassona and maintain at its own expense a hos-pital for the wounded.

OFFICIALLY NOTIFIED.

The Turkish Minister Communicates with Secretary Sherman.

WASHINGTON, April 19.—The Turkish Minister, Moustaph Bey, has communicated with Secretary Sherman on the status of the Turko-Grecian conflict. He has officially informed the American Secretary of State of the termination of diplomatic relations between Turkey and Greece, and the attitude of offense which Turkey has been compelled to take by reason of the aggressive course of Greece.

gressive course of Greece. It was expressly made known, however, that no declaration of war has been issued. Until this declaration is made the United States government is not likely to give official recognition to the existing state of affairs.

ADVICES FROM TERRELL. WASHINGTON, April 19.-The following official statement is made at the State Department: "The Depart-ment of State has received a dispatch from the United States Minister to Turkey relating to the situation be-tween that country and Greece and the Turkish declaration of war." Minister Terrell states that the Minister from Greece has been informed that he must leave before next Wednesday. He is not permitted to communicate by tele-graph with the Greek government.

There are perhaps 40,000 men sub-ject to Greece in Turkey. All subjects of Greece are required to leave Conor Greece are required to leave Constantinople within fifteen days. The note of the Porte to foreign powers discialms any desire for territorial acquisition. The Greek Minister informs Terriell that the Greek government requires al subjects of Greece of military age reserved for military duty. The Turkish government claims the The Turkish government claims the regular Greek troops seized and were fortifying Analipolis in violation of the agreement prohibiting it. Hence the agreement promitting it. Hence the attack there by the Turks on the 16th. The Turkish troops are scattered along the border of Thessaly and cannot quickly concentrate for a decisive battle. This may enable the Greek army to fight them in detail. BLASSONA DESERTED.

ELASSONA. April 19.-The town of who fled northward and toward Salonica, fearing that fighting between Turks and Greeks will extend to this

CARRIED THE BLOCKHOUSES.

Both Sides Lose Men at Milouna— Hard Fight. [BY ASSOCIATED PRESS WIRE.]

ELASSONA (Headquarters Turkish army in Macedonia,) April 18—Evening.—[By Atlantio Cable.] The Turkish forces, as this dispatch is being forwarded, are holding their positions in Milouna Pass. During the severe fighting which began yesterday evening the Greeks and Turks alike fought and began arms admirable manner. Greeks and Turks and to the haved in a most admirable manner.

Turkish reports just received say the whole of Milouna Pass is now in the possession of the Turks, who carried two Greek blockhouses at the point of

two Greek blockhouses at the point of the bayonet.

Late tonight information was received from the front that the Turks had occupied the whole extent of Milouna Pass and all commanding heights from Neckche to Papaly Vave, as well as all defiles. The Turkish losses thus far are reported to be slight, thirty killed and fifty wounded. The correspondent of the Associated Press counted 100 Greek corpses on the hill opposite the Turkish position. The Turks declare the Greeks were drunk during the fighting today, being constantly supplied with liquor. Kenan Bey has returned from Karya, where fighting continued when he left there. The Turkish loss at that place is 200. Kenan Bey says that he counted nearly a thousand dead Greeks.

# THE BALKAN ALLIANCE.

It is Merely for Protection from Austria and Turkey.

IBY ASSOCIATED PRESS WIRE.] ST. PETERSBURG, April 19.-Referring to the formation of an alliance between Bulgaria, Servia and Monte-negro, it is officially pointed out today that the league before formed today is merely for the protection of the governments named from Austria and Turkey; but against pan-hellenic aspirations of the Balkan Peninsula.

Therefore, it is added, Greece is unable to count upon any support in the present conflict from the countries indicated, and, moreover, their respective ministers have positively assured Russia that their governments will maintain street positively.

tain strict neutrality. A DISPATCH FROM TERRELL. WASHINGTON, April 19 .- The President and Secretary Sherman were in consultation several times during the consultation several times during the afternoon. It is gathered unofficially that it was concerning a telegram from Minister Terrell at Constantinople regarding the protection of American interests and the protection of Greek subjects which have been entrusted to our Minister to the Porte. Secretary of the Navy Long was also with them.

STILL HOLDING MILOUNA.

The Mussulmans Have Fortified the Two Blockhouses
[BY ASSOCIATED PRESS WIRE.]

LASSONA (Headquarters of the Turkish army in Macedonia) April 19.—(Evening)—[By Atlantic Cable. Associated Press Copyright, 1897.] The Turkish forces continue to hold the filouna Pass, though it is reported that the Greeks are advancing or making ready to advance to reoccupy the

that the Greeks are advancing or making ready to advance to reoccupy the positions from which they were dislodged on Sunday. The two block houses have been strongly fortified, and it would take a powerful body of Greek troops to recapture them.

Edhem Pasha has entrenched himself on all the heights from Papalyveda to Meckcho, and strong bodies of troops are stationed in the defiles between these two points. The inhabitants of Elassona have left the town en masse, and are pushing northward, many of them going to Salonica. Evidently they fear that the Greeks will defeat the Turks and actually reach this place.

Edhem Pasha, the Turkish commander-in-chief, is a marvel of energy and caution. He attends assiduously to his duties more than any member of his staff, receiving reports while on horseback, and attending to triffing details with as much care as important movements. His manner is grave and imperturbable. It is curious to note how implicitly he is looked up to by his troops.

Societies on Board.

A NOTE TO FRANCE. PARIS. April 19 .- In his interview day with M. Hanotaux, the Greek Min-ister read to the French Minister of Foreign Affairs a note from Greece to the powers regarding the Graeco-Turk-ish conflict.

NON-INTERVENTION. PARIS, April 19.—At a Cabinet meeting held this morning, it was decided not to modify the policy of non-intervention in Graeco-Turkish affairs, previously adopted by France. At the request of the Greek Minister at Constantinople, Prince Mayrocordato, the French Embassy there has been authorized to take under its protection the Greek Catholics in Turkey. At the close of the Cabinet meeting, M. Hanotaux, the Minister of Foreign Affairs, received the Greek Minister to France. PARIS, April 19 .- At a Cabinet meet

### NOT BOTHERING ITSELF.

The Country of Byron Only Waits for Greece to Be Licked.
[BY ASSOCIATED PRESS WIRE.]

LONDON, April 19 .- [By Atlantic Cable. The outbreak of hostilities on the Greek frontier has caused but little sen-sation here. The permanent officers and the Turkish Ambassador received no information beyond the fact that war has been declared. In spite of the fact of its being a holiday here, there was great activity at the Foreign Ofice, where the full staff was at work

fice, where the full staff was at work the whole day long.

The Italian, German, Austrian, Swedish and French and Turkish ministers had a lengthy conference with Sir Thomas H. Sanderson, the permanent Secretary of the Foreign Office. The latter informed a representative of the Associated Press that the powers had decided not to interfere in the war between Greece and Turkey, which, he added, should be sharp and decisive, as the Greeks have little chance of ultimately winning. nately winning.

NEWS TO ROME.

Four Thousand Greeks in Control at Prevesa-Albanians Retreat.

King George approving the attitude assumed by that monarch:

"Hearty thanks for your approval. Precious to me. Have six powers

against us. [Signed] "GEORGE." Continuing, Mr. Snowden said: There never was so ill an opportunity as the present for Greece to have a conflict with Turkey. Up to two or three years ago an advance of the Greek army into Thessaly would have meant a general uprisng of Roumania Bulgaria, Servia and Macedonia, and the overpowering of the Turks, for Roumania had a larger and better-equipped army than the Sultan.

"Now, however, the situation is very difficult. Roumania has practically established an alliance with Germany by having a Hohenzollern upon her throne, Bulgaria has almost become throne, Bulgaria has almost become a Russian province, and Servia's King is the son of a daughter of a Russian colonel, so that unless the peoples of these countries act contrary to the influence of their leaders, there is not likely to be any combination against

Turkey. "The Turks can, and no doubt will, drive the Greeks back over the frontier. The Turkish army outnumbers that of Greece, two to one, and is better equipped. The entire army of better equipped. The entire army of Greece, including reserves, consists of about 80,006 troops, and I do not think it has been possible for them to have been equipped with the most modern munitions of war. Greece has a deplorable financial condition and cannot stand a protracted conflict. I very much fear she will be badly whipped. but I do not believe the powers will allow the Sultan to overrun Greece to to take possession of Athens."

### SPOILED THE CONCERT. The Outbrenk of Hostilities Upset the European Agreement.

[BY ASSOCIATED PRESS WIRE.] NEW YORK, April 19 .- A dispatch to the Tribune from London says: "The sudden change in the East has

come when the Foreign Office is with out its chief and under secretary, and when every political leader of eminence is away from London. A Turkish declaration of war would have caused no surprise a week ago, when the Greek surprise a week ago, when the Greek irregulars crossed the frontier, but when day after day passed and the Sultan seemed to lack courage and hesitated to give the signal for which Edhem Pasha was waiting, the opinion was generally entertained that the concert had proved useful for once, and that the bowers were preventing an outbreak of war. This opinion, which was expressed in nearly every daily and weekly paper, was yesterday shattered after midnight by the news from Constantinonle that a state of war had been declared, and that the Turkish army was advancing toward Larissa. "Easter being one of the quietest Sundays of the year, and the West End being now empty, and the clubs being deserted, the outbreak of war has not caused any excitement here. The Foreign Office staff admit that the action of Turkev is decisive, and that serious irregulars crossed the frontier, but atter midnight by the news from Constantinonie that a state of war had been declared, and that the Turkish army was advancing toward Larissa.

"Easter being one of the quietest Sundays of the year, and the West End being now empty, and the clubs being deserted, the outbreak of war has not caused any excitement here. The Foreign Office staff admit that the action of Turkev is decisive, and that serious fighting on the frontier has already begun. What is now evident to every one is that the concert instead of triumphing and vindicating utility, as was surposed twenty-four hours ago, has uterly falled to prevent an outbreak or hostilities, and is now in danger or breaking down altogether.

"Sir William Harcourt, who speaks this week in Wales, will have a fine opportunity for emphasizing his recent criticism of Unionist diplomacy, and for harassing the government in his most aggressive style. Massingham and Labouchere have shown themselves to be saggressive style. Massingham mand Labouchere have shown themselves to be saggressive style. Massingham more of less of this reversible that he developments in that turbulent one of the great elements of danger in the situation. That whole region is highly infammable. There may be uprising among the Christian mountaineers in all parts of European Turkey. The howard the concert in the situation. That whole region is highly infammable. There may be uprising among the Christian mountaineers in all parts of European Turkey. The had sundertaken the protection of the chrest activation that the situation. That whole region is highly infammable. There may be uprising among the Christian mountain the situation. That whole region is highly infammable. There may be uprising among the Christian mountain the situation. That whole region is highly infammable. There may be uprising among the Christian mountain the situation. That whole region is highly infammable. There may be uprising a fine from the hads of the insurrection of decision of the free vin her from the developments in the tu

forces her to defend her territory. Greece is consequently making war upon the powers, and the combined blockade and concert cannot possibly be maintained after an outbreak of hostilities. This is a great advantage, and one well worth waiting for. But with the exception of a righteous cause it is almost the only one which the Greeks have. The Turkish forces have a heavier battalion, a fiercer and more warlike spirit, superior facilities of transport, and a more accessible base of operations. If Macedonia remains quiet behind them, they will possess all the advantages of numbers, discipline, leadership and position in the campaign now opening. If Macedonia revolts there will be appalling massacres and the Balkan states will be on fire.

"The powers will now devote their energies to localizing and restricting the area of conflict, but when the resources of the conflict have already been exhausted in diplomatic mismanagement, little dependence can be placed upon the success of their efforts. Five powers were committed to a densive campaign by their alliance, and the sixth has made little use so far of the opportunities for independent decisive action. It is amazing that in a crisis fraught with momentous consequences for Europe, the Foreign Office should be without captain or lieutenant, and the British Cabinet scattered over the continent."

NEW YORK EXCITED.

NEW YORK, April 19.—The an-nouncement that war had been denouncement that war had been de-clared between Greec and Turkey set the wheat market wild this morning. On the heels of Saturday's 4-cent rise in prices came another jump of 4 cents. May opened all the way from 82% cents to 83% cents, so intense was the excitement prevailing at the out-set. For an hour the market was in a furore, with values fluctuating so wildly that it was next to impossible to follow their course. May reached 83% on one of its wild spurts, which proved to be the high-water mark for the day.

FROM MOSLEM YOKE.

Ex-Minister Kasson on the Efforts

WASHINGTON, April 19 .- "What the mmediate future holds for Europe, I do not pretend to see," said John A. Kasson, formerly United States Minis-ter at Vienna. Mr. Kasson has made a special study of the eastern question and is, perhaps, the best authority in this country upon the peculiar compli-cations which exist in Southeastern

Four Thousand Greeks in Control at Preveza.—Albanians Retreat.

ROME, April 19.—[By Atlantic Cable.]
A dispatch to the Massagero from Arta says the remaining Turkish fort at Preveza is being destroyed by the fire of Greek warships and the position of the Turks is untenable. Four thousand Greeks, the dispatch adds, have been landed for the purpose of occupying Preveza.

The second dispatch to the same paper announces that 2000 Albanians who started into Greece with the expressed intention of reaching Larissa have recrossed the frontier.

WILL BE WHIPPED.

Ex-Minister Snowden Thinks Greece Is in for a Trouncing.

[BY ASSOLTATED PRESS WIRE.]
PHILADELPHIA, April 19.—Ex-Mininster to Greece Snowden said today that he had recently received the following reply to a message sent to King George approving the attitude assumed by that monarch:

"I knew Muravieff, the new Russian Minister of Foreign Affairs, at Vienna," said Mr. Kasson. "He was secretary of the embassy. He cared little or nothing for society. He attended to his business first, last and all the time, as is the Russian way. They are, you know, among the most patriotic people the work in the world. He seemed to be thoughtful and studious. At times he was in my time to be the Foreign Sectivation of the empire, I should have settled him more closely.

"Till we know what the Czar is trying to do, we shall be forced merely to guess at the future. But one thing is certain among the many things that are uncertain. Russia will never consent to the acquisition of any part of European Turkey by a strong power, unless it is upon a compromise which gives her Constantinople. Russia appears even to oppose Grecian acquisition, apparently in fear that it will be harder to wrest the territory which she steeks for herself from Greece than from its present indefinite control. Unless the powers interfere in behalf of Greece, the outlook is that the stronger nation, having the greater army and the better-equipped troops, will get the nation, having the greater army and the better-equipped troops, will get the better of Greece. All Greece is now full of reckless spirit, which takes no ac-count of the relative forces of probable

isaster..
"If war goes on and Turkey is let disaster..

"If war goes on and Turkey is let alone by the powers, the Turks will undoubtedly invade Greece and inflict heavy punishment. What effect will this have upon public opinion in those states of Europe where governments are amenable to public opinion? If the Turks indulge in any atrocities, or if they seriously threaten to mutilate Greece, the powers will undoubtedly interfere, part of them willingly and part of them under the pressure of public opinion in their countries.

"Unless the powers have agreed upon the redistribution of Turkish territory in Europe," continued Mr. Kasson, there is little probability of their doing much more by their action than on the one hand preventing Greece acquiring the territory which she desires, and on the other preventing the destruction of Greece herself."

"This European concert is a diplomatic creation of this century, resting only on modern precedent and trade

cept of self-interest and expediency. This was fully shown in the Congress of Berlin in 1878. It seems impossible at the present time that this concert can be reëstablished in respect to Greece beyond the limits which I have already stated.

ready stated.

"The Island of Crete was an early conquest of the Turks in their aggressive wars upon Europe, but has continued by a large majority of its inhabitants to be Greek in language, religion and civilization. In view of the modern emancipation of their race south of the Danube, from the yoke of the Turk, they have become more restless. They have been of the Turk, they have become more and more restless. They have been promised reforms from time to time which have not been executed. Their undoubted wish is to be annexed to Greece, and it is impossible for Greece to understand why she has not as much right to Crete as Austria had to Bosnia and Herzogovnia. The Cretans cannot understand why Russia, which by force of arms emancipated their fellow-religionists in Servia and

tans cannot understand why Russia, which by force of arms emancipated their fellow-religionists in Servia and Bulgaria and elsewhere, should oppose Cretan emancipation now.

"The whole question involves that of deliverance of Southeastern Europe from the Moslem yoke. In Roumelia and other small States in this section of Europe there are many Greeks. The policy of Greece is to stir them into insurrection against the Turks. Here is one of the great elements of danger in the situation. That whole region is highly infiammable. There may be uprisings among the Christian mountaineers in all parts of European Turkey. The powers will have a great task on their hands if the insurrection preaks out in these Grecian communities. All the Greeks of this region have in them more or less of the traits of old Greek democracy of 3000 years ago.

"There can be no permanent peace, no adequate settlement of these vexing questions," concluded Mr. Kasson, "till the Turk is either driven altogether out of Europe or confined territorially to the vicinity of Constantinople. The fire of rebellion throughout these provinces is never extinguished and never can be as long as the Turk is their nominal or actual ruler. It is now and then covered up but it always exists. If the war goes on, if these provinces burst into a blaze of insurrection, Europe may find it necessary to parcel out European Turkey, or a great part of it.

If war comes, it will, in my opinion, be on some other pretext than that presented in the Cretan question.

"If hostilities had been postponed two weeks longer I believe the powers would have been able to reach an agreement as to the future of Crete, and that Turkey, fearing this, precipitated the conflict. It may end in their undoing."

AMERICAN INTERESTS.

Admiral Selfridge Looking After Them in Grecian Waters.

TBY ASSOCIATED PRESS WIRE.]
WASHINGTON, April 19.—Anothe elated dispatch from Mr. Terrell was given out at the State Department. It bears date of Saturday, from Pera, the diplomatic suburb of Constantinople, and in it Mr. Terrell simply confirms the press reports of the initial statements of the breaking out of

itial statements of the breaking out of hostilities.

The United States navy is preparing to do all that is necessary for protection of American interests. Admiral Selfridge, the commander of the European squadron, consisting at present of four warships, all in the eastern Mediterranean, has been expecting an outbreak of hostilities, and from time to time has advised the Navy Department of the outlook. He is now under general instructions to look after American interests, and no movement has been made or is likely to be made in the immediate future to give him instructions as to his conduct. The American squadron will be left entirely to his discretion, the department believing that, as he is at the seat of war, he is better prepared than any one here to act to the best advantage. The first sign that the admiral had begun the disposition of his little squadron to meet the war epoch was the receipt of a cablegram at the Navy Department today announcing the arrival of the United States cruiser Minneapolis at Syra. This is an island in the Greek Archipelago, lying at the foct of the Aegean Sea and at a point almost equally distant from Crete, where the war has been actually going on for weeks, Athens, and the entranee to the Dardanelles, so that it is admirably selected, in the judgment of the department officials, as a place of observation and a base of action in either direction where an American warship may be needed.

The officials of both the State and Navy Departments, however, have little apprehension of ill treatment of Americans in either Turkey or Greece, which is regarded as about the only cause of friction now. Possibly at a later stage in the war, in the event that the Turks are defeated, there may be rioting at Constantinople or some of the larger Turkish cities, but that is not feared at present.

It has been suggested that the President probably will be called upon to issue a proclamation of neutrality, now that war is begun between Turkey and Greece. The officials have looked into the precedents i The United States navy is preparing

citizens that if they espouse the cause of either combatant they will absolve their own country from extending pro-tection to them. Conditions may arise later on, it is said, warranting the State Department to issue a proclamation, but the Americans in Turkey and Greece are so few in number and are

In trouble.

The progress of hostilities is being watched with the keenest interest in military circles here. Already there has been a great demand for accurate maps of the scene of the first outbreak, and this has been responded to by the military information bureau by giving orders for the preparation of such a map as was issued during the war between China and Japan, a publication of great value to the student of war. It may be said that while the sympathies of the army officers lie largely with the Greeks, they fully expect that the Turks will prevail in the end, if allowed to wage war untrammeled by the interference of other powers, and there are signs to indicate that such an arrangement has been reached by the principal military and naval powers of Europe as will make this possible. The War Department experts say that Turkey, on paper, at least, has one of the most formidable armies in the world, and although it is generally admitted that its strength may not be anywhere near as large as thus set out, still there actually exists a military force besides which that of Greece is absolutely insignificant in numbers. In addition to this numerical superiority, the War Department experts say the Turkish forces for some time have had the benefit of thorough training by a number of German army officers, the best drillmasters in the world. At present the Turkish commander-in-chief, Edhem Pasha, has at his back one of the ablest strategists in all Europe, in the person of In trouble.

The progress of hostilities is being "This European concert is a diplomatic creation of this century, resting only on modern precedent and tradition. The earliest and most striking instence of its operation was the Congress of Vienna in 1815, when they divided up Europe according to their pleasure. Napoleon III broke in upon the serenity of the concert and afterward undertook in part to restore it. Its action in any given case it is impossible to foresee, as it is governed by no principle and recognizes no law, except of self-interest and expediency. has at his back one of the ablest strate-gists in all Europe, in the person of Lieut.-Gen. Baron Comar von der Goltz, a German officer "loaned" to Turkey by Emperor William. This officer is said to unite in himself all the qualities of a most fitted scholar and experienced sol-dler. He perifolicited in the year will

Emperor william. This officer is said to unite in himself all the qualities of a most fitted scholar and experienced solidier. He participated in the war with Denmark, in the Franco-Prussian war and in the Austro-Prussian war, and is the author of three military books that are regarded almost as text books in the service. It is reported here that Baron von der Goltz is really the author of the plan of campaign under which the Turkish army is now fighting.

The War Department is preparing to collect all of the techincal information that may be derived from the war. Capt. Schriven, the military airaché of the United States Embassy at Rome, has alraedy telegraphed the department for permission to go to Turkey to watch the progress of the war, and the necessary permission will be given him. If he finds it desirable that some us should act in a like capacity with the Greek army, the department probably will send Mad. Dorst, our military attaché at Vienna, to the scene.

The President is taking an active interest in the struggle between the Greeks and Turks. Secretary Sherman came over to the White House this afternoon, and the Fresident immediately left all other business to conferwith his premier on the subject. Secretary Sherman previously rad a lorg talk with Mr. Angell, who, being about to start for Turkey, the latter part of May, is naturally deeply concerned in the developments in that turbulent quarter.

None of Mr. Terrell's telegrams so

### THE TIMES' FIESTA NUMBER.

Pictures of La Fiesta de Los Angeles will remain in the memories of all who witness the brilliant pageant, but memory's pictures fade in time, and to preserve in more enduring form the story of the great Southern California Carnival, THE TIMES will issue on Sunday, April 25, an elaborate special Fiesta Number, containing graphic pen and pencil and camera pictures of all the features of the splendid show.

Within the handsome cover, lithographed in colors, will be found the complete story of the carnival. The ancient dances of the Indians, known now only to the older men of the tribes and soon to pass into legend and be forgotten by the younger generation of the race, will be described and faithfully portrayed.

The arrival of La Reina de La Fiesta at Hazard's Pavilion, the dancing of the minuet by her court and the grand masquerade ball, with which the carnival formally begins, will be pictured in detail and truly recorded. Wednesday's street parade will be

mirrored in the pages of the Flesta Number. The gallant cavalcade of Spanish dons, the great Chinese dragon, dragging his wondrous length through the streets, attended by hundreds of richly-costumed Orientals, the man-o'-war's men steadily marching, the fire brigade, with its bravery of burnished brass, and the thunder of wheels and hoofs, will all be there.

The athletic games and races of Thursday will be reported by experts. The Legends of the Flowers, told in a ssion of twenty artistic floats in the illuminated pageant of Thursday night, will be told again by pen and

The description of the Floral Parade and Battle of Flowers on Friday afternoon will reveal to wondering visitors what is possible only in this land of

The Water Carnival and volcanic eruption of fireworks at the park on Friday will have adequate portrayal. The children will have their day at the tribunes on Saturday, and the story of their merry-making will be told.

All-Fools' night, with its revelry and fun and nonsense, the closing scene of the carnival, will be pictured and described, and the merry throngs that play wild pranks will all he seen "in their habit as they lived" in the pages of the Fiesta Number.

The special edition will include four-page part, printed on book paper. containing half-tone portraits of the Queen and her court, the Floral Queen Fiesta and many special features of the carnival, completing the history

This great Fiesta Number will be something to preserve as a souvenir of Southern California; a book to send abroad to those who have not seen and can but faintly imagine the glories of La Fiesta de Los Angeles.

The paper will be delivered to subscribers as the regular Sunday issue of April 25. The price of single copies will be 10 cents.

"When Greek meets Greek," but he is not meeting him this time. He is face to face with the unspeakable Turk and knocking more opium out of him than you can shake a stick at. Take a look at Greece, on the man just for an hour's amusement. Take a Gunter's scale and measure from the center of the kingdom to the coast line and you will see that no portion of the kingdom is over forty-five miles inland. That's what makes them such a nation of great sailors. San Francisco has about three hundred Greek fishermen, of whom about one-half have already returned to their native land, to fight for King George and the

The ship Samaria, long overdue at San Francisco with a cargo of coal from Seattle and generally given up for lost, is not the only one that is among the missing. The big three-masted schooner Aida, Capt. Anderson, sailed from Shanghai for Tacoma the first day of December last and has never been heard from since passing Point Gutzlaff. A severe typhoon prevailed several days later and it is lieved that she has gone down with sil on board.

# THE WAR SITUATION.

European powers to intervene by force of arms and stop Turkey and Greece from further fighting. There is no likelihood that such action will be taken by the powers. It would be an unwarrantable interference, and would fail in its ostensible purpose. Allied Europe-if European alliance in such a cause were possible which is doubtful-might put enough men into the field to stop active hostilities for a time. But such a measure would in no sense be remedial. It would not even be palliative. Hostilities would be resumed so soon as the European armies were withdrawn. The issue hetween Greece and Turkey cannot be settled by Europe through force of arms, if indeed it can be settled by Europe at all. It is a feud of long standing-an irrepressible conflict, which will never be permanently at an end until Moslem oppression of Christian subjects has been abolished. European intervention to stop the war would be of very doubtful success, even if all the great powers were be pursued. But instead of being united they are wide apart. Each is jealous of the others, and suspicious of every move that may be made. European concert of action was found impracticable previous to the breaking out of hostilities, though heroic efforts were put forth to maintain it. It would be even less practicable, not to say impossible, now that the dogs of war have been loosed. An attempt at concerted intervention by Europe would be very likely to precipitate a general European war, the consequences of which no man can foresee. Though ostensibly a move in the interest of peace, it might prove to be the lighting of a fuse which would quickly set all Europe ablaze with

While the course of the several governments of Europe has thus far apparently been favorable to Turkey, it is not at all certain that these governnents are really friendly to the Turkish cause. Russia is suspected of ulterior motives really inimical to Turkey, and the sincerity of the other great powers is likewise open to suspicion. Popular sentiment throughout Europe is undeniably for Greece, and overwhelmingly so. This strong public feeling is bound to make itself felt sooner or later, and will in the end shape the course of England, France, Germany, Austria and Italy, to a great extent. Even monarchical governments in these modern days, must bow to the people's will in matters of grave moment. It would not be at all surprising if the Salisbury Ministry should be overthrown, in England, within the next thirty days, in consequence of the attitude in which it has placed the British government in this affair.

Turkey and Greece, or will extend to other powers, is a problem of the future. It is by no means certain that the Turks can win, if unaided by outside powers, although they have the apparent advantage of superior numbers and equipment. They have in the Greeks a determined and valiant fce. And if justice, right and human progress have aught to do with the destinies of war, the Greek arms will in the end be triumphant. The cause of Greece is the cause of liberty and humanity. The cause of Turkey is the cause of oppression and of barbarism.

The fruit-growers of Southern California who, last year, demanded of their legislative candidates that they should vote and work for the re-election of Senator George C. Perkins, made no mistake. They knew their man and recognized his industry and general worth to the State. Senator Perkins may not be the equal of Baker or McDougall as an impassioned orgrandest little nation in all the world's with the throttle wide open, when he gets into a committee room.

Farmers in the Ohio Valley are awakening to the fact that irrigation will pay them large returns on the investment by insuring good crops in dry seasons. The awakening comes rather late, but "better late than never." There is scarcely a section of the country where an irrigation system would not pay for itself within

Dock thieves in San Francisco Bay robbed no less than six ships in one night at the Sausalito anchorage. Had those fellows been around when Capt. Noah was making his famous voyage in the ark, they would have stolen all the lions and tigers, and England and Tammany would today have been without zoological emblems of any

### PROTECTION IN THE NEW SOUTH.

The rooks and the crows did not quite devour all the seed that sturdy Sam Randall of Pennsylvania, sowed in his single-handed battle against free trade as he traveled through the cotton States in the spring of 1885. Mr. Randall was just out of his seat as Speaker of the House of Representatives, and as such had a national prestige. In personal appearinridge, but a man of far more practical methods in daily life. He was a Democrat, strong in the faith, but taking his political cue from the teachings of Silas Wright and Stephen A. Douglas rather than the doctrines of Jeff Davis and Yancey. In addition to a striking personality and extremely graceful presence, he had the courage of his convictions. "In ten ears more, he said in a speech delivered at Chattanooga, "when the competition between New York, Connecticut, Massachusetts and New Jersev shall be clamoring for free trade order to obtain cheaper raw material, the South will be begging for protection to her infant industries."

A Paris newspaper calls upon the It seemed like an anomalous condition of things to portend at that time. Old men who had marched under the Democratic banner since their boyhood and ridden home from Illinois (when it was a Territory) 600 miles on horseback to vote for Andrew Jackson, in Tennessee, stared aghast at this bright-faced and clear voiced man, who stood erect and challenged the sentiment of his party like the mighty Telamon defying the a Democrat is this?" they asked; but if the great and far-seeing northern leader were alive today there would be no need of the question. The industrial history of the country during the past four years has fully vindicated the sagacity of his utterance and the fallacy of the tenets adhered to by Mr. Cleveland and his free-trade followers. It is less than three weeks ago that a North Carolino member of the House, and a Populist at that, (Mr. Skinner,) said a good many things in the course of united upon the course of action to a speech which shows that what Randall said twelve years ago, in his tour through the South had not entirely dropped out of memory:

"The North and East have nothing they must look to the South for ma terial: but I submit it is not fair for buy foreign raw material as against the same material in the South. of protection we would soon have the advantage of the North and East in transportation, a big item, would be saved, and in two decades we would come the great manufacturing section of this country. Capital is selfish, and it will take advantage of the net saving wrought by placing the plants Imagine, if you please, that the day should ever co when the South would manufacture her raw cotton; we would simply convert a three-hundred-million-dollar crop into a nine-hundred-million-do lar crop, and build up a home market for diversified products. Even to manufacture one-half of this crop would make the South blossom as a ginning to dispel the darkness and old prejudices to such an extent that among Democrats a difference of opinion is obtaining.
"But when you mention protection

to the average southern politician, he cries 'Bear, bear!' It has been their stock in trade for three decades. This reminds me of an early dawn seen in Switzerland. One of her citizens re-siding among the crags and peaks sees the crags, peaks, and mountans sees the crags, peaks, and wrapped in snow. As he opens his wrapped in snow. As he opens his front door he sees away up yonder against the mountain side a small black spot, which arrests his attention, ings. He watches it for a while; it seems to have motion, and is coming in the direction of his house, now assumes the shape of a bear bear and coming toward his home, his wife, and children. He rushes back into his room and arms himself with his trusted gun and goes out to the gates to meet the bear and kill him and defend his home and his loved ones. He lingers, waiting, watching. The bear assumes the shape of a man and approaches nearer. As the man approaches nearer and nearer there is nething in his walk, in his size, that is familiar; and when he approaches near enough—when the face can be analyzed-to be sure, it is nobody but Brother John-Brother John who has been gone for years-and he comes back home to help to care for mother and father, to develop the farm, and to make us all happy."

The South is coming on quite as fast as can be expected, if not as rapidly as her most sanguine well-wishers could desire. Maryland, Kentucky and West Virginia went Republican at the last election and Tennessee would have done the same thing if there could have been such a thing as "a free vote and a fair count." And looking over the returns from Texas the reader will find enough to convince him that the Lone Star State will be very apt to go Republican in 1900 if there be no local issues to distract the Republican vote.

The great protectionist of Pennsylvania has passed on, but his life-work lives after him to glorify his memory. The seeds of protection that he sowed in the South twelve years ago fell on good soil. They are bearing fruit to-They are like little drops of water that come tricking down the mountains side as the sunlight of little drops, at the end of a mile, have become a brook. At the end of ten miles the brook becomes a river, the river a broad gulf and the gulf an arm in the new South. Every dam that is built there and every turbine wheel that is boxed for action in water

half of what Rardall told them in 1885. The tree is bearing good fruit, and we cannot afford to have it mature with a pothouse growth. On the contrary it must reach its full maturity with a strength that will defy the summer's drought and the winter's cold alike, and wave in undiminished beauty and symmetry over a South regenerated and a nation reunited in obedience to the proposition that honest labor is the "one touch of nature" that "makes the whole world kin." Protection will be the shibboleth of South in the next campaign whether President McKinley be re nominated or not: and the State which goes against it will put herself on record as being so poor that she has nothing to protect.

## THE WAR IN EUROPB.

A significant statement is contained in a recent dispatch from Athens to a London paper, telling how four Russian officers, who refused to bombard the insurgents on the island at Crete were tried at Sebastopol and acquitted. It came out that the Russian crews threatened to mutiny if the bombardment was undertaken.

This is a striking evidence of how distasteful to the people the job is that been undertaken by the great powers of Europe. It is well known that the officers and men of England, France, Germany, Italy and Austria are, with very few exceptions, strongly in favor of the Greeks, who are bat tling for the independence of Crete but it was not generally known that this spirit has spread among the stolid members of the rank and file of the Russian army, who are accustomed to follow their leaders with a blind and unquestioning devotion that can only be paralleled in the ranks of Mohammedan armies, whose members are taught to believe that death in battling an infidel is a short step to a paradise peopled with fascinating houris. In view of this powerful sentiment among the masses of the people in Europe, the great powers may well hesitate about going too far in upholding the Sick Man, who has been the curse of Europe for centuries, and who has no more part in modern civilization than has Mephistopheles at a Sunday-school picnic.

There is yet another obstacle which confronts those who are anxious to plunge Europe into war. This is the financial side of the question. Nowadays, the great financial firms have as much to say in regard to the waging of war as do the monarchs and councils of the nations, if not more so, Nearly a century ago the great Napoleon enunciated the truth that armie "fight upon their bellies." The state ment is still more true today than i was then, for the cost of war is enormously greater now than it was in the Napoleonic era. Then, again, millions upon millions of western capital are invested in Turkish securities, and the owners of this capital will have something to say in the question. Added to all this, the fact that modern warfare has become so deadly and destructive as to threaten the annihilation of great armies and mammoth warships within a few minutes, and we may well understand the hesitancy with which the great powers of Europe approach the precipitation of a European conflict, the result of which no man, however shrewd a statemen he may be, could safely guess at.

## SENATOR JONES ON PROTECTION

Unless the views of Senator Jones of Nevada on the tariff question have changed very radically within the past few years, he will be found acting with the Republicans in behalf of protection during the pendency of the tariff question in Congress. The speech made by Mr. Jones in the Sen-McKinley Bill was pending, was one of the strongest arguments made in either house in behalf of that policy. He traversed the subject in all its more important phases, overthrowing the fallacies of free trade with thoroughness and skill. The grand truths of the protective system were set forth

with rare force, logic and eloquence. The speech of Mr. Jones is really a classic on the subject of which it treats, and his argument, as an entirety, is virtually unanswerable. It does not seem possible that a man holding such views, with the ability to express them so gracefully and well, could so far forego his convictions as to act with the party of free trade on a measure directly involving the tariff ssue. The conditions which prevailed in 1890 are substantially the conditions which prevail today. Mr. Jones's argument is as potent today as it was in 1890. The truths to which he gave eloquent utterance then have lost none of their force in 1897. It seems safe, therefore, to count Mr. Jones as a friend of protection, notwithstanding his alliance with the advocates of free silver coinage.

Although the Ottoman Empire is bankrupt, and has a big war contract on hand, it will have to fork over about \$750,000 as compensation for lives and property of American missionaries destroyed by Turkish soldiery, chiefly in the Armenian massacres. Dr. James B. Angell, who was recently appointed by the President as a special agent to settle these claims, tions to push them with vigor. Unless the cash is forthcoming, the Sublime Porte will hear something drop with a thud more or less dull and sicken-

It is a good thing for the citrus-fruit growers of Southern California that we resentative of California interests as George C. Perkins. Otherwise to judge power is another object lesson in be- from recent advices, it appears to be co

not improbable that the foreign fruit dealers of New York, backed by the Italian Ambassador, might exercise more influence with the Senate than the California commissioners, who journeyed 3000 miles to advance the reasonable claims of Southern Cali fornia horticulturists. In this connec tion, we may say that it is doubtfu whether there is another State in the Union that has such a combination of ability, force and integrity as California enjoys in the persons of Senators Perkins and White.

Every loss has its compensations The Turco-Grecian war will be of some benefit to American industries. even if it does not extend beyond the confines of these two countries. In case it should involve the European powers, our manufacturing and agricultural industries-would take on a decided boom. Farmers, proceed to raise wheat, hogs and cattle!

The Kansas Legislature, having been rought face to face with a scandal that was fragrant enough for Boise or Olympia, has resolved to "probe the bribery charges down to the bottom.' Perhaps this would be easiest accom plished by turning the matter over to the grand jury and letting them indict the entire Populist party.

Capt. Chittenden's story of the stranded whale on the Cocopah Desert, over three hundred miles from the ocean, is good enough to have emanated from the philanthropical society of Oregon known as the Colilo Lying Club, of which ex-Gov. Murphy of Arizona was secretary during his resi dence in the Webfoot nation.

The British Embassy at Washington alone costs England about \$60,00 per annum, equal to a large proportion of the expense of our entire State De partment. The United States may not be the greatest government in the world, but it is certainly the most economical one of its size.

If people want to go mining, and California is not good enough for them. let them try the Olympic range, south of Port Townsend. Those mountains abound with fish and game, and the prospector is sure of a most enjoyable summer, if nothing else. It beats Alaska all to pieces.

The cruel war between Jerry Simpson and Tom Reed has not yet been declared off.

Gen. Horace Porter aptly observes that "Boston is not a city but a state of mind."

### AT THE PLAYHOUSES.

ORPHEUM. The programme this theater was an unusually long one last evening, there being two holdover features that were not included in the list, and enough new attrac the performance, although some of the latest importations are mediocre, particularly Baby Lola, who is billed as a "wonderful child artist," but is really nothing but a commonplace little girl, who sings and dances in a commonplace way, and Murphy and Raymond, who are neither notable singers nor comedians, but who dance with grace and thus save their turn from being as flat as it would be otherwise.

flat as it would be otherwise.

Werner and Rieder, who made their first appearance last night, are clever artists. The gentler member of this team has a figure for a sculptor, a rest conscious ways a sculptor. most engaging manner, and a voice that is sweet and true. Her imitation of the nightingale is a beautiful bit of mimicry as she warbles with the facile ability of the songster she so daintly simulates. Her team mate has a strong resonant voice, and the pair make a most welcome addition to the bill.

bill.

Johnny Ray and the more substantial Emma have a new sketch this week, entitled "Wild West," which is as comical and side-splitting a skit as has ever been presented on the boards of this theater. Mr. Ray's peculiar comicalities of make-up and facial expression are turned loose in the person of wild and woolly Mick, who is going out West to slay woods full of fiery, untamed savages. Miss Ray taking the character of an Amazonian gore-letter, who is to boss the campaign. Throughout this performance of the Rays the house is kept roaring and howling with laughter, and when, after repeated recalls the curtain drops there isn't a dry eye nor a side without a pain in it in the audience. It is a wildly funny bit of fooling, and must be seen to be appreciated. The ciever Vilon sisters gave a number of operatic selections on the dual violins and plano, and were given a big reception. Their selection from "il Trovatore," was played with fine spirit and expression, and their other numbers were presented in an equaliy happy way.

The McAvoys repeated their "Ho-

happy way.
The McAvoys repeated their "Hogan's Alley" sketch, the performance concluding with the great acrobatic act of the three Richards. There will be two performances at this theater every day during the carnival.

BURBANK THEATER.-A fair-size audience witnessed the opening per-formance of "The Gutta Percha Girl," at the Burbank last night. Grac's Plaisted, the popular soubrette and songstress, appeared in the title role supported by an above-the-average

supported by an above-the-average cast.

The play is a rattling three-act farce comedy, full of refined fun, and goes with a snap from the first to the last curtain. In rollicking style it presents a succession of ridiculous domestic complications which go to prove that a lie which is part the truth is the hardest kind of lie to fight against. The prying mother-in-law, the trusting wife, the innocently-gay husband and the mischief-making Gutta Percha Girl, manage during the action to jumble things from the frying pan into the fire and back again, after enough to suit the most exacting fun-lover in town.

During the evening a number of ballet dancing and musical specialties are

During the evening a number of bal-let dancing and musical specialties are presented under the masterly leader-ship of Arnold Kiralfy, including the sailors' hornpipe, Spanish dances, etc., all of which show a bewildering array of shapely female forms to advantage and add a decidedly carnival spirit to the performance. The same bill will be given every night during the week.

ATTRACTION TONIGHT. - This evening and the remainder of the weel the Los Angeles Theater will presen a specimen of the bucolic drama, en titled "Si Perkins," which comes to thi titled "Si Perkins," which comes to this city for the first time, with a flattering string of press notices, and a promis-of something good in the way of enter-tainment. A feature of this show is the great Pughtown Band and sym-phony orchestra, which will make the welkin ring in great fashion. The company is a large one

# NOT VERY BRIGHT.

PROSPECTS FOR PROTECTION TO CITRUS FRUITS.

Eastern Senators are Inclined to Favor Importers More Than American Producers.

WOOL IS ALSO IN JEOPARDY

EASTERN MANUFACTURERS DE

Pacific Coast Industries Will not Fare Well Without Democratic Support—The Situation Improving.

SPECIAL CORRESPONDENCE OF THE TIMES.

WASHINGTON, April 13.—The prospects for the citrus-fruit tariff are not very bright just now, but they may grow better. In fact, the probabili-ties are that they will. The Repub-lican members of the Finance Committee being, with the exception of Senator Allison, from New England States, confine the doctrine of protection to manufactures. Citrus fruit and wool are both going to be cut down. The eastern doctrine of protection has, as an integral part of it, the doctrine of free raw materials and the doctrine of free raw materials and productions used for food. Allison is from Iowa, a State that has no especial interests to protect, and be joins his New England colleagues. It is claimed by the wool-growers that almost all of the wool imported will escape with a duty of less than two cents a pound. It is claimed by the manufacturers of woolen goods that to increase the rate on raw wool would compel an almost prohibitive tariff on manufactured products. The importers of citrus fruits claim that a duty of even three-quarters of a cent a pound would be prohibitive, and would deprive the working classes of cheap fruit. This duty of three cents a dozen on oranges, it is claimed, would prevent them being imported. Morrill of Vermont, Aldrich of Rhode Island and Platt of Connecticut are too strong for Allison of Iowa, while Wolcott is paying no attention to the tarriff joins his New England colleagues. cott is paying no attention to the tar-iff, expecting to leave for Europe within a month on his monetary con-

erence mission.

That the Republican members of the Finance Committee are in favor of reducing the duty as it came from the House, is certain. It is also settled that they are now in favor of restoring the cubic-foot basis. They claim that it has been demonstrated that it would entall too much trouble to weigh citrus fruits, a statement that when communicated to the customs department of the treasury without giving its source, brought forth the prompt response: "Bosh! Who gave you any response: "Bosh! Who gave you any such nonsensical traddle as that?" When informed that it emanated from a Senator, a far-away pensive look a Senator, a far-away pensive look spread over the official's face, and he requested that his name should not be used. The argument, however, could not be more accurately stated than his

words conveyed it.

The delegates will continue to work with the Republican members of the Finance Committee, but as the meetings are not open to public hearings, it is hard work. Senator Jones of Nevada, and Senator Jones of Arkansas, and Walthall of Mississippi, Arkansas, and Walthall of Mississippi, say that the pound basis and a centa-pound rate will have the support of the Democrats when the bill is considered in full committee, and as the 
Democrats, with Senator Jones of Nevada, constitute a majority, if their 
promises are kept, the bill will be reported as the delegates want it.

Democrats, with Senator Jones of Newadas, constitute a majority, if their promises are kept, the bill will be reported as the delegates want it.

The Senate being so nearly a tie, it is an exceedingly difficult matter to construct a tariff bill that will pass and maintain, a protective principle. There is no question that so far as manufacturers are concerned, the bill will be entirely satisfactory to Republicans throughout the country. The far West has but few manufacturing enterprises, comparatively speaking. The people there want duties on ores, on wool, and on fruits. The East demands as a part of the protection to manufacturers, free raw materials. It will, therefore, be necessary to bring these conflicting interests together by compromises, and in those compromises the western interests being less important so far as the amount involved is concerned, will brobably be called upon for greater sacrifices than the East will have to make. It is very unfortunate for the West that no Republican from that section is on the

ed is conceited.

upon for greater sacrifices than the
East will have to make. It is very
unfortunate for the West that no Republican from that section is on the
Finance Committee at this time.
Senator Wolcott is a member, but, as
has already been stated, his interests
just now are not in the tariff.

It is remarkable how strongly the
importers of citrus fruits have exerted
themselves, and notwithstanding the
active work done from California, it is
probable that a majority of the petitions
received on the subject have opposed
the pound rate on citrus fruits.

Fully as important to California is
the wool duty, and there were a great
many protests as to the schedule in
the House. It will, therefore, be a
subject of a good deal of disappointment when it is known that the re-arrangement of schedules compels the
Finance Committee to make a reduction
on raw wool. It has not been made yet,
and the western Senators are working
hard to hold it, but it is certain that
the wool-growers will at least be
treated no better, if as well, as they
were in the House.

Neither the fight on citrus fruits nor
that on wool is lost, and neither will be
over before the bill is finally passed,
but the combined power of New England is exerted to preserve the principle
of free raw materials and cheap food
products. This is the reason that the
hope of the citrus fruit and wool men
rests not upon the Republican members
of the committee, but upon the western
Senators, without whose votes the bill
cannot pass. If they stand by fruits
and wool, they will win. They hold the
balance of power, and can dictate
terms. They declare that protection on
fruits, wool, and ore are their terms,
and they will accept no others. If this
position is maintained the bill cannot
pass until those terms are acceded to.

The delegates, being Republicans, find
it very difficuit to understand the favor
with which their proposition of a cent
a pound on citrus fruits finds with the
Democrats, and the opposition encountered from Republicans. Democrats, and the opposition en-countered from Republicans. The reason is, as I have stated, the promises made to the manufacturers and the de-mand that those promises be fulfilled, and the clash of interests when it is sought to grant equal protection to all and the clash of interests when it is sought to grant equal protection to all. It is a long struggle. The Republican members of the Finance Committee are working hard, and the end seems farther off than when they began. It is now believed that the bill will not be reported to the Senate for a month yet, and there will not be less than a month of debate, probably two months, after it is reported.

FRANK L. WELLES.

FRANK L. WELLES.

It entered the inclosure it sank upon the ground and apparently died of what the natives termed a broken heart. Every effort was made to restore the elephant. It was treated by the doctors, punched with spears by the mahouts, but all to no purpose, and it was finally deserted. But the moment the natives had reached a safe distance the willy beast sprang to its feet, and with exultant trumpeting rushed through the corral fence, where its cries of delight at the success of its ruse were heard for some time.

Hall Dedication.

John Adams Council, No. 33, Junior Order United American Mechanics, dedicated its new hall, at the corner of Adams street and Central avenue, last evening by an open meeting and appropriate exercises. Past Councilor F. N. Marion acted as master of ceremonies, and among the features of the evening was a paper on "The Bible in Our Public Schools," by A. H. S. Perkins, Councilor of Union Council, No. 5. All the councils of the city were well represented.

### THE SUPERVISORS.

STATE CONVENTION MEETS AT THE CHAMBER OF COMMERCE

Last Night-Business Session Today and Tomorrow-Speeches by Many of the Members of the Con-

Today, at 9 a.m., the State Super-visors' Convention will hold its first formal session in the assembly of the Chamber of Commerce, noon and evening sessions will be held today, and another morning session tomorrow. The convention will adjourn at noon tomorrow, giving the as-sembled dignitaries a chance to take

in La Fiesta.

Last evening an informal reception was given by the local Board of Su-pervisors to the visiting boards at the Chamber of Commerce. The club rooms were tastefully decorated. usual, and the refreshment table was temptingly spread with delicate sandimitable Chamber of Commerce punch. Delightful music was supplied

imitable Chamber of Commerce punch. Delightful music was supplied by a little amaieur orchestra, consisting of M. M. Harris, flutist; J. H. Brenner, planist, and Master Louis Angeloty, violinist. All the music was exceedingly well-rendered, but Master Angeloty's violin solos were wonderful for a boy of 12. The little lad plays with a depth of expression and a delicate finish that is lacking in many an older player, who is at home on the concert stage, and his technique is remarkably good.

Before adjourning to the refreshment rooms, the local and visiting dignitaries gathered in the assembly room for a few informal speeches. The guests were warmly welcomed by Chairman W. L. Woodward of the local board, who was succeeded by Supervisor E. S. Field. Mr. Field is a member of the State Executive Committee, and as such was asked to preside over the meeting last night. Chairman O. S. Henderson of San Joaquin county, also occupied a chair upon, the platform. Mr. Henderson spoke briefly upon the alms and objects of the convention, and of the pleasure of the visitors in the cordial welcome they had received. He was followed by S. F. Ayer of Santa Clara county, and John Mitchell of Alameda county, who both spoke along the same lines.

Col. H. G. Otis was then called upon by Mr. Field to give the visitors some of his views concerning the proposed

by Mr. Field to give the visitors some of his views concerning the proposed harbor at San Pedro. Col. Otis first congratulated the assembled Supervisors upon their convention, which he declared to be an excellent thing, as it afforded a chance for a conference and the interchange of ideas among men in whom was vested such im-

ments at San Pedro, beyond expressing his most emphatic conviction that the harbor would be built for the sum named to the Senate, and that the contracts would be let before the end of the year. As for the selection of the site, that was now crystallized into a law with which there was practically no danger of interference.

Secretary Alger, said Col. Otis, had been obliged to go slow with the works of the War Department for the present. He had been directly requested to do so by the Secretary of the Treasury, who begged the Secretary of War to be cautious about expenditure until there was more money in the treasury. For this reason, and because of the suit now pending before the United States Supreme Court, in which the true of the harbor site is involved, proceedings have been a little delayed, proceedings have been a little delayed, but these difficulties are only tempor-senator. Benator Benator Benator

Senator Perkins that bids will be ad-vertised for very soon.

Other speches concerning the objects of the convention were made by Chairman G. R. Holbrook of San Bernardino county, Supervisor A. E. Davis of Los Angeles, Supervisor J. S. Hanley, Chairman Sayre of Fresno county, Chairman Jenkins of Sacramento Chairman Jenkins of Sacramento county, Supervisor Morrison of Sacramento. Gen. Chairles Forman, president of the Chamber of Commerce, and Deputy District Attorney Holton.

The work laid out for today is as fol-

Organization of convention, election Horticultural Commission, 9:30; separament of charities, (a) county hospitals, (b) county farms, (c) aid for indigents outside of county institutions, 10 a.m.; county jails, boarding of prisoners, etc., 11 a.m.; district health officers and veterinary work, 11:30 a.m.; adjournment, 12 o'clock

Recondido's contribution to La Fiesta is 300 pounds of live rattlesnakes. These reptiles are for private exhibition, and are not intended to compete with the snakes caused by

A gentleman named Rohrer of Red-lands has gone to Washington a "roaring" to be made Consul-General at Honolulu. Mr. Rohrer will probably roar louder on his return from the cap ital than he does now.

A lot of locomotive engineers at San Diego have pooled their savings with which they are planting a sixty-acre tract to lemons and grape fruit at Tia Juana. Here is an example that some of the Los Angeles railway men might

The irrigating season has commence in Orange county and it is now almost an every-day affair to hear of the child of some rancher having fallen into an irrigation canal. People living along the canals should corral their youngsters or provide them with cork jack

From the frequency of the visits of Southern Pacific officials to San Pedro in these latter days, it may be inferred that the men who control the octopus have arrived at the conclusion that the Southern Pacific Company has some interests in the deep-sea harbor after all that need looking after.

Riverside has just celebrated the twenty-fifth anniversary of the found-ing of the first church in that city. The eld ploneers embraced the opportunity to get together to swap reminiscences of the good old times when everybody was plous and frost never put chil-blains on a Riverside orange. In those halcyon days there weren't any or-

They evidently have an old-fashioned set of City Trustees in Pomona. The Southern Pacific Company gave a bond in the sum of \$10,000 to guarantee that the road between Pomona and Riveraide would be in operation by May 11 next. The company has done nothing whatever to show a disposition to keep its agreement, and now the Trustees think that bend was made for some purpose, while the company will undentitedly fry to convince them that it was simply a huge loke. It would be a jake which the whole State would appreciate if the Trustees of Pomona had sufficient backbone to compel the road for once to keep a pledge and had for once to keep a pledge, and, to tell the truth, it looks as though that was the kind of a Board of Trustees they

## JIM HALL AGAIN

He is Bound Over to Stand Trial for the Marlborough Burglary.

James Hall, the negro burglar who the Marlborough School Twenty-third street two weks ago and carried away a lot of valuable jewelry was arraigned in Judge Owens's court yesterday and bound over for trial in the sum \$1500.

After the commission of the crime, it will be remembered, Hall managed to elude the police and was well on his way out of the country when overhauled at Sacramento and returned here.

returned

Triends of Sir John Will Bid Him
Goodbye Today.

John F. Francis and Mrs. Francis, accompanied by the Very Rey. Joachim Adam, vicar-general of the diocese of Monterey and Los Angeles, will depart this morning via the Santa Fé on a trip to Europe, intending to spend about a year abroad. Their many friends have arranged to bid them bon office of the Evening Express and march in procession to the Santa Fé made by C. D. Willard and others.

The City's Population.

The returns of the census ors are being corrections.

The returns of the census enumerators are being corrected, verified and tabulated by the clerks and carriers in the postoffice, and there is every reason to believe that the result will be reasonably accurate. Errors so far detected by the carriers are errors of omission and not of duplication, and the total will be somewhat less than the actual population of the city. The tabulation yesterday, showed 72 422 names to which are to be added the 14.000 names obtained during the day. The enumerators have two more days work in sight, and if the average number of mannes obtained holds good, the result will show about 100,000 inhabitants in Los Abgeles.

Tried to Stop a Runaway.

August Brandon, a rancher, was knocked down and run over by a fright-ened team on Washington street near Western avenue at 10 o'clock yesterday forencon. He made the old mistake of Jumping. In front of a runaway team. At the Receiving Haspital, where Police Surgeon Hagan dressed his wounds, Brandon-was found to have sustained a number of cuts and bruises of a serious natura. One of his shoulders was badly wrenched and it is not unlikely that the will lose his left aye.

A Commencement Speaker.

Arthur G. Van Gorder of Los Angeles as been appointed as one of the speak has been appointed as one of the speakers at the commencement exercises of the University of California, which will be held May 12 in Berkeley. Mr. Van Gorder is a graduate of the Los Angeles Normal School. He taught for several years in the science department of the Los Angeles High School. During the past year he has been at Berkeley, finishing his course in the Gollege of Chemistry. There are two hundred members in the class, and Mr. Van Gorder is one of two to be chosen as a commencement speaker.

Chose Imprisonment.

James Barrett, the first violator of the Almes barrett, the first violator of the anti-expectoration ordinance; who was arrested on Friday last, was in the Police Court vesterday given his choice between paying a fine of \$2 and serving two days in the City Jail. Strangely snough he chose the latter punishment. The prisoner is a brother of Addt.-Gen. Barrett and has been on a spree for some time.

# FIRE-DANCE REHEARSAL

INDIANS ARRIVE TO TAKE PART

Hundred Indians Gathered from A Reception by Candle-Light.

The picked Indians of all the triber f Southern California arrived in the

There was an Indian fire dance in the heart of Los Angeles last night. In a dingy old barn near the corner of Second and Vine streets, lit only by the flicker of a few candles, fifty old Indians danced the tataweela, the patada, and other ancient dances, which are well-nigh forgotten nowadays, and seldom seen by white men. Late yesterday afternoon the band of Indians reached Los Angeles after a three days' trip overland from Temecula. There were Indians from Mesa, Grande, La Jolla, Soboba, Morongo, Rincon, Pachango, and the desert reservations, with "Bill' Dyche, George Rosso and Henry Nelson at their head. Cimirman Harry W. Patton of the Flesta Committee on Indians received the travelers and housed them in a big barn; around which was vacant land where they could tether their herd of fifty ponies and build their campfires. There was an Indian fire dance in

barn; around which was Vacant land where they could tether their herd of fifty ponies and build their campfires.

After they had finished their supper, the Indians offered to display some of their dances for the benefit of the half-dozen Americans gathered to see them. As a prelimnary, Eduardo Hich-mi-yah, a corpulent Indian, with an India-rubber outside, displayed his remarkable faculty of blowing up his stomach to about three times its ordinary size.

Aff was ready for the dance, José Luis Alvafies, the "achesarra," or medicine man, who can bring rain or fair weather at will, cleared a space on the barn floor. The squaws gathered together, and commenced high-prehed monotonous chant in time to the shaking of the sacred rattle by Juan Pedro Lachappa, an aged Indian from Mesa Grande. There was a few short, quick howls from the men, then Sylvester Pop-a-chunk, ex-chief of the Cahuillas, who claims to be the best Indian dancer in California, sprang into the center of the circle. Round and round he whirled, his head-dress of eagle feathers and wild-cat fur flying in the air, his kilt of eagle feathers swirling round him, his bare feet beating the floor in unchanging rhythm. The chief is a man of 60 years, and he had traveled a long way yesterday, but he whirled round and round with unabated vigor until he had circled the vacant space a dozen times.

Then came the fire dance—without war paint, without costumes, with only a dim candle instead of a crackling wood fire—but danced with a child's eagerness and enthusiasm, and uncouth and barbaric as one could dream. Elbow to elbow, all half-bent over, men and worn circled the fire with a strange, sidelike motion, always in perfect, time with the shrill chanting of the older squaws, and the whir of the rattle. At last the whole circle crouched down, and leaning over the candle, kneeled as if in adoration of the flame. Then, with a breath, the fire was out and the dance was over. The patada followed, and José Burro, chiefed his widest to prove that he and not Sylvester Pop

champion dancer of the California Indians.

After searching all the Indian reservations of Southern California, Mr. Patton satisfied himself that it is only the older Indians who can dance the tataweels, the patada, and the other ancient dances. The young bucks and squaws do not even try to learn to dance and Mr. Patton says that with the death of the present generation the old ceremonies will be gone forever.

By noon today there will be a hundred Indians in Los Angeles. All of them, except three or four little children, are of middle age or elder. They will attire themselves in war-paint and feathers this afternoon, and at 2 p.m., in the flesta tribunes, they will give their ancient dances. Again at 3 p.m., they will dance at the tribune, giving ceremonies which have never before been seen in Los Angeles, and dances no white man has seen except on the reservations.

For the rest of the week they will be

Richard Morse, a fruit peddler 19 years of age, was brought before United States Commissioner Van Dyke in the United States Circuit Court yesin the United States Circuit Court yesterday afternoon for examination. Morse is charged by Postoffice Inspector H. P. Thrail of San Francisco with obtaining a money order for \$25, made payable to Fred W. Appleby, from the general delivery and forging same. Morse acknowledged yesterday afternoon that he had signed the name of Appleby to the money order and obtained the money therefor, but adhers to the antique story of doing so at the request of an unknown party, to whom he claims he gave the money. Inspector Thrail will apply for an order of removal this morning, when Morse will be taken back to San Francisco.

# .Furnishing Goods.

There are few people in Los Angeles who do not know our Furnishing Goods Department. To these few we want to say a word, and if possible, induce them to come and investigate. In the first place, the amount of stock carried is fully twice as large as that of the largest furnishers. By being represented in New York City by a competent buyer all the year round, we are enabled to show the latest styles within a week from the time they appear in the New York City stores. Eastern Prices rule here on every article we sell. The department is under the management of the well-known haberdasher, W. G. Hambright, which fact assures you of being served by an expert. Just now we have on Special Sale, Men's Shirts of fancy colors, both soft and laundered bosoms, at 50c, 75c, and \$1.00. Underwear at 25c, 50c, 75c and \$1.00, and so on up to garments at \$2.00 each. Men's Half Hose, 10c, 15c and 25c, which are worth a third more. Neckwear in an endless variety at popular prices. You should, in justice to yourself, make a visit to this department before you decide where to make your spring purchases, being assured of polite and fair treatment whether you wish to buy or only look.

See our famous Fiesta Window Displays that are attracting such widespread attention.

**36666666666** 

**EEEEEEEEEE** The dinner given last evening by Lieut and Mrs. Randolph Miner at their residence on Scarff street in honor The dinner given last evening by Lieut. and Mrs. Randolph Miner at their residence on Scarff street in honor of Dr. and Mrs. Charles B. Parker of Cleveland, was a very elegant affair. The decorations, which were planned by the hostess, were distinctly original, and at the same time exceptionally beautiful. Over the table, and exactly of the same dimensions, was erected a bamboo framework, thickly interwoven with the vine and pendent blossoms of the white and purple wisteria, Japan's April flower, forming a picturesque fac simile of the wisteria tea-house at Kamaido. The framework was raised three feet above the table and supported at the corners by bamboo rods. Within, gleams of soft light shone from small rose and violet-tinted lanterns, lighted by electricity, and over each place was suspended a long, narrow Japanese card bearing the guest's name translated into genuine Japanese. The centerpiece was a long oval mirror, cleverly representing a lake, in the center of which was reproduced one of the little islands in Lake Biwa, with a tiny tea-house, temple and gate hidden among its foliage. On one side floated a salling sampan and on the other a house sampan, while from the bank about the margin sprang tiny bamboo trees and asparagus ferns, among which were set clusters of fruit blossoms representing miniature orchards. At either end of the lake were tall temple gates of red lacquer. At each lady's place was a souvenir in the form of a Japanese morning-glory hair pin. The menu, which included thirteen courses, was served on rare Japanese ware, and the scheme of the affair was carried out in various ways, the "tal" being served with "shoy" and eaten with chop sticks and "sak!" being offered in the proper native fashion. Besides the guests of honor, there were present Mr. and Mrs. J. C. Drake, Miss Waddilove, Messrs. James Parker and A. H. Wilcox.

Mr. and Mrs. Frank S. Hicks gave a box party at the Orpheum last evening,

Mr. and Mrs. Frank S. Hicks gave a box party at the Orpheum last evening, followed by a Dutch supper at the Palace, in honor of Miss Alice Hager of San Francisco. The other guests were: Mr. and Mrs. O. W. Childs, Mr. and Mrs. Richard Blaisdell, Miss Scott, Messrs. Nat Wilshire, W. C. Porter and Dr. F. K. Ainsworth.

Miss Manley of Boyle avenue gave a flesta whist party last evening in honor of Miss Frances Thornton of Fond du Lac, Wis. Mmes. G. W. Simonton, H. D. Smith and J. Manley assisted. The rooms were effectively decorated with quantities of flesta bunting, flags and pennants, with flowers repeating the same colors massed about the mantels. The tally cards were decorated in popples, done in water color and tied with flesta ribbons. The games were followed by a supper, for which Reynolds catered. The lady's first prize, a flesta spoon, was won by Miss Blanchard, and the consolation, a flesta programme, by Miss Cates. The gentleard, and the consolation, a flesta pro-gramme, by Miss Cates. The gentle-man's first, a silver. brush, was won by Mr. Penning, and the consolation, a fiesta horn filled with bonbons and wrapped as a tamale, was bestowed upon Miss Minkler, who took a gentleman's place.

The guests were: Mesdames— Dieterle, L. A. Horton, U. R. Harris, S. P. Mahan. W. L. Webb, H. D. Smith, John Splane, G. W. Simonton, E. H. Penning, Percy Clark, Thornton

Mr. and Mrs. Herman F. Vollmer gave a large whist party last evening at their residence on West Washington street, in celebration of the twelfth anniversary of their wedding. The pretty rooms were thrown together and artistically decorated in flesta colors, carried out in quantities of red roses and carnations, yellow acacia and marguerites, English ivy, papyrus and smilax. In the wide doorways swung portieres of either pepper sprays or smilax, and in a cosy corner of the hall was the punch table, surrounded by feathery masses of wild mustard. The games were followed by an elaborate supper, and during the evening Miss Kent rendered several piano solos. The lady's first prize was a cutglass olive dish and the second a silver-mounted ivory note-book. The ver-mounted ivory note-book. The ver-mounted ivory note-book. The gentleman's first was a pipe-rack of pottery ornamented with monk's heads, and the second, a silver pocket-pencil. The consolations were a fiesta feather duster and a pair of black un-dressed kids. The guests were: Mesdames— Fred Thompson. Fred Boynton

A special dispatch from San Francisco says: Miss Minnie Bradbury of Los Angeles was married in that city yesterday morning to Issac Hilliard Polk, who has for several years been managing the interests of Col. Bradbury in Mexico. The wedding ceremony took place at the temporary residence of the bride's mother. Mrs. S. M. Bradbury, No. 1132 O'Farrell street, Rev. Father McSweeney of St. Francis de Sales church, Oakland, officiating. At the request of the bride the function was entirely private, only a few intimate friends and relatives being present. The house was beautifully decorated with Easter lilles, roses and ferns.

being present. The house was beautifully decorated with Easter lilles, roses and ferns.

James Winston of Los Angeles, brother-in-law of the bride, acted as best man, and the Misses Louise Bradbury and Mary Verdon as bridesmaids. The Misses Marion and Louise Winston, nieces of the bride, gowned as flower girls, led the wedding party to a bay window, where the ceremony took place. After the dainty wedding breakfast was served the couple left the house for the Palace Hotel. They started last night on an extended trip, and before returning to their home in Los Angeles will visit several eastern cities.

Miss Bradbury and Mr. Polk have been engaged for several months. Owing to the presence of the bride's mother and several relatives in San Francisco, it was decided that the wedding should take place there.

wedding should take place there.

Mrs. J. S. Briggs gave a large euchre party last evening at the Richelieu on Grand avenue in honor of Mrs. E. S. Reynolds and E. B. Reynolds of South Bend, Ind. She was assisted by Mmes. Ben E. Ward, O. C. Whitney, F. J. Hart and H. H. Metcalf. The front drawing room was decorated with a profusion of red and yellow roses, asparagus ferns, smilax, wild grasses and satin ribbons in fiesta colors. The other two rooms were filled with sweet peas and camations. The prizes were all in decorated china, the lady's first being a tra-pot and the second a fruit tray. The gentlemen's were an ink-well and pen-tray and a coffee cup and saucer. An elaborate supperserved under the direction of Christopher, followed the games.

"Money to Burn."

LOS ANGELES, April 13. — [To the Editor of The Times:] As a member of the League for Better City Government, and one who helps pay the taxes for running the city government, I have read the newspaper accounts of the meeting of our Board of Education last Monday evening with a very tired feeling, and wonder what has become of the League for Better City Government, anyway. Isn't it about time the league required an account of their stewardship from some of the members of the board who received the indorsement of the league and the vote of its members? They rushed around to get their "Money to Burn."

board who received the indorsement of the league and the vote of its members? They rushed around to get their names on the primary ballot, those regular nominees of the old parties, but seem to have no use for the organization now they have got in.

To be sure, Mr. Webb of the Ninth took the first opportunity after organization of the new board to state that he "was not elected by the league, and would have been elected without their support." This was very kind of him, and we shall all remember he does not desire our votes if he receives the regular party nomination for Councilman of his ward at the next city election, for the league will not be dead then, though it seems to be hibernating at present. Messrs. Bartlett and Webb were very vociferous in their accusations against Harper & Reynolds, but it is very singular that H. & R. could charge 100 per cent. in excess of the face of a binding contract, and the board have no recourse but to meekly submit and audit such claims.

It seems that, in self-defense, they were obliged to so use the traver.

The celebrated Prof. Agassiz, when offered a higher salary if he would remove to another position than the one he was so laboriously and faithfully filling, replied: "I cannot afford to waste my time making money."

At the time of the death of Prof. Sherbes of the Jardin des Plantes, Paris, in 1878, he was the owner of a collection of \$20 dried human heads, the whole representing every known race of people on the globe.

The most curious, as well as one of the rarest books known to collectors is the edition of the "Yulgate" issued by the Pope Sixtus V, some time between 1885 and 1890. The book, as Disraell describes it, "fairly swarmed with errata." So numerous were they that a number of printed paper slips containing the proper words were pasted over the blunders, and, this device proving ineffectual on account of the immense number of mistakes, as many of the coples as could be found were called in and destroyed. Only a few remain, and the book with its paper patches, commands an extremely high price.

The organ of the schoolmaster, the Allgemeine Deutsche Lehrerzeltung, relates an episode of Kaiser Wilhelm's visit to Wiesbaden. When he was riding along the Taunus strasse at the head of his suite on Monday, a small boy ran after him and cried out as he frantically waved his cap. "Herr Kaiser, Herr Kaiser, get us a holiday tomorrow!" The Emperor laughed, and, with a friendly wink to the lad, called out: "We shall manage it." Accordingly on the next day all the lads and lassies of the town were informed that the day was "schulfrel," and wherever the Kaiser appeared he was naturally greeted as a liberator, with the full power of youthful lungs.

This report was prepared by order of the Council, at a cost of about \$1500. When it was comthe Council deposited it under lock and key in the vault of the City Clerk, with the purpose of keeping it secret pending the negotiations for the pur-chase of the present plant of the City Water Company. The Council yesterday suddenly called for the report, and unexpectedly ordered it filed, without regard to the method of procedure decided upon by the Waterworks Com-

Engineer Dockweiler's repor which is based upon an entirely new system, is here given in full.

LOS ANGELES, Cal., March 30, 1897. To the Honorable Council of the City of Los Angeles—Gentlemen: In com-pliance with your instructions of Janu-ary 20, 1897, which are as follows: "You are instructed to prepare an approxi-mate estimate of the cost of a complete mate estimate of the cost of a complete waterworks for the entire city, using the Los Angeles River as a source of water supply, diverting the water therefrom at the points indicated in your report of December 21, 1891, and present the same to the City Council at the earliest possible date," I have the honor to submit the following re-

The plans and specifications and estimates accompanying this report have been compiled mostly upon data fur-nished from the records of the City Engineer's office. Some special surveys and personal investigations as regards certain local conditions were deemed necessary to supply needed information for the purpose of submitting a water-supply system for the city of Los An-geles as carefully and correctly as the limit of time and the purposes of a preliminary plan would admit. The plans liminary plan would admit. The plans submitted, however, go somewhat be-yond the scope of dealing with the problem only, but embrace a number of details of the more important and costly features of such a large under-taking, alike of importance as re-gards the engineering features as well as the municipal advantages to be de-vived therefrom.

rived therefrom.

The plans submitted herewith illustrate, on drawing No. 1, a general distribution plan, showing the sources of supply, the storage reservoirs and pipe systems, which latter embrace almost every street within the city limits; also a condensed, tabulated summary of quantities relating to water supply, number of pipes, etc.

On drawing No. 2 a situation plan of the infiltration gallery of the head-

such galleries.
On drawing No. 3 a situation plan to Crystal Springs, showing our source is supply at this place, together with detailed construction plans of main conduits, gate-houses, pipe-lines, etc.
On drawing No. 4 is illustrated the general storage system located in Elysian Park, and the power plant appertaining thereto.

pertaining thereto.
On drawing No. 5 a plan and pro-

file of the proposed new reservoir hereinafter to be designated as the high-level reservoir.

On drawing No. 6 is shown the proposed subdivision of the city area into three distinct water-service systems. three distinct water-service systems.

This is an auxiliary to drawing No. 1.

The pipe system within the city limits, as submitted, in connection with these general plans has been somewhat elab-

as submitted, in connection with these general plans has been somewhat elaborately detailed and is illustrated in the accompanying bound volume No. 7, embracing on eighty section sheets, with index map, every pipe line, fitting and special, together with size and length of such pipe lines, the area of city sections, number of population, etc.

The calculations necessary to evolve this system, together with the detailed estimates, are herewith submitted in books 8, 9, 10, 11 and 12. A set of specifications is appended, which specifications, while not intending to coverevery item which contractors will eventually be called upon to furnish, are mainly designed to outline in general the several features of which these works will consist, and to indicate the standard of all requirements connected therewith.

While not claiming to present to you a perfected plan, correctly and carefully worked out in every one of the numerous details incident to such a arge problem, nevertheless the matter resented herein will suffice to give you clear idea of the problem before us, with the assurance that if adopted and arried out on the line suggested, in abundance of wholesome, clear and oure water would be delivered contantly in the households, together with liberal distribution of public fire hysitants under adequate pressure; and such water supply system can be obtained for the estimate hereinafter ubmitted.

AREA TO BE SUPPLIED WITH WA-TER.

The city limits inclose a very large

The city limits inclose a very large area to deal with, made exceptionally difficult on account of the broken and undulating surface interspersed with isolated hills and ridges. The extreme length, north and south, is eight and two-thirds miles; while the extreme width, east and west, is six and one-half miles.

There is within the city limits a total area of 25,584 acres, or nearly forty square miles, of which amount a total of 22,524 acres can be supplied with water, or 88.16 per cent. of the entire city can be reached by the proposed city water-supply system.

This blank area of 3024 acres comprises mostly Elysian Park, portions of Highlands, and also certain highly-elevated and isolated sections on the east side of the Los Angeles River. Some of these hills have an altitude of overeight hundred feet above our source of supply, the elevations of different sections of the city ranging from 130 to over 800 feet.

The additional expense to be incurred in order to raise a moderately large body of water to such a height is so

The additional expense to be incurred in order to raise a moderately large body of water to such a height is so great, and the beneficial results obtained thereby so disproportionate to the results obtained by the other portions of the city, that these sections have not been included in the general distribution plan; but the small amount of water required for this territory during the next twenty or thirty years may be furnished by isolated, inexpensive district pumping plants, which may easily draw their supply by tapping the nearest main.

The difficulties as presented to engineers in devising a simple, ample and efficient water-works system for a city of such large extent as Los Angeles, together with the undulating topography of the same, and the desire to reduce the initial cost and eventual running expense to a possible minimum, are somewhat better realized by a comparison of the needed requirements for Los Angeles and the established works of other cities.

The city of Paris, France, covers an area of thirty source miles, against

Los Angeles and the established works of other cities.

The city of Paris, France, covers an area of thirty square miles, against forty square miles in Los Angeles; the former has a population of 116 per acre, while Los Angeles has at present but 3.92, and cannot reasonably be expected to increase this population to more than 10 per acre within the next fitteen or twenty years.

The city of Paris contains 582 miles of streets, while Los Angeles has now 155 miles of graded streets and a total of a little over 500 miles of graded and ungraded streets.

ungraded streets.

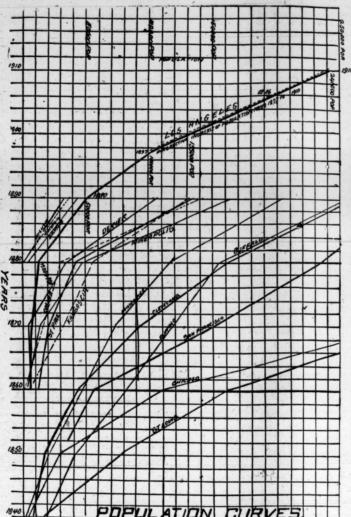

The city of Paris has an ample daily supply of 82,000,000 gailons for a population of over 2,250,000 inhabitants, while Los Angeles uses not less than 16,000,000 gailons per day with 100,000 inhabitants. QUANTITY OF WATER REQUIRED.

The first factor in the designing of a water supply is to determine what quantity of water will be required adequate for its present and prospective uses. The practice generally is to obtain statistics from cities already supplied and to reduce these to a general average applicable to the case at hand. No better reasons to provide for a plentiful supply have ever been given in short and concise form than the opening statement in Engineer William J. McAlpine's memoir on the subject of supplying the city of San Francisco with water, where he set forth that: "A public water supply to a city should have sources adequate not only for the present demands for domestic uses, for manufactories, for public baths, for fountains and irrigation of private and public grounds, for sprinkling the streets and flushing the sewers, and for the quick extinguishment of fires, but also for all of these purposes when the population shall have been trebled, and in addition thereto, with the means of extending the works at a future time, in conformity with some general plan, which, while adapted to a supply for the present, will permit of the future extension above indicated with the least loss of the first expenditure."

In order to make comparisons between this and other cities for the purpose of determining the average daily consumption per capita, the area, the number of inhabitants, the probable increase of population and increase of manufacturing and commercial enterprises is the first item to be considered. On the appended sheet is illustrated diagramatically the so-called population curve of a number of cities compiled from the United States census. The cities of San Francisco, Buffalo, Cleveland, Milwaukee, Kanase City, St. Faul, Omaha, Denver and Los. The first factor in the designing of water supply is to determine what

Angeles show essentially the same curve, that is, the same ratio of increase of yearly population.

Estimating the present population of Los Angeles to be approximately 100,-000, a proportionate increase by the population curve of Los Angeles would thereby indicate the following number of inhabitants: In 1897, 100,-000; in 1900, 132,000; in 1902, 155,000;

U S. CENSUS.

-SHOWS INCREASE OF POPULATION OF THE CITY OF LOS ANGELES

FROM 1860 TO 1897. SHOWS PROSPECTIVE INCREASE OF POPULATION OF THE CITY OF LOS ANGELES FROM 1897 TO 1910

cipating thereby the needed wants, actual requirements, and increased facilities for handling, storing and distributing potable water, attention is called to the Manuel of American Waterworks where statistics gathered on these lines show a natural average increase of 98 per cent. In population between the years 1880 and 1890 in a group of seven Southwestern States, inclusive of California.

Following the best practice of hydraulic engineering, a maximum consumption of 200 gallons per day of twenty-four hours has been made the basis of distribution plan for domestic consumption. Census statistics as regards the approximate daily consumption of water in American cities having well arranged and maintained systems of water supply, invariably point to the fact so concisely and pointedly expressed by J. T. Fanning, civil engineer, that "the legitimate use of water is steadily being popularized, calling for an increased average in the amount of household appratus, increased facilities for garden irrigation, increased street areas moistened in the dusty seasons and increased waste of water." This fact as well as certain local conditions, inapplicable to eastern cities, especially our long rainless seasons, large areas used for lawns, requiring daily sprinkling of water, and a probable increase of manufacturing firms, were conducive to fixing upon a daily supply of 200 gallons per inhabitant for daily domestic consumption.

In addition to the above, an ample reserve of water for fire extinguishment service has been taken into constituents. The receivility of two of the consumption of the short of the service has been taken into constituents. The receivility of two of the consumption of the short of the short of the short of the service has been taken into constituents. The receivility of two of the consumption of the short of th

daily domestic consumption.

In addition to the above, an ample reserve of water for fire extinguishment service has been taken into consideration. The possibility of two or three fires in progress at the same time necessitates the precautionary means of storing and delivering, when wanted, a quantity of water equalling 12 to 15 hydrant streams for each fire, which would therefore require approximately for this purpose alone from 500 to 1000 cubic feet of water per minute. The figures thus obtained enable us to fix the demand for the city as follows: 241,000 population at 200 gallons per day equals 48,200,000 gallons, add reserve for fire extinguishment, 3,000,000; added to this amount must be the supply at present furnished by the old Canal and Reservoir Company ditch, which ditch, deriving its source of supply from the Los Angeles River, will henceforth be deprived of its usefulness and will have to be replaced to some extent by the proposed new conduit. Necessary for this latter purpose would be a daily continuous flow of water aggregating approximately 7,000,000 gallons.

These quantities give a total demand upon our source of supply of 58,200,000

of water aggregating approximately 7,000,000 gallons.

These quantities give a total demand upon our source of supply of 58,200,000 gallons continuous flow for twenty-four hours, or ninety cubic feet per second, of which amount 48,200,000 gallons daily are subject to reservoir storage and distribution through the pipe system for domestic service, leaving 3,000,000 gallons to be held in storage for fire extinguishment, subject to a ten hours draft for three simultaneous fires, and 7,000,000 gallons for irrigation purposes.

This estimated maximum quantity of 48,200,000 gallons needed for the probable maximum increase from the present 100,000 inhabitants to 241,000 within the next thirteen years can be reduced

ant 100,000 inhabitants to 241,000 within the next thirteen years can be reduced to probably one-half this amount by the proper use of meters placed in connection with each service pipe.

Statistics show that the quantity of water actually used for domestic and manufacturing purposes bears to the quantity of water wasted, in some instances, a proportion of 1 to 8. In cities like Brooklyn, N. Y., where seemingly ample provisions have been made for a water supply and at a large cost, the liberal supply offered to the population induced a liberal use of this

1905, 186,000; in 1908, 220,000; in 1910, 241,000 inhabitants. This latter gure has been made the basis of calculation as regards the number of people to be served by the system.

For the purpose of illustrating the importance of providing liberally for an increase of population and anticipating thereby the needed wants, actual requirements, and increased facilities for handling, storing and distributing potable water, attention is tributing potable water, attention is called to the Manuel of American

head.

The estimate presented to you at the end of this report, under the heading of present requirements, includes an item for 10,000 meters.

In line with the experience of other cities as warmends the sheeling necessity.

In line with the experience of other cities as regards the absolute necessity for regulating the water consumption by meters, the following facts as gathered from the forty-ninth annual report of the Board of Water Commissioners for the city of Detroit are presented. Records kept in that city as regards the daily consumption of water perfamily showed an averagfe yearly increase of 12.86 per cent. during the time of unmetered supply. In the year 1853 but 70.87 gallons per family were required against 390.1 gallons per family in 1888. In the following year metering was commenced, which resulted in a steady decrease from 390.1 in 1888 to 273.48 in 1894.

As the extra supply had to be furnished by the means of pumping machinery the expense amount for operating the works shows some very instructive figures: A comparative statement of consumption and operating expenses show the advantage of water regulation as follows: In 1888 with 225 miles of pipes against 496 miles in 1894, the actual operating expenses in 1888 were \$92.402.59 for a population of 194.

miles or pipes against 400 miles in 1884, the actual operating expenses in 1888 were \$92,402.59 for a population of 194,996 against \$93,025.22 with a population of 258,834, or summarized, in six years the population increased by nearly 64,000 or 34.63 per cent., while the operating expenses under the meter system increased but \$622.63 or two-thirds of 1 per cent., and consumption per capita was reduced from 204 gallons to 1

ita was reduced from 204 gallons to 144 gallons.

Ninety-five per cent. of those metered pay less than under the assessment plan, and while the receipts were thus reduced, at the same time the expenditure for operation and construction is so largely kept down as to more than double, yes, treble the expense of the meters.

Finally, as of special interest to water rate payers, this fact is presented in connection with the experience made in the city of Detroit, that the former general yearly average water rate per family was reduced from \$10.21 in 1885 to \$9.36 in 1895; in 1891 the hose tax was abated and meter rates reduced to one-third of a cent per 100 gallons, and that these reductions in rates saved to the water rate payers in 1894 \$90.573 and still the resources are sufficient to pay all expenditures for operation and construction and certain portion of its bonded interest.

In the report of the City Engineer of

the city of Providence, R. I., for the year ending December 31, 1893, under the water statistics, we find that there are used in that city 12,088 meters on 17,417 service pipes, with an actual total consumption of 524 gallons per service pipe, or a total supply of 9,126,500 gallons with a city population of 160,700.

gallons with a city population of 160,700.

Applying these figures to our estimated probable population of 241,000 in
the year 1910, and even allowing for Los
Angeles an increase of seventy-six gallons per service pipe, making a total of
600 gallons of daily consumption per
service pipe, we find that eventually,
after introducing a system of metering,
the estimated daily consumption can
thereby be reduced to one-half of the
estimated 48,200,000 gallons, or in other
words, this proposed water-supply system with a capacity of 48,200,000 for
domestic supply, together with the regserve of 3,000,000 for fire extinguishment, can, under the meter plan, do
duty for a population of 482,000.

A collection of data from the various
water works in the United States gives,
in connection with this subject matter,
some very startling and instructive results.

The cities of Denyer and Buffale head

The cities of Denver and Buffalo head the list, consuming 285 and 271 gallons, respectively, per day per inhabitant, with no meter registration on the taps; while the city of Atlanta, Ga., with \$2.6 per cent. of all taps metered, requires but thirty-six gallons per day per inhabitant, thereby illustrating conclusively the commercial value of the use of meters in connection with water works, and the unjustified waste of water with unmetered taps.

All places with a high consumption have but a few or no meters, and in no department of water-works construction or management, it seems safe to say, is there a greater chance for improvement and economy than in connection with an increased use of me-The cities of Denver and Buffalo head

The following list of foreign cities is

Daily consumption imperial gals. Supply, per Supply, suppl

Col. George E. Waring states in report upon the anticipated water tamine in Brooklyn, under date of February 6, 1897, and touching upon the question of waste, that "the simple rutuh is, Brooklyn has in the works on which it is now depending water enough to last for every possible use for so many years to come that there is now no need even to consider a further source of supply."

"The millions it is proposed to spend to get more water may be saved by a proper application of relatively insignated that thousands to the prevention of waste." And further on, referring to the needs of English cities as supplied under meter systems, Mr. Waring states that "in 1881 the Liverpool water works engineer (J. Parry) reported that the average rate of consumption for all purposes was twenty-three imperial gallons" (equivalent to 27½ United States gallons.) He says "There is probably no modern city in which the legitimate demand for water and the facilities for using it are greater than in Liverpool. Public baths and washhouses are provided to a larger extent than in any any city in the country; public drinking fountains are numerous and water is freely used in flushing sewers and drains and in street sprinkling."

Ernest Collins, C. E., demonstrates in connection with English cities that, upon the establishment of meters and regulators, the daily waste would be

ling also calls for a large percentage of additional supply to be considered in the per capita amount. At present there are used about 1,200,000 gallons per day for street-sprinkling, covering about 155 miles of streets. In order to effectually sprinkle all streets subject to this pipe system within the city area, a daily supply of approximately 3,500,000 gallons must be provided. This item, regarded from the side of the expense account, would remain the same per mile whether adjoining properties are eventually more thickly built up or not than at the present time.

The item of furnishing water for flushing sewers has to be regarded as a standard demand upon our works, on account of flush tanks depending entirely for their supply upon the water mains, and this item is therefore to be considered in the measurement for a per capital cularity as the flushing will per capita quantity, as the flushing will

considered in the measurement for a per capita quantity, as the flushing will necessitate a daily draft upon our works. The present sewer system requires 400,000 gallons per day for flushing by means of 430 flush tanks, which are now in use, which number will be enlarged with the increase of graded and paved streets.

To recapitulate the quantities which make up a total of the estimated 200 gallons per day per inhabitant, we have to supply wasteful consumers during long rainless reasons; to provide for probable increased manufacturing demand, to supply large sections of the city with water for lawn purposes, to allow for a liberal supply in sprinkling our streets and to flush our gutters and sewers, which total demand cannot be met with less than 200 gallons per day per inhabitant, under presented unmetered conditions. ered conditions.

Incidetnally the benefits arising from

a plentiful supply of water brought into the households, as well as to the fire hydrants, will reduce fre-insurance rates, and thereby produce in this indi-rect manner a large revenue to the population at large. SOURCE OF SUPPLY

The Los Angeles River carries wa ter enough to supply all future wants of the city, at all events, as far as the demand of this proposed water the demand of this proposed water supply system will have to be taken into consideration. It does not lie within the scope of this report to en-large upon the legal questions con-nected with the rights which the city nected with the rights which the city of Los Angeles possesses in reference to the flow of water above or below the bed of the Los Angeles River, but dealing principally with technical questions, we find that the main sources of supply can be obtained by placing the proposed upper headworks on land known as the Pomeroy & Hooker tract, situated about eight miles northwesterly from the city and two miles south of the town of Burbank while, an additional supply is designed to be obtained further down the river at about a point where the present Los Angels City Water Company takes its water from the river.
The numerous borings made, th

pany takes its water from the river.

The numerous borings made, the close investigations in connection therewith as regards the condition of a subterraneous flow of water beneath the bed of the river, and also the results of lately-instigated weir measurements, definitely point to the fact that at the proposed upper works a continuous average flow of sixty cubic feet per second can be relied upon, while at the lower headworks a continuous average flow of thirty cubic feet per second can be anticipated, thereby guaranteeing and making available, for the city water supply, a flow amounting to ninety cubic feet per second, of which abount 79.37 cubic feet per second are designed to furnish the requisite water for the city distribution system, leaving 10.63 cubic feet for irrigation, supplying Westlake and Echo parks on the west. and East Side and Hollenbeck parks on the east side of the Los Angeles River.

All the water to be obtained at these places, and to be conveyed to the city by means of closed conduits, is previous to its passage through these conduits, made subject to a natural system of filtration, inasmuch as it is not designed to make use of the surface flow of water, but to draw solely upon the subterranean sources, which water has gone through a natural system of filtration by means of percolation through the strata beneath and adjacent to the bed of the river.

The test borings heretofore made to determine the underground source of supply show very conclusively that a natural filter-bed, consisting of successive strata of fine river sand, medium coarse river sand. coarse red sand and sand mixed with gravel, offer the very best means of purifying percolating water through these different strata to a considerable degree from organic or inorganic impurities contained in the water; at all events, such percolation will act as a strainer and prevent the debris and silt. otherwise carried along by the river, from entering the pipe lines and reservoirs.

These test borings have also demonstrated the fact th

of four to ten feet, and extending down vertically from twenty to forty feet. It is designed to obtain the requisite amount of water by a system of inflitration galleries, as indicated in plans on drawings No. 2 and 3. These galleries are to be located on that part of the Pomeroy & Hooker tract lately condemned by the city of Los Angeles, and are designed to consist of approximately 5700 feet of main galeries with 3300 feet of laterals. The grade of the main galleries will be located from twelve to twenty-one feet below the plane of saturation, which will insure, even at time of excessive drought, an abundant supply for this waterworks system.

the water supply of San Francisco and

the water supply of san Francisco and other large cities.

I can see no reason why the water furnished your city should be of other than the best quality. It should not be forgotten that the food necessary to the life and growth of bacilli are albuminoids, together with easily oxidizable organic matter; but these are shown by the analysis to be present in comparatively minute quantities.

Again, the minimum amount of chlorine obtained, which is the measure of chloride of sodium, shows conclusively that the water is not contaminated with sewage derived from human sources. Taking all together and viewed from a chemical standpoint, this water is a poor medium for the development of bacteria.

The city of Los Angeles may be constrained on beinger the standpoint of the constraints of th

The city of Los Angeles may be congratulated as having the best of water of its kind for drinking, household and industrial purposes.

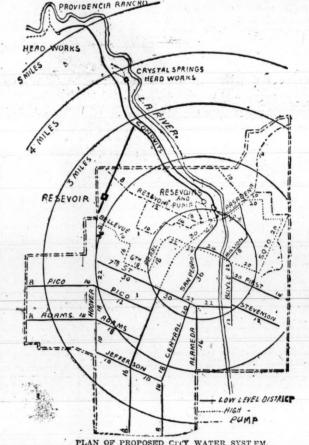

Industrial purposes.

The infiltration gallery as designed for the lower source of supply is proctically a duplicate of the Crystal Springs plant, and consists majnly of two lines of twenty-four-inch-pipe laid parallel to each other, with open joints, for a distance of approximately 5200 feet. As the main supply of a waterworks system is the keystone of the entire structure, and a partial or entire failure of such supply would peradventure disarrange such conclusions, effects and results as are being built upon the same, it is therefore of the utmost importance to know the conditions of the abundant saturation or scanty saturation of the strata and or scanty saturation of the strata and their ability to supply continuously; whether these conditions may change or even alternate (which they may with no surface indications of such results,) and whether the subterranean flow may change or be in directions entirely at variance with the surface slopes and

flow. Predictions for an ample supply of water from a given subterranean source are always extremely hazardous until a thorough knowledge is obtained of the geological position, thickness, porosity, dip and soundness of the strata. Such thorough knowledge the city has fortunately obtained by the numerous test wells sunk on the proposed headworks property, and the results thereby obtained are briefly these.
Results show that the saturation

retrically from twenty to forty feet. It is designed to obtain the requisite amount of water by a system of infiltration galleries, as indicated in plans on drawings No. 2 and 3. These gallers are to be located on that part of the Pomeroy & Hooker tract lately condemned by the city of Los Angeles, and are designed to consist of approximately 5700 feet of main galleries will be located from twelve to twenty-one feet below the plane of saturation, which will insure, even at time of excessive drought, an abundant supply for this waterworks system.

These main infiltration galleries are to consist of arched subways of 8x8 feet cross-sectional area; while the laterals are designed to consist of two lines of subterraneous pipes twenty of the subterranean water has developed its new lating water has developed water h

four inches in diameter, laid with open and artificially-guided water-ways to-

A main gatehouse at the end of these the main conduit, leading therefrom to the city, and provisions have been made by means of settling basins, waste sluices and blow-offs to make the needed repairs, intercept the sand and to control the water at this point.

The location of these galleries at the source of supply is exceedingly favorable for the installation of filter beds, cated immediately above the galleries, and the surface flow of the river could be artificially diverted toward these beds, and, percolating through the same, would enter the infiltration gal-leries purified and of the same quality as the subterranean flow of percolating

as the subterranean flow of percolating water.

In the estimates presented the cost of filter beds has not been included, as the possibility of pollution of the surface flow of water in the watershed of the San Fernando Valley above our source of supply is so remote and needs to be anticipated only in the event of the establishment of large manufacturing concerns within close range to the infiltration galleries.

Our supply will be drawn from an immense basin of underground stored water, subject to the beneficial action of a natural filtration in its course of slow travel through the porous underlying strata; will be infiltrated and conducted in closed conduits and stored for distribution in covered reservoirs, so that

ward the gallery, every drop of sur-face water within the Los Angeles River reaching the immediate vicinity find its way to the galleries, being, through its passage through the natural and artificial filter beds, deprived of most of its injurious organic matter. Summarized, the available source of supply consists of the rainfall upon the watershed north of the Crystal Springs property percolating toward the infiltration galleries and absorbed by the latter. This watershed em-braces about four hundred and fiftyeight square miles. Calculations based upon this, and the mean annual rainupon this, and the mean annual rainfall of seventeen inches, and allowing for 25 per cent. reduction for a three-years cycle of dry seasons, with but a 50 per cent. ratio of percolation, and reasonably assuming 60 per cent of this amount to be intercepted by the infiltration galleries, there would be, at the most, about three hundred square miles out of the available 458 square miles required to furnish the needed ninety cubic feet needed for this system.

DISTRIBUTION SYSTEM. No special consideration in determining and designing the distribution plan has been given to the existing pipe lines of the present waterworks, but a com-plete new system has been evolved, ex-

ater within these trunks. Briefly stated, there is designed to Briefly stated, there is designed to be a low level pipe system served by gravity flow from the two low level reservoirs, the present Buena Vista street and present new Bellevue avenue reservoirs. The main portion of the pipe system served from these reservoirs lies south of Seventh street on the west side of the Los Angeles River, and south of First street on the east side of the Los Angeles River, and south of First street on the cast side of the Los Angeles River, including all the annexed territory to the south and west. This system covers 15,515 acres with an estimated probable population of 168,600 persons, necessipopulation of 168,600 persons, necessitating for this district alone a pipe system of approximately 325 miles. These water mains have been designed of a capacity sufficient to deliver, in addition to the quantities necessary for nestic consumption, eight fire streams at two simultaneous fires at different points within this district.

points within this district.
At 200 gallons per head per day, and adding the required amount of water for fire extinguishment, it will require 35,755,000 gallons to supply its wants, or about 5518 cubic feet per second. The difference in elevation between reservoir and district varies from 80 feet to 200 feet, resulting in available pressure in the main of from 35 to 80 feet to 200 feet, resulting in available pressure in the main of from 35 to 80 feet to 200 feet, resulting in available prounds per square finch. This territory is that portion of the city lying below the 325 foot contour line.

The area between the contour lines

below the 325 foot contour line.

The area between the contour lines 225 and 375 is designated in the distribution plan as the high level service system, and will be supplied by gravity mains from a proposed new reservoir situated at an elevation of 430 feet immediately above the Buena Vista street reservoir at Elysian Park. This pipe system embraces mainly the business section of the city from Seventh street. This pipe system emoraces mainly the business section of the city from Seventh streeet north, and is provided with water mains of a sufficient capacity to furnish 15 fire streams at two fires each within its district without diminishing the supply for domestic consumption.

of diminishing the supply for domestic consumption.

This district covers 3632 acres, with the stimated population of 42,800 persons, necessitating for this district a sipe system of approximately 94 miles of pipe. At 200 gallons per head, and adding reserve for fire extinguishment, his high level system will require 10.32,000 gallons during twenty-four nours, or about 16.32 cubic feet per second. This difference in elevation setween reservoir and district will give an approximate pressure of 24 to 47 counds per square inch within the nains.

mains.

This district will, in addition to the functions rendered by the fire hydrants, essentially need the additional services of the fire department for fire extinguishment purposes. All mains are abundantly large to supply two engine streams from each hydrant, and while the proper gravity flow will not in all cases suffice to reach with sufficient force the roofs of the highest buildings within this district through a fire hose, still there will be no instance, either in this or any of the districts, where water will not find its way into any tank placed on any of the highest of the present buildings.

buildings.

That area of such portions of the city above the 375 foot contour as can be reached from its reservoir is designated as the pump service system, and will be supplied by gravity mains and will be supplied by gravity mains from a proposed pump reservoir with an elevation of 620. This system practically embraces all of the elevated portions of the northern part of the city, and is served by 78 miles ofdistributing pipes, which will cover, within this district, an area of 3379 acres, with an estimated probable population of 29,400 inhabitants. The area not reached by this system on account of high altitude embraces about int of high altitude embraces about mostly Elysian Park, hills g the river, parts of East Los and Highland Park.

The mains for the pump system are designed of a capacity sufficient to furnish water for eight fire streams to one fire in its district, in addition to the full capacity of water weather furnish water for eight fire streams to one fire in its district, in addition to the full quantity of water required for domestic consumption, aggregating 4,000,000 gallons daily for this level and approximately 126 gallons percapita. The question of pumping the water to the pump reservoir for distribution by gravity therefrom has been solved by means of locating the proposed new high level reservoir at an elevation sufficiently high so as to obtain an available head of approximately 48 feet between both.

The water supply brought from the upper headworks enters the upper reservoir, and, after delivering a sufficient quantity therein for the requirements of the pipe system connecting therewith, the remainder is designed to create the necessary power for pumping, through the agency of a turbine wheel, and then enters the low-level reservoir for distribution through this latter system. By means of this arrangement advantage has been taken of the favorable locations between the headworks and the high-level and low-level reservoirs.

The water in its flow from one part of the reservoir system to the other, not only generates approximately 150 to 200 horse power, available for pumping purposes, but the system of aeration to which the water, in its passage from one section to the other, is subjected, together with the system of filtration and sedimentation at the upper headworks previous to entering the pipe system, necessarily improves the quality of the potable water to a great extent and at no additional expense.

The power generated in this manner by means of the turbine wheel is de-

tent and at no additional expense.

The power generated in this manner by means of the turbine wheel is designed to operate a duplex power force pump of a capacity sufficient to elevate 4,000,000 gallons of water per diem to the pump reservoir. This water-power plant is alternated by a steam-power plant consisting of a battery of boilers and a Corliss engine which will take the place of the turbine wheel in case of necessity, break-downs, repairs, etc.; while the entire combination of water and steam power is again supplemented by an independent steam actuated pumping engine of 4,000,000 gallons capacity.

permented by an independent steam actuated pumping engine of 4,000,000 gallons capacity.

Either of these power plants is of sufficient capacity to supply the pump service system; can alternate with each other in doing this work; are designed to work co-jointly in case of accident to any of the reservoirs or main trunk times, or whenever any interruption in any of the pipe systems would otherwise necessitate the total or partial interruption of the water system.

Under ordinary circumstances the expenses incurred from operating the power plant by means of the turbine wheel would consist solely of wages paid to attendants, for lubricating oils and renewals to the wearing parts, breakages, etc., while only in case of emergencies, such as breakage or rehewal of reservoirs, the simultaneous interruption of a majority of the main

each level an independent reservoir and pipe service, however, arranged in such a manner that each level service does not necessarily depend upon its own resources, but can, in case of accidents to any parts therein, renewals, etc., be supplied partly or wholly by one of the other level systems, so that temporarily and simultaneous breaks, even in two out of the three main trunk pipe lines, would not interfere with the proper distribution of the water at any one point within the city.

With this end in view large circulating trunk lines occupying central positions to the entire pipe system have been made a special feature of the latter, for the purpose of supplying any portions within the city limits with sufficient water in case of any temporary withdrawal of one or the other of the distributing reservoirs.

All large trunk lines are to be paralleled by means of smaller tapping mains to supply the demand for domestic consumption, in order to enhance the life and usefulness of the large circulating trunk lines and to suard against any interruption of the flow of water within these trunks.

Briefly stated, there is designed to presented.

Draft, as shown by J. T. Fanning, C. E., is by no means uniform throughout the year, but is from 20 to 30 per cent. in excess during several consecutive weeks, 50 per cent. during several consecutive days, and not infrequently 100 per cent, in excess during several consecutive hours, in addition to an occasional heavy draft for fires. The experience of nearly every water supply shows that the main draft, aside from fire service, is at times more than double the average draft. Based upon these facts, the mains have been designed large enough to enable a tem-

these facts, the mains have been designed large enough to enable a temporary draft equaling 87 per cent. In addition to the average 200 gallons to be made upon them without overtaxing its capacity during times of the heaviest demand, except in the pump-level pipe system, where the limited supply of 4,000,000 daily did not necessitate the enlargement of the pipe system beyond the required capacity for this amount. The present pipe system of 2, 3 and 4-inch mains illustrates daily its inefficiency and want of proper delivery when drawn upon, and the absolute necessity of larger mains and plenty of water.

water.

The present power plant, in connection with the Buena Vista-street reservoir, is provided with a Pelton wheel, which does duty now for pumping water. In the event of incorporating part of the present system into the proposed new system this particular feature is designed to furnish the power for generating electricity for the purfor generating electricity for the pur-pose of illuminating the new central power station, and also to furnish the tric motors the gates and valves in the different gate-houses, and also such large gates as are distributed within the city limits in connection with the system and are designated as emergency valves, which latter are placed

the city limits in connection with the system and are designated as emergency valves, which latter are placed at certain convenient places so as to make the different pipe systems interchangeable and intercommunicative with each other, thereby enabling the superintendent at the central station to practically control the entire system automatically from this point.

The running expenses of this plant would, as in the case of the power plant, be reduced to the cost of attendants, olis and renewals. The main feature in the location and assembling of the reservoirs, power plant, direction and alignment of the main trunk pipe lines leading therefrom, which has been striven to arrive at, is a concentration of the vital parts of this system into one central station, from which place out the entire pipe system from the headworks down to the outskirts of the city limits can be operated and systematically controlled.

The series of reservoirs comprising this system will consist of the present Buena-Vista-street reservoir, with a storage of 14,000,000 gallons; the present new Bellevue reservoir, with a storage of 14,000,000 gallons; the proposed highlevel reservoir, with a storage of 17,500,000 gallons, and the proposed pump reservoir, with 4,000,000 gallons capacity, making a total of 76,500,000 gallons, equal to one and one-half day's maximum supply for the estimated population of 24,000 persons.

All of these reservoirs are to be provided with substantial frame coverings in order to guard against the fouling of the water while stored, to guard against undue loss by evaporation, and in order to keep the temperature of the water as low as possible during the heated season.

This reservoir capacity of a city water-supply system is of the utmost importance, the surety of being able at all times to draw upon this storage during times of large conflagrations. during renewals and repairs to any of the parts of the entire system, determine to a great extent the value of the latter, and adds to the benefits to be derived theref

and ready to be drawn upon at any time.

Having in this case two sources of supply with two main conduits leading to the reservoirs, a fear of a total interruption for any time long enough to seriously interfere with the dispensing of the valuable fluid can reasonably be excluded.

excluded.

It is somewhat difficult to effectually summarize the reservoir capacity as compared with that of other cities since the natural requirements of dif-ferent works vary greatly, and also the difficulty of obtaining a stored supply. Some small towns draw from lakes and have several years' supply by a nat-ural storage; others with supplies pumped from abundant sources of natural supply, and with duplicate pumps to insure against breakdowns, need and

have but a very limited supply. Others again have need of a large storage supply from lack of these advantages.

In the plan presented to you the advantages of having an unlimited supply of underground stored water with 76,500,000 gallons of water stored in reservoirs to draw upon in combination with voirs to draw upon in combination with the favorable location of the reservoirs, the rayorable location of the reservoirs, and the depending pipe system, constitutes practically a gravity system, with the exception of the small quantity of 4,000,000 gallons to be furnished by the pumps, will naturally place the city of Los Angeles within the ranks of the favored few possessing efficient waterworks.

PIPE SYSTEM.

The city distribution pipe system consists of a total of 497.49 miles of pipes. The smallest size main is a 6-Inch pipe of which 1,685,173 feet, or 319.16 miles are required. The largest main is a 40-inch pipe, of which 7732 feet, or 1.47 miles,

required. The largest main is a 40-inch pipe, of which 7782 feet, or 1.47 miles, are needed.

For fire protection service there are placed within the city limits a total of 2437 hydrants, 562 of which are designed to have 8-inch connections with the pipe system. with two engine nozzles, and 1875 to have 6-inch connections with one hydrant nozzle. There are at present but 560 fire hydrants within the city elimits. In addition there will be about 750 sprinkling hydrants.

The pipe system is designed sufficiently large to furnish at all times a maximum quantity of water for domestic purposes, in addition to the required amount of water for fire extinguishment, while the available head from the different reservoirs, together with the designed arrangements for controlling the pressure in the pipe system by making the different level service systems interchangeable, that is, by adding the pressure to be obtained from a hivh-level reservoir to the next lower level system, or by the additional provision of pumping directly into the mains if needed, would, through its beneficial effects as fire protectors, prove a valuable return for the money to be expended for this system.

The large number of hydrants contemplated within this system would of necessity immediately give an appreciable return as no material enlargement of the fire department would need to be taken under consideration, except a plentiful supply of hose appliances and accessories.

The value to be derived from a perfect system of fire extinguishment through the installation of a water works system has proved itself here-tofore in other cities of such importance that attention only needs to be called to one instance, by means of

which it has been shown in the city of Columbus, O., that the loss by fire previous to the installation of the water works, was .65 of 1 per cent. of the valuation, while after the installation of such water works, the loss by fire was reduced to from .11 to .13 of 1 per cent., thereby saving within five years more than the entire cost of the construction of the water works.

Merely—to illustrate the commercial revenue, producing value of the fire hydrants attached to a water works system, the following data are submitted:

The hydrant rental in the United

mitted:
The hydrant rental in the United
States ranges from free to \$160 per
annum, which gives an average hydrant rate of from \$45 to \$70 within
the different sections of the country.

The water supply obtained at the headworks is to be conducted to the city through a main conduit from the Providencia Rancho to the high level reservoir, a distance of eight and enethird miles, with a difference of elevation between both places of twenty-five feet, which, for the quantity of water necessary to be conducted away from this place, will require a main conduit of five feet in diameter. This conduit is designed to be built preferably of concrete, strongly constructed, with all necessary appliances for cleaning, wasting, and special arrangements for conducting to CONDUITS.

concrete, strongly constructed, with a necessary appliances for cleaning, wasting, and special arrangements for conducting to the city.

This main conduit will skirt the toe of the Cahuenga Mountains, will be at all times, wherever practicable, a subterranean structure, and enter the high-level reservoir through a short tunnel at an elevation of 430 feet above sea level, approximately 1500 feet north of the present Buena Vista-street reservoir.

The water supply to be obtained at the headworks to be located at Crystal Springs is designed to be carried by means of a 44-inch steel pipe conduit to the present Buena Vista-street reservoir. Its length is approximately five miles, and the present branch conduit leading to the Belle View reservoir is of size and form adapted to be incorporated into this system for the purpose of supplying that reservoir.

The length of all main conduits reaching from the headworks to the reservoirs is approximately 15.34 miles. The length of infiltration galleries, inclusive of laterals, is 2.7 miles; the length of mails, auxiliary to the reservoirs and power plant, is approximately 1.2 miles, and the city distribution-pipe system is 497.49 miles, making a total of 516.73 miles of conduits and pipes, and necessitating for the laying of the pipes and the excavations of the reservoirs a total excavation of 1,121,420 cubic yards of earth. The cast-iron pipe, fittings, and specials needed for the system. Will have a total weight of 77,100 tons.

Provision has been made to establish at elephone line making a complete circuit from the central power plant along the different main conduits to each reservoir.

Present requirements will necessitate the construction and operation of the

Present requirements will necessitate the construction and operation of the plants at the two sources of supply, the main conduits leading therefrom, and the entire system of reservoirs and power plant; while of the 497.49 miles of city pipe system, the present requirement is 339 miles of mains, and the balance of 158½ miles, mostly of the smaller kinds, could be added to the system by yearly enlargements.

ESTIMATES.

ESTIMATES. In presenting to you an estimate for In presenting to you an estimate for the system, advantage has been taken of the remarkably low prices at present prevailing in the market, especially on cast-iron pipe. The estimate does not include the cost of right-of-way, water rights, sites for headworks on the Pomeroy & Hooker tract, etc., but in all other respects a liberal allowance for labor, cost of material for the best of its kind, for careful inspection during the time of construction and a liberal rate of profit to the eventual contractors has been observed in computing the estimates, so as to insure for this price conscientiously-built works, made from the very best material and in efficiency second to none in the United States.

The estimate also includes the liberal purchase sum for those leatures of the purchase sum for those features of the

present waterworks plant as are in-corporated within thi system, includ-ing needed enlargements thereto. At all events, these features could be con-structed and built anew in conformity with the general plans for the sums estimated.

To recapitulate the requirements for the entire system and to give an approximate estimate of its cost, we have:

Bellevu

and Bellevue-avenue reservoirs, the proposed high-level reservoir and the proposed pump reservoir, complete with gatehouses, valve-chambers and roof covering.

Sixth—Reservoir pipe connections and Venturi meters.

Seventh—Central power plant.

Eighth—Cast-iron water pipes.

Ninth—Specials, valves and hydrants Tenth—Trenching, laying pipe, lead, yarn, etc., and back-filling and repaving.

Eleventh—Making service pipe connections and setting 10,000 meters.

Twelfth—Telephone lines, electric plant, etc.

Total

PRESENT REQUIREMENTS PRESENT REQUIREMENTS.

In considering the cost for extension and betterment of the present water works system, as outlined on the basis of this proposed new water supply, adequate for present requirement, we can, on the basis of the figures as herewith presented, easily arrive at the following conclusions.

As the proposed system embraces within the distribution plan a total of 4974 miles, the present requirements would be equal to about 340 miles pro-

portionate to the cost estimated for the 497% miles, nogether with the estimates for new headworks, main conduits and reservoirs. We therefore arrive at these figures.

The cost of eventually laying these 158% miles, inclusive of fittings, specials and hydrants, trenching, backfilling and teaming, which extension can necessarily only be deferred to the outlying portions of the city, and therefore requiring 2% per cent, of 10 inch, 10 per cent, of 8-inch, and 87% per cent, of 6-inch, would amount to a total of \$77,000.

of 8-inch, would amount to a total of \$877,000.

The estimated cost for headworks, conduits, reservoirs and power plant would remain unchanged as these works would form a factor of the present requirements. We find, therefore, that the present requirements for supplying the city as outlined in this plan, will cost \$3,585,000, while the cost for future successive enlargements, embracing the total cost of 185½ miles of pipe, would be \$877,000 on the basis of the present prices. This latter figure can be regarded as a temporary saving, or a not needed present expenditure; however, leaving the doubt and uncertainty of meeting eventually with increased prices for labor and material. The current expenses connected with the system of present requirements would be almost identical with those for the entire system.

OPERATING EXPENSES.

The operating expenses necessarily be incurred in the successful opera-The operating expenses necessarily to be incurred in the successful operation of such a system, embrace, aside from Superintendents, operating expenses and fuel, also the expenses for maintenance, renewals and repairs, interest on bonded debt, etc. Leaving out of this estimate at present the latter four items, we find that the daily operating expenses for such a water supply system, for engineers, oilers, foremen, attendants on reservoirs, main conduits and gangs of laborers, with foremen, to make necessary repairs, alterations, and look after the system in general, together with expenditures for lubricating oils, ctc., in the power plant, would be \$120 per day for present requirements, and will be the same for a population of 241,000, with no meter regulation for daily delivery of 48,200,000 gallons of water. The maintenance account, in addition to the operating expenses for present requirements would be \$160 per day. For a population of 241,000 this account will be \$235 per day, while, with a population of 482,000, this expense would probably be \$470 per day. Added to either of these expense accounts must be a daily expense of \$60 whenever the steam pumping plant is temporarily taking the place of the water-power plant.

MAINTENANCE,

MAINTENANCE.

For the purpose of submitting to your Honorable Body an estimate of all expenses connected with the operating of this system under eventual municipal ownership, and based upon present requirements, the following table is appended, giving in summarized form, the estimated expense for each department.

Per day.

For care of power plant, superintend-ence, taking care of reservoirs, head-works, conduits and gates as hereto-fore stated.

For office expenses, purveyor, clerks, rent, stationary, etc.

Mechanical department, machinery and blacksmithing materials, wear of tools, etc.

MUNICIPAL OWNERSHIP. The relative advantage of public and The relative advantage of public and private ownership of waterworks has been discussed so much that actual statistics at this time and in connection with the subject matter will be more forcible than arguments, and the following facts relating to change of waterworks from private to public ownership, and vice versa, are presented.

sented.

The "Manual of American Water-works" states that including 1891, there are a total of 2073 works, of which 43.1 per cent. are under public and 56.9 per cent. under private administration. A cent. under private administration. A grouping upon geographical sections of the country show that sections that are new and slow in their development, or have been greatly retarded a long time, have been greatly retarded a long time, have the largest percentage of private works; as Montans, Nevada, with no public works, and all of the Southern States but Georgia, with 50 per cent. or more of private works. While in numbers the private plants are ahead, the showing is sharply reversed when population is considered, 60.2 per cent. of the total population served by waterworks being supplied by public-works.

The groups referred to are as follows.

	Inc groups referred to	Per cent.	Per cer

The largest cities of the country have

petition.
Statistics referring to waterworks franchises for the regulation of rates and purchase of the works by the city show, so far as mere figures can, that the majority of our cities and towns have been so anxious to secure water that they have not protected their interests in granting franchises. The facts presented in connection with this phase are of unusual interest, owing to their bearing upon important and practical subjects of especial value to Los Angeles.

We find that 98 out of 391 franchises are for more than 30 years; 188 are for 20 years or less. In all the Northeast,

Middle and Pacific States 20 to 30-year franchises are in the majority, while of all the 50-year franchises reported, one-half are in the Pacific States. Out of SI companies, provisions to purchase have been made, of which 6 are at cost, 5 for price named in franchise, 70, or nearly all, to be arbitrated.

REVENUE AND PROFIT. Statistics on revenue and profit on waterworks, whether public-or private, are not easy of access, and such as appear in print can only be used for comparison's sake, as conditions, local and otherwise, vary to a great extent; the cost of the works as compared with the revenue derived therefrom depends altogether upon individual circumstances.

stances.

The only reliable statistics relating to revenue derived from waterworks refer to those from public works, and as these are operated purely for the public good in order to supply water at minimum cost, without a thought of profit, their gross revenue is at least from 10 to 30 per cent. less as compared to those of private enterprises. Even at these figures the comparison between the revenue derived from waterworks and railway bonds or stocks has been shown in favor of the former as 7 is to 4.8. The difference is, however, that there is very little "water" in the waterworks capital account, while there is a good deal in the railway capital account, even in California.

The revenue account may safely be estimated on the basis of the following comparative rates, as collected for the group of Pacific Coast States, namely, first by the percentage of revenue to the cost, which is extraordinarily uniform throughout the United States, and amounts to 9.29 per cent., which, for the estimated costs of our present requirements of approximately \$3,500,000, would amount to \$325,150; second, by revenue per head on waterworks, which in the Pacific group amounts to \$6.68, and on the basis of present 100,000 heads, would indicate the return of \$68,000; third, by revenue desired per tap, which, in the Pacific group has shown itself to be \$40.70; but appears in the statement of the Los Angeles City Water Company as but \$25.50 for this city, and on the present 17,250 taps would indicate a total revenue of \$702,075 on the basis of the former, and as \$439,971 on the basis of the present 340 miles, assures us of an income of \$624,920. This latter figure is by far the saftest to assume, as statistics gathered in reference to revenue based on miles of pipe in operation, give a startling uniformity in the United States, and averages for the comparative estimate and it is safest to estimate upon for this plan; however, let us accept the sum of \$440,000 as tendered by the present waterworks as a probable future revenue to be deri

Year— Sinking Yearly Interest. fund. total. First year, 4½ per cent interest on \$87,500 \$245,000

part of the deteriorated system by entirely new pipes, new machinery, etc.

The lease of life of cast iron on water works is now subjected to a shorter term than formerly, electrolysis caused by ground-wire connection of the electric power plants situated within the city limits seems to attack the iron, gradually turning the same at certain parts into a spongy mass, and thereby shortening its life considerably. While definite statements, either one way or the other, as regards the time of life of cast-iron water pipe, bught to be received with great caution, still the possibility of deterioration is transferred to a probability as far as we know at the present time from a technical standpoint, and this probability furnishes us with the new factor in this expense account.

A yearly sinking fund of one-fortieth, to replace deteriorated parts of the

A yearly sinking fund of one-fortieth, to replace deteriorated parts of the works amounts to \$67,500, which, added to the former expense of \$270,400, gives total maximum yearly expense of \$337,-900, against which the credit side of the account shows a reasonable minimum revenue of \$440,000, permitting at once a reduction of the present rates per service from \$25.50 to \$18.60, or about 23 per cert.

revenue of \$440,000, permitting at once a reduction of the present rates perservice from \$25.50 to \$18.60, or about 23 per cent.

The balance sheet on expenses and revenues for a waterworks system of this description under municipal ownership, was carefully estimated, the results of which show that with the expenditure of \$3,500,000, as estimated, with a liberal account for operation and maintenance, that with interest and sinking fund of bonded debt taken care of, and with a yearly sum set aside to replace deteriorated parts of the system, this city, with a population of 241,000 can furnish the best water in abundant quantities to the water-rate payers for \$9.35 per service pipe against the present \$25.50, or a reduction of 63 per cent., and under similar and metered conditions do the like service to a population of \$482,000 for \$5.48, or at a reduction of 78 per cent. From the present rate. No doubt an incontrovertible argument in favor of municipal ownership.

The facts will probably be that the income from the waterworks will not only pay off the bonds and their interest, but furnish a surplus that from year to year could be devoted to the betterment and extension of the plant as the city grew, so that at the end the city would have its waterworks at an initial cost of \$3.500,000.

Each additional inhabitant furnishes the means of additional assets to the waterworks revenue, so that the eventual increase of population will pro rate the decrease of water taxes, help to pay the current expenses and reduce the water rates.

In view of the fact that additions to the present pipe, system are constantly demanded in sections of the city not yet supplied, it is respectfully recommended to your honorable body to order such future additions and enlargements henceforth to be made in conformity with the plans submitted, that especially all pipes to be added to the present system to be of such climensions as to correspond with the sizes outlined in this betterment plan, and that all fittings, specials, hydrants, etc., i

the present works are obtained they will dovetail into the plans in the manner heretofore presented, otherwise an independent system will have to be constructed.

Considering the magnitude and importance of the problem submitted to me by your honorable body, I have deemed it proper, even at the risk of making the report too lengthy, to present for your consideration data collected from statisfics bearing upon the question of waterworks, so as to enable you to arrive at a proper understanding of this, one of the most vital questions which has ever been presented concerning the future growth, weflare and prosperity of the city of Los Angeles.

Before closing I wish to express my appreciation of the valuable assistance rendered me by Ernest Abs Hagen, civil engineer of this city, in the preparation of the plans and reports.

All of which is respectfully submitted.

CITY ENGINEER DOCKWEILER

Conneil Ignores the Waterworks Committee's Desires and Asks for the Plans and Estimates Which Have Been Kept a Close

The Council met in regular session at 10 o'clock yesterday morning with President Silver in the chair and all

embers of the Council present.
After the reading of the minutes of the preceding session, the message of the Mayor disapproving the second or-dinance passed by the Council on the

subject of poles and wires of the electric companies within the new conduit area, was presented and read.
Councilman Nickell moved that the
vote by which the ordinance was

adopted be reconsidered. The motion prevailed. Councilman Nickell then moved that the ordinance be placed on file, to which motion Councilman Hutchison offered the amendment that said ordinance be adopted, notwithstanding the objections of the Mayor Councilman Toll took a firm stand in opposition to the Mayor. He said that was most evident that the old electric companies were attempting to snuff out competition, and even the new companies which were now seeking franchises had reversed their posi-tion and had grasped the opportunity to combine with the Los Angeles Electric Light Company to prevent younger rivals from gaining an increase of busi ness. Selfishness like politics made strange bedfellows. When the new companies came before the Council a short time ago, they said that the first ordinance was aimed to kill competition, and now they come back impersonally and were inspiring an every sonally and were sonally and were inspiring an every sonally and were sonally and were sonally and sonally sonally sonally and were sonally and sonally sonall tion, and now they come back impersonally and were inspiring an even stronger attack and urging that competition be throttled. The purpose of the amendatory ordinance was to permit the business men of the city to have service from the electric companies until the poles and wires could be removed and the underground conduits established. It was the duty of the service from the electric companies until the poles and wires could be removed and the underground conduits established. It was the duty of the Council to provide means to supply such service. He stated that a number of business men had confessed to him that they had not understood the nature of the ordinance, and had conceived the notion that it was the purpose of the ordinance to allow an unlimited number of poles to be erected. When they had natice be passed asked that the ordinance and asked that the ordinance be passed asked that the ordinance be passed asked that as be had drawn the ordinance at the request of a number of Councilmen, he was anxious to explain his position. He was anxious to explain his position the said the Mayor himself had usked that such a measure be adopted because the original ordinance allowed no leeway. For two weeks his office had been filled with persons who wanted extra lights for La Flesta and he had even gone to be temporarily violated. Councilmen Hutchison thought that to leave the original ordinance unamended was to cultivate the worst form of a monopoly, a monopoly which would work both ways. Councilman Grider explained how the lighting of the public streets would be interfered with, unless the supplementary ordinance where passed. Existing contracts form of a monopoly, a monopoly which would work both ways. Councilman Grider explained how the lighting of the public streets would be interfered with, unless the supplementary ordinance where passed. Existing contracts shut out the West Side Electric wires to go underground.

Councilmen Ashman and Nickell ask of the committee under seal, and the discussion, the latter was a subjustive to the antice of the work of the matter. The Mayor sight or the days ago had expected to vet to the measure. The mayor sight or the says ago, but fortunately this revolution of the Merchante' and ham and the discussion the matter. The Mayor sight or the days ago had expected to vet to the measure was an additional to the proposition of municipal

n the final vote Councilman Ash-Blanchard and Nickell alone voted ustain the Mayor's objections and 'ordinance was again passed. OFFICERS' REPORTS

The weekly report of the City Auditor for the week ending April 17, 1897, was referred to the Finance Commit-

tee.
Health Officer Powers presented a report on the question of using sew-age water for irrigation. He recommended that the ordinance passed by the Council and vetoed by the Mayor

be adopted. The ordinance was again

be adopted. The ordinance was again adopted unanimously, on motion of Councilman Hutchison.

Supervisor Davis in behalf of the residents of the southwestern suburbs of the city made an argument to the Council against the selling of sewage water for irrigating purposes. He stated that the running of this water over the ground was unhealthy, unpleasant and was done without regard to the interests and rights of the people who lived there, while within the city such sale was prohibited. Other property-owners took the same stand. On motion of Councilman Nickell the matter was referred to the Sewer Committee.

mittee.

A report of the Health Officer was also received on the condition of the Arroyo de Los Reyes. It was referred to the Board of Public Works.

The report of the Board of fire Commissioners in regard to coal used in pumping out a water hole on Boyle Heights was referred to the Finance Committee.

report of the City Clerk on street proceedings was received and the ordinances ordering the work of improving Central avenue, Pasadena and Rosemont avenue

STREET SPRINKLING.

The Superintendent of Street Sprinkling made an exhaustive report The Superintendent of Street Sprinkling made an exhaustive report on his department. Much trouble was experienced on account of the defective condition of hydrants and the goose-necks and an increased number of appliances were needed. The contractor had lately purchased fifteen new sprinkling carts, making eighty-five in all, and fully twenty more were needed-to do the work satisfactorily. Superintendent Smith exhibited to the Council a patent valve which he recommended should hereafter be ordered placed within forty feet of every street corner wherever new water mains were to be laid in the future. He also stated that there were nine fire hydrants in the city which the fire department could not use because of the use of the hydrants by the sprinkling department, and fifty-two hydrants in the city were in a leaky or otherwise defective condition. A number of minor suggestions were also submitted to the Council for consideration.

PROPOSALS FOR WORK. Councilman Blanchard moved that all bids for the work of improving Grand View avenue be not opened as yet, because there was a movement on foot to have the grade of the street changed.

yet, because there was a not the street changed.

The following bids were then received, opened and declared:
To sewer Bailey, Pennsylvania avenue and St. Louis street: W. A. Frick, 78 cents; John Guenella, 79½ cents: W. A. Frick, 78 cents; John Guenella, 79½ cents: J. E. White, \$1.03; George Banaz, 64 cents; C. L. Powell, 60 9-10 cents, all of which were referred to the Sewer Committee.
Twenty days' leave of absence was granted to Police Commissioner Preuss on petition.
The regular demands from the various departments of the city were passed upon the recommendation of the Finance Committee. The usual requisitions were also approved and passed.
CITY WATER FLANT.
The Water Supply Committee then

Finance Committee. The usual requisitions were also approved and passed.

CITY WATER PLANT.

The Water Supply Committee then
presented the following report:

"Your Water Supply Committee, in
response to request, beg leave to submit the following report:

"Under date of January 13, 1897, the
following authorization was transmitted to the committee by the City
Clerk, to-wit:

"On motion, which was adopted by
the Council on the 11th day of January,
1897, I am authorized to notify you to
confer with the City Engineer and report to the Council as to the best procedure for acquiring a water plant to be
owned by the city.

"Afterward and under date of January 20, 1897, the following additional
authorization was conveyed to this
committee by the City Clerk, to-wit:

"At a meeting of the City Council,
held January 18, 1897, you were authorized to draw such necessary requisitions
as the City Engineer may from time
to time require during the progress of
his work in reference to preparing estimates of the cost of water-works for
the city. You were also empowered to
take such action as may be necessary to
open negotiations with the Los Angeles
City Water Company, looking to the
ultimate purchase of their plant, in
the event it shall appear advantageous
to purchase the same, in accordance
with the existing contract.

"Acting upon that portion of authority relating to estimates of a new
plant, the City Engineer was, on the
24th day of January, 1897, instructed by
this committee to rent the hecessary
rooms, employ necessary assistance and
prosecute to an early completion such
plans and specifications as were required to furnish an estimate of the
annexity at cest of a new system of

to time require during the progress of his work in teference to preparing estimates of the cost of water-works for the city. You were also empowered to take such action as may be necessary to open negotiations with the Los Angeles City Water Company. looking to the ultimate purchase of their plant, in the event it shall appear advantageous to purchase the same, in accordance with the existing contract."

"Acting upon that portion of authority relating to estimates of a new plant, the City Engineer was, on the 24th day of January, 1887, instructed by this committee to rent the necessary rooms, employ necessary assistance and prosecute to an early completion such plans and specifications as were required to furnish an estimate of the approximate cost of a new system of water-works for the city.

"At a meeting of the committee, on March 25, 1897, it having been reported by the chairman that the City Engineer was about ready to render his report."

In W. J. WASHBURN, Secretary. "Third—From the West End Water Company:

"LOS ANGELES, March 4, 1897.

"M. Nickell, Chairman Water Supply Committee—Dear Sir: In reply to ward the negotiation of our plant, in the event it shall appear advantageous to purchase the same, in accordance with the existing to the distribution of our letter of February 25, looking toward the negotiation of our letter of February 25, looking toward the negotiation of our plant, will say I am instructed by the directors to inform you that they have not contemplated the sale of the plant. "Secretary."

"A formal meeting with the representatives of the Los Angeles City Water Company was delayed until April 9, 1897, at which meeting the subject was gone over in a general way, and it was decided to first inspect the various properties on the ground in order to make all future study of detail more intelligible to the committee."

In keeping with this agreement the committee, on April 15 and 16, in com-

sent simultaeously the cost of a new, as, well as the price of the old water plant. It is the object of the committee to treat these two sets of figures in a comparative sense, hence the knowledge of one without the other is unavailing, and nought but an undue sense of curiosity can find an excuse for the premature exploiting of the figures in either case.

"Afterward, and on the 5th day of April, 1887, the report of City Engineer Dockweller was delivered to Chairman Nickell of this committee under seal, as directed, and it is now in that gentieman's custody, its contents unknown to any one outside of said engineer and one confidential employé. The committee feels safe in this knowledge, since by action taken January 24, 1887, the City Engineer was instructed to hold in strict confidence all information concerning character or cost of work contemplated.

"By virtue of that other portion of the authority conveyed to this committee by your honorable body which contemplates the purchase of the existing water plants under favorable circumstances, the following letters were indited by this committee under date of February 25, 1897:

"First—"To the Los Angeles City Water Company—Gentlemen: At a meeting of the City Council held January 18, 1897, the undersigned were authorized and instructed to consult with your company with a view to the purchase of your plant.

"As you are well aware the sentiment of the people is strongly crystalized upon the proposition of municipal ownership of a water system, and in obedience to this popular demand the present City Council feel it incumbent upon them to take immediate steps looking to the construction of an entirely new system.

"The preliminaries and details of this procedure having been delegated

plants or the construction or an en-tirely new system.

"The preliminaries and details of this procedure having been delegated to this committee it now becomes our pleasure, by virtue of the authority vested in us as above mentioned, to make known to you our desire for an early conference with such members of your company as you may choose for

the purpose of taking up, in a frank, business-like manner, the question of the purchase of the plant of the Los Angeles City Water Company by this municipality.

"It is assumed on the part of the committee that your company is not averse to entertaining a discussion of this matter at this time, and we beg to extend the assurance at the outset that it is the desire of this committee to approach the matter in a spirit of mutual confidence and frankness, having only in view a final determination which will be at once satisfactory to the people and fair to the company.

"Awaiting an early reply which shall name the time and place agreeable to you for a conference, we remain, respectfully."

"Second—One copy each of the following letter to the Highland Water Company and the West Side Water Company and the West Side Water Company."

"At a meeting of the City Council held January 18, 1897, the undersigned committee were authorized and instructed to open negotiations with existing water companies operating within the city limits looking to the

Company and the West Side Water Company:

"At a meeting of the City Council held January 18, 1897, the undersigned committee were authorized and instructed to open negotiations with existing water companies operating within the city limits looking to the purchase of their plants in the event it should be deemed desirable for the city to own the same.

"The main interest, as you know, centers upon the purchase of the Los Angeles City Water Company's plant, and negotiations looking to that end have now been asked for by the committee, but it appears to our committee that it will also be necessary to take up the matter with your company, inasmuch as the plan which will be outlined for a new system would naturally include the territory in which you now operate.

"In order that the committee may

operate.
"'In order that the committee may

include the territory in which you now operate.

"In order that the committee may possess itself of all the information necessary to enable us to compare the costs of existing plants with any new system which the City Engineer may devise, we beg to have you name the time and place at which members of your company may meet the undersigned committee and take up the matter of the purchase of your plant. Awaiting your early reply, we are, respectfully yours.
"Subsequent replies were received to same as follows:
"First—From the Los Angeles City Water Company:
"LOS ANGELES, Cal., March 9, 1897. Hon. F. M. Nickell, E. L. Blanchard and C. H. Toll, Water Supply Committee of the Honorable Council of, the City of Los Angeles—Gentlemen: Your communication addressed to the Los Angeles City Water Company, under date of February 25, came to hand, and upon a meeting of the board of directors of the Los Angeles City Water Company and Crystal Springs Land and Water Company, recently held, your letter was submitted to those boards, and in pursuance of the authority given me by them, I have to answer that both corporations are willing to entertain a proposition for the sale to the city of Los Angeles of all the property that they possess, and they have empowered me to confer with you and to enter into a discussion of the matter, with a view of effecting such sale; and I am prepared to meet you in the spirit which you suggest, and if any proposition should be made by you which appears to us to be reasonable, measures will at once be taken by the water companies to perfect the agreement on their part and carry it into effect. At any time, therefore, that you may designate, I will meet you with a view to discussing this matter in a spirit of mutual confidence and frankness, and with the view to a final settlement, fair and just to all. Respectfully yours,

"Su MOTT. Secretary."

"Second—From the Highland Water Company:

"LOS ANGELES, Cal., March 13.

"Second-From the Highland Water "Second—From the Highland Water Company:
"'LOS ANGELES, Cal., March 13, 1897. F. M. Nickell, Chairman Committee on Water Supply, Los Angeles City Council—Dear Sir: Replying to your favor of February 25, in reference to a meeting between the Highland Water Company and your committee, looking to the purchase of our works by the city of Los Angeles, I will say that we will meet your committee at

that we will meet your committee at any time and place that may be designated by you. Your truly,
"W. J. WASHBURN, Secretary,"
"Third—From the West End Water

"In keeping with this agreement the committee, on April 15 and 16, in company with City Engineer Dockweiler and representatives of the Los Angelet City Water Company, visited the various preservoirs, propriets propriets."

City Water Company, visited the various reservoirs reservoirs, pumping plants and properties of the company without, however, making any attempt to arrive at actual or estimated values of same.

"Your committee now feels prepared, with the coöperation of the City Engineer, to enter upon an intelligent consideration of the details of the work in hand, and it is our purpose to prosecute the work to an early completion, making such reports from time to time as your honorable body may direct. Respectfully submitted,

"F. M. NICKELL,
"C. H. TOLL,
"E. L. BLANCHARD."

This report was made by the com-

This report was made by the com-mitte unexpectedly, because all last week the committeemen had declared time and again that no report would

mitte unexpectedly, because all last week the committeemen had declared time and again that no report would be made for at least one week. It was in ended merely to satisfy the Council as to what progress was being made in the preparation of a final report, but it had quite a different effect.

Before this report was disposed of, Councilman Grider offered a resolution to the effect that the City Engineer be instructed to proceed at once to investigate and report upon the plant of the City Water Company. Councilman Hutchison seconded the motion to adopt the resolution and took the opportunity to state that he was opposed to the purhase of the water company's plant on any terms, because it had little real value to the city. Outside of the headworks, which might be available at a fair valuation, it was out of date, worn out and inadequate to the needs of the city.

The Water Supply Committee opposed the adoption of the resolution with all its strength. Councilman Toil was particularly alarmed by the suggestion of such proceedings at this time, because he thought it might interfere with the negotiations of the committee.

Councilman Nickell saw in the resolution a reflection upon the honor and asgacity of the committee, and stated emphatically that he resented such action at this time. He explained briefly the progress of the committee's dealings with the water company, and was alarmed that the injection of this issue into the proceedings at this time would cause that company to withdraw the confidence with which it had been disposed to treat with the representatives of the city. He thought that the supporters of the resolution were indulging in a cheap gallery play. By this time the discussion had become general, and the Councilmen were bandying rather personal remarks without addressing the chair.

Councilman Grider warmly declared: "Ther' will be an estimate made on

not seconded.

President Silver called on City Engineer Dockweller to give some idea of what cost such work as was proposed would entail. The City Engineer said that to make the necessary estimates and to verify his calculations by excavations to examine the mains and conduits of the water company, and to take their callber at about ten places in every mile would probably cost not less than \$2500. This statement, drawn out by President Silver, appeared to have more influence in settling the debate than all other arguments combined. and on the final vote on the motion of Councilman Grider, only Councilmen Grider and Hutchison were found voting in the affirmative, Councilmen Ashman, Baker, Blanchard, Mathuss, Nickell, Toll and President Silver standing solid against any estimates on the City Water Company's plant at this time.

After disposing of this troublesome question, the Council took a recess until 2 o'clock.

Afternoon Session. Council reassembled at 2 p.m.

Afternoon Session.

The Council reassembled at 2 p.m. President Silver sprung a surprise by moving that the Water Supply Committee be and is hereby respectfully requested to present to the Council the City Engineer's report relative to the estimates for a new water plant. This motion was unanimously adopted, although the committee was plainly put out by what it considered the precipitate action of the Council, which was in direct conflict with the deliberate policy which it had been pursuing.

Hot on the heels of President Silver's motion Councilman Grider introduced another resolution, and moved its adoption. The resolution was to the following effect:

"Whereas, it is of the first importance that the taxpayers of the city of Los Angeles shall have prompt and full information of all matters pertaining to the acquisition by the city of a system of waterworks for the use of said city and its inhabitants; and, whereas, the City Engineer, under the direction of this Council on the 19th day of January, 1897, was to make an estimate of the cost of a system of works for the said city, and report the same to this Council at the earliest possible time, said report having been made, now, therefore, be it

"Resolved, that the City Engineer be and he is hereby instructed to have said report published in pamphlet form, and that he include therein all such maps, charts and diagrams as may fully and clearly illustrate such report, to the end that the same may be clearly and readily understood by the public; that the number of said pamphetis be fixed at 5000, and that he same may be dearly and readily understood by the public; that the number of said pamphetis be fixed at 5000, and that the same may be dearly and readily understood by the public; that the number of said pamphetis be fixed at 5000, and that the same may be dearly and readily understood by the public; that the number of said pamphetis be fixed at 5000, and that the same may be dearly and readily understood by the public; that the number of said pamphetis be fix

Councilman Nickell at once left the Councilman Nickell at once left the Council chamber to procure City Fingineer Dockweller's report, which has been locked up in a special box in the vault of the City Clerk. In a few minutes he returned with a large sheetiron box in which were the portentous documents. In the presence of the Council he opened the box and deposited the report and maps with the clerk, at the same distributing copies to the representatives of the press. In the mean time the Council passed on to other business.

TRUMAN-STREET CONTRACT. Pending the discussion of the watervorks question, the matter of the ac works question, the matter of the acceptance of Truman street was called up. J. H. Crimminger made a long argument on behalf of the protestants, against the work originally done and as later repaired and patched. He was answered by Attorney L. H. Valentine, who specifically denied the statements of opposing counsel. Contractor Haigler, who did the repairing entine, who specifically defined the statements of opposing counsel. Contractor Haigler, who did the repairing on the original contract under the instructions of the special committee of the Council, testified that one property owner had stated that he had the whole matter "fixed," but his arrangement was broken by Councilman Nickell's interference in the matter. Three protestants, he sail, had proposed to withdraw their copposition, if they were let off from paying the whole or a part of their assessments. Councilman Nickell asked to have the committee's report read, and both he and Councilman Hutchison made statements as to the nature and extent of the repairs that had been made, on cross-examination Mr. Heigler stated that F. V. Rushion was the man who had approached him with the proposal of a compromise, and had represented at the time that he was authorized to speak for two other property owners.

property owners.

Mr. Rushton in turn made an expla-

mr. Rushton in turn made an explanation of his position, and said that he had been approached by some persons, whom he refused to name, with an offer that he would be exempted from paying his assessment if he would withdraw his "kick." After considerable irrelevant discussion the report of the special committee was then unanimously adopted. Councilman Grider in order to keep the records straight moved that the protest be denied, and Truman street accepted. On roll-call all the members of the Council, except Councilman Toll, voted in the affirmative.

On motion of Councilman Grider action upon the reports of the City Auditor rejecting the demands of George Furtseh, G. W. Hooser, W. M. Quierolo and George McClellan, each for the sum of \$48.40, was again deferred for one week.

CANVASS OF BOND VOTE. On motion of Councilman Nickell the canvass of the vote at the recent recanvass of the vote at the recent refunding-bond election was ordered. Councilmen Toll, Baker, Grider and Hutchison were appointed as tellers. The result of the canvass agreed with the vote as given unofficially at the close of the election.

The protest of M. L. Stearns against the proposed sewering of East Eighteenth and East Fourteenth streets and Essex street was denied.

The City Engineer reported that the cost of completing the cut on First street between Hill and Olive streets would be \$3400.

On his recommendation the following ordinances were passed:

A final ordinance to change and es-

An ordinance of intention to construct five-foot cement walk on the north ide of Eighth street from Spring to

side of Eighth street from Spring to Figueroa street.

An ordinance of intention to change and establish the grade of Grand View street from Eighth street to Ninth street was adopted and former proceedings were ordered abandoned.

The total cost of grading, etc., Towne avenue from Sixth to Seventh street being estimated at \$1.87, the necessary ordinance of intention was adopted.

The cost of grading, etc., Eastlake avenue between Main street to Mission road being estimated at \$1.13 per foot, the necessary ordinance of intention was adopted.

The work of laying a sidewalk on the north side of Twenty-first street from

was adopted.

The work of laying a sidewalk on the north side of Twenty-first street from Figueroa street west having been done by private contract, no ordinance was

presented.

An ordinance of intention to change and establish the grade of Temple street between Custer street and Beau-

dry avenue was adopted.

An ordinance to establish the grade of Thomas street between Downey avenue and Barbee street was adopted.

An ordinance of intention to construct a cement walk on both sides of Ingraham street between Kip street and Union avenue was adopted.

CITY ATTORNEY'S BEPORT.

CITY ATTORNEY'S REPORT. The following report of the City At-corney was presented and read: "To the Honorable Council—Gentle-

"To the Honorable Council—Gentle-men: In accordance with your instruc-tions I have prepared and herewith present an ordinance for the widening of New Main street, between Thirty-seventh street and Slauson avenue, and appointing commissioners therefor. "In the matter of the suit of Jean Casteret vs. the city, to quiet title to lots 60 and 61 of the Alaniz Vineyard tract. I recommend that a disclaimer be tract, I recommend that a disclaimer b filed, as the city has no right or inter

est in said land.
"I report herewith an ordinance pro-viding for the issuance of the refunding bonds recently voted upon by the peo-

ordinance exempting certain "Also an ordinance exempting certain persons from the operation of portions of the license ordinance, as directed by you. In preparing this ordinance I have not followed your instructions, but have followed the provisions of the State law on the subject providing for the exemption of the same class from the payment of county licenses. I would advise that you pass the ordinance as I have prepared it, so as to avoid any question of conflict.

"In the matter of the relaying of the asphalt pavement on Main street, I am of the opinion that this work must be done under the direction of the City Council, who, for that purpose, may select their own employés. I would advise, however, that the best results can be obtained by cooperating with the Street Superinteder in the matter if

be obtained by cooperating with the Street Superintendent in the matter, if ossible, and thereby avoiding all ques-

possible, and thereby avoiding all questions of jurisdiction."

The report of the Sewer Committee was read and adopted; also the report of the Finance Committee, the petition of the Los Angeles Northwest Improvement Association being referred to the Board of Public Works.

The usual number of minor motions were introduced, and a large number of petitions were referred to the proper committees.

BOARD OF PUBLIC WORKS. The report of the Board of Public Works, as published last Saturday, was

read and adopted. The following supplementary report was also presented and adopted: and adopted:
"Your Board of Public Works beg
leave to report as follows: Recommend
that the City Engineer be instructed
to present an ordinance of intention to

improve Second street from Fremon avenue to a point 200 feet west of Beau the matter of the petition from "In the matter of the petition from C. A. Sumner, asking that a franchis be advertised for sale for the construction of an electric railway along Sh Santa Fé avenue and othe

streets, recommend the same be re-ferred to the City Attorney to prepare draft of a franchise."

On motion of Councilman Baker the money collected from the property-owners for establishing the grade of Hill street from Rock street to Bellevue avenue, less expenses incurred, was ordered returned by the commissioners to the regress who rold the serves. draft of a franchise. on the persons who paid the same.

On motion of Councilman Toll the Council adjourned to meet on Wednesday, April 21, at 10 o'clock a.m. At that

time it is understood the report of the City Engineer on the proposed new system of city waterworks will be read and discussed. That report is given in full elsewhere in these columns, with diagrams included in the report.

LAT THE COURT HOUSE!

# A LIFE SENTENCE.

KID" THOMPSON FOUND GUILTY OF TRAIN-WRECING.

Hour in Its Deliberations, and Return's a Unanimous Verdict.

"Kid" Thompson was yesterday found guilty of train-wrecking and sentenced to imprisonment in the penitentiary for

Iffe.

The usual large crowd was gathered yesterday in Department One when Judge Smith took his seat on the bench. Bernard F. Mills. Esq., concluded his argument in favor of the defendant, which he commenced last Saturday. J. Noonan Phillips, Esq., followed for the defense, and Dist.-Atty. J. A. Donnell closed for the State. Judge Smith instructed the jury and it retired at 4:35 p.m.

A few minutes more than an hour after the jury had retired, a knock was heard on the door of the jury-room, and a voice from within announced that the twelve men in whose hands was "Kid" Thompson's fate, had agreed upon a verdict. There were no deputy sheriffs on hand with the exception of Deputy Marsh, who was in charge of the jury and could not leave the courtroom.

After some search for deputies, which met with no success, Detectives Crowley and Bowler went to the Jall after Thompson. The "Kid" was brought into the jall corridor by Jailer Kennedy. When Bowler pulled his handcuffs from his pocket and started to place them on Thompson's wrists, the latter exclaimed, "I object to any liar, perjurer and thief putting handcuffs on me. I am in the Sheriff's care. Where is some deputy from his office?"

As the "Kid" threatened to make trouble if Bowler persisted, Jailer Kennedy, in accordance with Thompson's request, put the handcuffs on his wrists,

As the "Kid" threatened to make trouble if Bowler persisted, Jailer Kennedy, in accordance with Thompson's request, put the handcuffs on his wrists, and he was taken into the courtroom. As it was necessary for Bowler to unlock the handcuffs, so that they could be taken off when the "Kid" reached Department One. the detective laid himself open to more remarks from his prisoner. Thompson did not throw away the opportunity, and called Bowler and Crowley a number of uncomplimentary names.

The jury-room door was unlocked, and the twelve jurors filed into the courtroom and took their seats in the jury box. When asked if they had agreed upon a verdict, the foreman, N. B. Church, said that they had done so. "What is your verdict, gentlemen?" asked the court.

"We find the defendant guilty of unlawfully throwing out a switch on the railroad known as the Southern Pacific Railroad, with intent to derail a passenger train, as charged in the information, and fix his punishment at imprisonment in the State Prison for life," answered Foreman Church.

Thompson arose from his seat as the

last words fell from Foreman Church's lips, and said huskily: "Well, you have done wrong, gentlemen! I am innocent!" His attorney, J. N. Philips, pulled the "Kid" back to his seat, and asked that the jury be polled. A poll of the jury resulted in a unanimous verdict. As Judge Smith was excusing the jurors, Phillips cautioned Thompson to say nothing to them, as they passed by, and he obeyed. Thursday morning was set for the "Kid's" sentence, and he was taken back to his cell in the jall. The convicted man took his sentence without flinching, although he was very nervous and as white as a sheet from the time when he was told that the jury had agreed upon a verdict. He guessed the result from the fact that the matter was decided in so short a time. When the "Kid" passed Kennett as he was leaving the jail to go to the courtroom, he said: "Kennett, I have been convicted on your perjury, and you know it." convicted on your perjury, and you know it."

know it."

Thompson tried to appear careless while on his way to receive the news that decided his fate, and started to whistle a Salvation Army tune, but his merriment was feigned. The "Kid" asys the sentence was as great a disappointment to him as though it had condemned him to death, but his hope lies in the fact that the case must again go before the Supreme Court. Kennett and Alva Johnson, who were brought from San Quentin to testify for the prosecution, were taken back for the prosecution, were taken back to the State prison last night by Dep-uty Sheriffs McClure and Aguirre.

### WILL DISMISS THE COMPLAINT.

my Information and Belief.' This morning the complaint against Mrs. William Austin, charging her with the unlawful detention of her own child, will be dismissed. The com-plaint was sworn to by Deputy Sheriff Will White, acting on the advice of Frank F. Davis, who was attorney for

Will White, acting on the advice of Frank F. Davis, who was attorney for Mohler, the father of the child and the complaining witness to the original complaint, which was sworn to in Minneapolis.

Sheriff of Hennepin county, Minn., Saturday, stating that a complaint had been sworn to for Mrs. Austin's arrest and a deputy would start at once for Los Angeles with requisition papers. The telegram requested Burr to hold the woman until the arrival of the officer from Minneapolis.

White took the telegram to Davis, who asked the deputy Sheriff to swear to a complaint and get a warrant issued for Mrs. Austin's arrest. Accordingly, Deputy District Attorney James and Justice Morrison were telephoned for and the complaint and warrant were issued. As it was late at night and the proceedings were hurried through, a mistake was made. The clause stating that the complaint was clause stating that the complaint was made on the information and belief of the complaining witness was omitted Deputy White had this mistake brough to his notice yesterday by City torney Arthur of Pasadena, Mrs. tin's counsel, and will have the plaint dismissed this morning.

TUPPER ARRAIGNED.

Maggie Brown Held and Harris and

Four people were arraigned before Justice Young yesterday in the Town-ship Court, who were charged with having committed a felony by passing nto a prison with a weapon for a prisoner and facilitating his escape. They were Maggie Brown, H. L. Tupper, Fay Harris and Jenkins. The two last named are wanted only as witnesses, and were allowed to go on their own recognizance. The Brown woman and Tupper were held in bonds of \$1000 each.

of \$1000 each.

These two are accused of entering nto a conspiracy to aid "Kid" Thompson to escape. Their scheme was to muggle a pistol to the "Kid" and et him fight his way to liberty, while in route from jail to the court room. Their examination was set for next Chursday.

hursday. Maggie Brown lived in the

house as Tupper. Tupper had come from Arizona to testify in Thompson's favor. The woman made a confession to the District Attorney, after her arrest, in which she said that while she had a knowledge of the plot she ok no part in its consumation. said that when Tupper spoke to her about the plan she told him she would be glad to do what she could for the "Kid," but she would not do such a thing as he proposed for anyone. Her story about the gun was as follows: The revolver changed hands in her The revolver changed hands in her presence, although she had purposely avoided seeing it. A man who had called to see Tupper gave it to him, but she turned her head as he did so, and did not see the weapon, although she heard plenty of talk about it. Tupper said there were three cart-ridges in the gun, and he wanted some Tupper said there were three carridges in the gun, and he wanted some more, but had only-fifty cents and did not care to spend that for ammunition. He afterwards said he had procured it without using the money. Tupper talked a good deal about a plan whereby Maggie Brown was to be at the cover of Paredway and Towns. the corner of Broadway and Temple streets in a carriage and drive the "Kid" away. She went to Mills, one of Thompson's attorneys, and he told her to have nothing to do with such a

her to have nothing to do with such a scheme; she followed his advice.

Mills says that the Brown woman came to him and told him something about the matter three or four days ago. The following night she was found dead drunk thrown into jail, and sentenced to five days' imprisonment.

Adompson's attorneys say that there is little doubt the woman was drugged to keep her from inter-fering with the scheme.

# FLOTSAM AND JETSAM.

Miscellaneous Driftwood Thrown into the Courts.

DECREE OF DIVORCE GRANTED. Judge Smith heard the testimony in the suit for divorce of Mrs. D. Rice against her husband, G. W. Rice yesterday in Department One, and grant-ed the woman a divorce as prayed for on the ground of failure to provide. Rice made no appearance.

WAS DENIED A JURY TRIAL. An appeal was taken from the judgment of the Justice Court in the case of the People against Attorney W. H. Savage on the ground that the defendant was denied a jury trial, and the matter came up before Judge Smith in Department One yesterday. Judge Smith reversed the decision of the lower court, which lined Savage \$50 for carrying a concealed weapon, and the case was placed on the call calendar to be set for trial. Savage's arrest is the outcome of ill feeling between factions in San Pedro, where he was tried.

HASTINGS PLEADED NOT GUILTY. "Dr." Calvin S. 'Hastings pleaded not guilty yesterday to the charge
of practicing abortion on the colored
woman, Fannie Norris. He appeared
before Judge Smith in Department
One yesterday with his counsel, who
presented a demurrer, which the court
overruled. The case was placed on the
call calendar to be set for trial. Before a hearing of this case, Hastings
will be tried for the murder of Lillie
Hattery.

6 of H. L. Flash's Main street sub-division of this city.

PETITION FOR PROBATE OF WILL. A petition was filed yesterday by Charles S. Northrop of Woodstock, Illinois, for probate of the will of James Northrop, who died at the home of petitioner in August, 1896. The estate of the deceased in this county consists of a house and lot on West Twenty-seventh street in this city, which is valued at \$3800, and has a rental value of \$180.

LETTERS OF ADMINISTRATION. Charles L. Rasey filed a petition yesterday for letters of administration to the estate of William J. Glendening deceased, whose estate consists of a life insurance policy for \$2000 in the New York Life Insurance Company.

CHRISTIE AN INSOLVENT DEBTOR. W. E. Christie, an exhack-driver, who keps the "Mother Brown" resort on the Mission Road, filed a petition for insolvency yesterday. His liabilities were stated at about \$800, censisting mostly of runing accounts. His assets consist of his stock of liquor, fixtures, etc.

stock of liquor, fixtures, etc.

SUIT AGAINST THE HERALD COMPANY. The suit and citation to show cause in the case of Phil D. Barney and Horace Miller against the Herald Publishing Company, were argued by the plaintiffs' attorneys in Department Three yesterday before Judge York. The defendant's counsel made an answernig argument and the case was taken under advisement by Judge York. Barney and Miller are suing to gain control of the Weekly Herald.

NOT INSANE BUT OVERWORKED. NOT INSANE BUT OVERWORKED, Edwin Gaskell was examined by a lunacy commission in Judge York's department yesterday and was adjudged rational and discharged. Gaskell is a shoemaker and lived with his father and Miss F. H. Perkins at No. 500 West. Eighth street. He imagines at times that he has had communications from the Divine Being. One of the witnesses said the man claimed to have usurped the power of God. Investigation convinced the physicians that Gaskell's condition was due to overwork and lack of proper food.

ALLEGED PLUMBER'S BOYCOTT.
The demurrer to the complaint in the suit for \$5000 damages, brought by A. Dellamore vs. the Master Plumbers' Association, was argued before Judge Clark in Department Two yesterday and taken under advisement. Dellamore sued for damages on an alleged boycott, whereby the association attempted to make it impossible to buy material or obtain men to work for him. ALLEGED PLUMBER'S BOYCOTT.

### SANTA MONICA. outhern Pacific Grants a Sewer

Right-of-way. SANTA MONICA, April 19.—[Regular Correspondence.] The City Trustees met today (Monday) in regular session,

Mayor Jones presiding. Bills to the amount of \$1100 were allowed.

Trustee Carrillo, chairman of the Trustee Carrillo, chairman of the Street Committee, reported that E. L. Sevain, an engineer of the Southern Pacific Company, had agreed that the railroad company would accept twenty-inch sewer pipes if the route of the sewer was changed back to Ocean front, and had notified the committee that papers granting right-of-way were in process of preparation.

Applications of sixteen retail and two wholesale liquor dealers, for license, were granted.

A petition, numerously signed, was presented, asking for additional electric lights in South Santa Monica. The matter was referred to the Street Committee, with power to act.

An ordinance was adopted allowing liquor dealers to pay one-half cash and one-half August 1, 1897, upon giving a bond.

An amended sewer map was presented by City Engineer Carrillo. After consideration, the board decided to proceed under the amended map and specifications, and consider changes only when papers for the right-of-way from the Southern Pacific Company are received.

SANTA MONICA BREVITIES. Street Committee, reported that E. L.

SANTA MONICA BREVITIES.

Special services, fine floral decora-ions and unusually large congregations, were the order of the day at the churches yesterday.

The members of the Paradise Club formed a jolly tally-ho party that spent Monday at Rattlesnake Cañon.

The public schools have closed for a markly recently and the closed

week's vacation. Several Santa Monicans will attend he fiesta ball.
A. H. Linton and family, residents A. H. Linton and ramily, residents here for six months, leave on Tuesday for their Minneapolis home.

Registered at the Arcadia: Mr. and Mrs. O. S. A. Sprague, Miss Sprague, Norman Williams, Miss Ethel Warner, and Miss Atward Chicago. W. and Miss Atwood, Chicago;

Auerbach, San Francisco; Joseph May, San Francisco.
F. H. Rindge will leave Tuesday for San Francisco, where he goes to attend the commencement exercises of a manual training school which he established there and maintains at an expense of \$25,000 per year.
The game of baseball at the Southern Pacific Park. Sunday, between the Spaldings of Los Angeles and the Santa Monicans, resulted in a score of 9 to 12 in favor of the latter.
Rev. S. D. Beet left today (Monday) for a week's trip through Southern California.

SAN PEDRO.

Southern Pacific Officials Inspect the SAN PEDRO, April 19.—[Regular Correspondence.] At noon yesterday a special train arrived over the Southern Pacific with General Manager. Kruttschnitt and Superintendent J. A.

Muir. They were taken out to the har-bor site, where they remained for two and a half hours, then a rapid trip was made back to Los Angeles. Ever since Saturday, since the good Ever since Saturday, since the good news was announced that Secretary Alger is about to let the contracts for the breakwater, strangers have been coming in on all trains, and real estate is again brightening up. There is no doubt whatever in the people's mind that the work will go right ahead. The Southern Pacific Company has been quite busy repairing the track that runs out to the bluff opposite the harbor site.

that runs out to the bluff opposite the harbor site.
Elaborate prepartions are being made for the May-day picnio for the benefit of the Los Angeles Newsboys' Home. Special trains will be run.
The little son of Mr. Spates fell and broke his right arm yesterday.
While John Delane was at work in a well last Saturday, a heavy board fell on his head, necessitating several stitches to close the gaping wound.
The U.S.S. monitors Monterey and Monadnock are lying in the outer harbor. They will remain here during the entire week. Their officers and marines will take part in La Flesta de Los Angeles. The vessels will receive visitors all the week.
Barkentine Uncle John arrived from the North with a cargo of lumber to the San Pedro Lumber Company.
The melodrama, "The Deacon," will hold the boards tomorrow evening at Swineford's Hall, and will be followed by a dance.

HER MAJESTY ISSUES PROCLA MATION TO BANISH CARE.

Trappings Coming Ou erywhere-Decorations of Streets and Buildings.

WHERE PROCESSIONS WILL GO.

CITY CROWDED WITH VISITOR FROM THE OUTSIDE.

estivities Begin Tonight with the Grand Masque Ball at Hazard's Pavilion and Indian Dances at the Tribunes.

ROYAL PROCLAMATION.

"To our loyal subjects, greeting:
"Be it known that we, the sovereign lect of La Fiesta de Los Angeles, most earnestly desire that per-nicious care—yea, even the wisdom of sages—be banished utterly from our realm for the space of many days following, and we would have it further known that during our reign, joy, unwisdom and even folly, and the battle of the sweet flowers of our land shall enjoy our august presence and protection.

"FRANCESCA ALEXANDER, "Queen of La Fiesta."
"Dated at Los Angeles this 17th day of April, 1897, and of our reign, the

In obedience to this royal manifesto, sent out to herald the approach of Her Majesty the Queen, her favorite city of Los Angeles is rapidly assuming carni-val attre. The sound of many hammers is abroad in the land, and sober buildings of brick and stone are being hid-den beneath bright draperies and branches of palm. Gay crowds, gath-

maintees of paim. Say crows, gather sered from the length of breadth of Her Majesty's realm to share in the merriment of the carnival, fill the streets and drive the hotel-keepers to the verge of distraction with demands for accommodation. Small boys, with the impish activity of their kind, dart to and fro among the crowds, shrieking the beauties and advantages of their especial brands of fiesta badge and batton. The varieties of these are legion. The satin strip of red, yellow and green is made to bear many and strange devices in the shape of elfin tamales, tiny sliver or gold sombreros, hearts, buttons, bells, miniatures, and all sorts and conditions of carnival trappings. The fiendish squeals of the "devileen" and kindred instruments of torture again rend the air, and all the signs of the times indicate the coming reign of folly and fun.

Chairman Wiggins of the Street Decorating Committee has marshaled all his forces, and is working day and night on the streets and tribunes. Mr. Wiggins is making the most of the small fund placed at his disposal, and has contrived already to produce some remarkably good effects. The materials employed for decorative purposes this year are much better than ever before, and will serve as a beginning for the fine stock of fiesta decorations Mr. Wiggins hopes to put by every year for regular use. The fund of \$1500 did not allow heavy banners and draperies of wood and slik, fringed with gold, such as Mr. Wiggins desires for the carnival decorations of the future, but a great advance has been made. The flaring red, green and yellow cottons of former years have been replaced with wool bunting and fine steens in soft shades that blend well, while giving the same brilliant effect. Everything has been substantially made, and the flags and pennons will be little the worse for several days' exposure to ethe sun and wind.

Main street is being decorated with draperies that form a series of bright arches. giving the effect of a long tunnel of gay color to one looking down the street. It

street to the depots, from First to Fifth streets, inclusive, the decorations are chiefly pennants and fans of bunting, strung on the span wires.

All through the business part of the city a liberal use of palms and evergreens relieves the blaze of color. Street Superintendent Drain has taken charge of this division of the work of decorating, and has a force of thirty-five men employed in trimming all the telephone and trolley poles with fan palms and great branches of evergreen.

At night, the city will be alive with thousands of red, green and yellow incandescent lights, that twinkle like fireflies in the clear air. These colored stars will be thickly strung along the span wires as usual, but an innovation has been made in the form of the high, pointed double arches over the corners of First, Second and Third streets on Spring, and of Third streets on Broadway. The apexes of these double arches are drawn to a sharp point, and supported by guy ropes extended from the tops of the tall buildings on either side. At the foot of the arch, the ropes were fastened to the buildings just above the street awnings, thus raising the whole thing clear of the street traffic. On Main street, high, pointed single arches of incandescent lights are thrown across the street in front of the Van Nuys Hotel, the Crystal Palace, the Buillard Biock and the Baker Block. All these arches are made of lines of incandescent lights, the jets alternating with bright little fiesta pennants that flutter like builterfiles' wings.

Along the principal streets are side decorations of pointed banners, fastened to a double line of wires. These were put up by a local advertising company. Many business houses are elaborately decorated with canoples. Moorish kiosks, domes, arches, stara, fans and banners of fiesta colors. Very few are finished as yet, but this evening will see the whole scheme of decoration almost perfect throughout the city.

the city.

Mr. Wiggins has turned the tribunes into the likeness of a Roman amphitheater. The throne, with its scarlet canopy, brilliant banners and rows of tropical plants up the stair-case, is the crown of the enclosure, but the tribunes are also very picturesque. The facade is covered with white, over-laid with gonfalons of the fiesta colors, and the tribunes are surmounted with many banners and strings of pennants. Here also, as everywhere in the city, girantic national banners spread their splendid folds among the fluttering ephemeral brilliancy all around.

At Hazard's Pavilion a crowd of apft workers, under the able supervision of Mrs. Annie Bancroft, are enased in turning the barn-like place ato a fairy bower for the honor of fer Majesty the Queen. Mrs. Bangoft has another force of workers busy with the court carriages, and still another at hea studio, engaged in the

finer bits of decoration. Everything is buzzing like a hive of bees in these last days of preparation, and the progress made is almost magical.

Among the more prominent street decorations the most unique is to be seen in the windows of Jacoby Bros. One window is filled with a clever representation of the proposed outer and inner harbor at San Pedro, showing cliffs, breakwater, wharf, island, etc., and many ships and fishing boats rocking on the real water. The other window contains a picture of Randsburg mines, machinery, mountains and village of tents, all complete, with Brownie miners working by clockwork with comically energetic jerks.

The whole front of the People's Store is covered by a lacy canopy of green pepper boughs, supported by arches and pillars in the Fiesta colors. Lowman & Co. show a fanciful entrance with pillars and towers battlemented like a fairly castle. The whole corner around the Santa Feoffices is distinguished by rows of pillars and arches in fiesta colors, garnished with palms. The front of the Jonathan club is a blaze of stars, fans and banners, and the City Hall is even more brilliant and striking in its carnival dress. Two striking dependent of the Jonathan club is a blaze of stars, fans and the Los Angeles Furniture Company. The former shows a massive triple canopy of the solid colors, green, yellow and red, draped with the American flag and the tri-color of France. The latter has a handsome Moorish kiosk built out over the sidewalk, the dome of scarlet and gold, with a blare of yellow and pillars of green. Others there are in infinite variety, rapidly approaching completion. When everything is in place the effect will be indescribably brilliant.

At night the city will be a blaze of incandescent ligats. In addition to these, liberal quantities of Greek fire will add to the brilliancy of the inluminated parade. Athletic Park has its full share of decorations, including a throne of its own and innumerable banners. By all appearances, everything will be in proper shape to give Her

she arrives this evening.

WITH THE COMMITTEE.

At the rooms of the Fiesta Committee all is bustle. To the great joy of the managers, the floral parade promises to be finer than ever before. Entries are coming in fast, and many lodges and other organizations will take part. One most attractive feature will be the twenty living bouquets, designed by Count von Schmidt from a suggestion received in a floral fête at Nice. Each bouquet will be fifteen feet cincircumference, and will inclose a well-grown boy. These living bouquets will march in a company and will perform fancy evolutions before the throne. Maj. M. T. Owens, the Grand Marshal, requests all participants in the floral parade to meet at the corner of Twelfth and Main streets at 1 p.m. sharp, when they will be assigned their places in the parade. Count von Schmidt requests that all donations of flowers for the parade be taken to the barn of the Figueroa Hotel, on Sixteenth street. Sweet peas, verbenas and geraniums of all colors are much needed to complete the designs.

Officers and marines of the warships Monterey and Monadnock will take part in the day parade. There dill be nine officers in all and 170 men. Lieut. Fletcher of the Monadnock held a consultation yesterday with the committee concerning this arrangement. In the day parade, also, will appear a troop of sixty boys mounted on Shetland ponies, headed by Miss Anna Kessler on her pretty trick horse. Guests are arriving from all directions. Hundreds are coming from San Francisco and Northern and Central California, and 200 arrived yesterday from Phoenix, Ariz. These visitors were given a reception last night at the Chamber of Commerce, having been brought up from the depot in a special car.

This evening at 8 o'clock the carnival will open with a celebration. At the tribunes the Indians from the Southern California reservations will give their strange and exciting fire dance, where half-naked men rush into the flames and quench the burning flogs with their bare hands and feet Other dances will be g WITH THE COMMITTEE. At the rooms of the Fiesta Commit

REHEARSAL FOR THE BALL. If one may judge by the rehearsal given at Hazard's Pavilion last night the ball tonight will indeed be a magnificent affair and promises to bid de-fiance to the most critical. The cos-tumes worn by the Knights and Ladies will be of Louis XIV and Marie Antoi-nette styles respectively. The minuet which is the chief spectacular affair mette styles respectavely. The lamber which is the chief spectacular affair of the evening, will be especially worthy of attention, and, from an artistic point of view, most beautiful. The sixteen couples who will take part, went through their respective parts with perfect harmony last night, the only defect noticeable being a poor arrangement for the calcium-light effect. This will be remedied today, and a pronounced success is anticipated. The ladles will wear white petiticoats reaching to the ankles, while the large paniers will be of another color, according to the set to which they have been assigned. Each of the four sets which make up the minuet will wear different shades, representative of La

cording to the set to which they have been assigned. Each of the four sets which make up the minuet will wear different shades, representative of La Fiesta. These will be yellow, green, pink and cerise and white, respectively. The hair will be dressed high and powdered, the whole presenting a rare picture.

The concert music from "William Tell" by Rossini, will begin at 8 o'clock, but the grand overture will not be played until 8:15. At 8:30 the Queen, accompanied by her court and retinue, will enter and take her seat on the throne. She will be followed by officers of the guard and pages, carrying the Queen's colors. Mayor Snyder will then make a presentation address, in the course of which the Queen will be presented by him, with the key to the city. This will be followed by a proclamation by the Queen's prime n.'nister, ordering the knights to the throne, where they will be knighted by the Queen. The Queen's proclamation directing the ladies of the court and their escorts to dance the minuet will then be given, and, after saluting her, the couples will descend from the platform singly, proceeding at once to their respective positions on the floor, General dancing will follow the minuet, the dancers unmasking at 11 o'clock. The Catalina Band will discourse the music, and it is confidently expected that the entire ceremonles will pass off without a hitch.

Formation of Divisions and Line of March Announced.

Grand Marshal Madison T. Owens has prepared and issued orders for the day parade for tomorrow (Wednesday) as follows: DAY PARADE.

Maj. Madison T. Owens, grand marshal.
Lieut.-Col. Welch, chief of staff; Maj.

street, right resting on Grand avenue facing west.
Second division will form on Twelfth street, right resting on Hill street facing west, in rear of first division.
Third division will form on Hill street, right resting on Twelfth facing north.
Fourth division will form on Olive street, right resting on Twelfth facing north.
Fifth division will form on Olive street, right resting on Twelfth facing south.
Sixth division will form on Grand.

south.

Sixth division will form on Grand avenue, right resting on Twelfth facing south, and extending north.

Queen's escort will form on Grand avenue, right resting, on Twelfth facing porth.

LINE OF MARCH.

Each division except fire department must be in its place for forming at 1:30 p.m. sharp, and all must be ready to move at 2 p.m. The line of march will be from Tribunes north on Hope to Sixth street; east on sixth to Spring street; north on Spring street to Plaza; counter march thence south on Main street to Firth street, west on Firth street to Broadway, north on Broadway to First. Divisions will move out of column north on Broadway and west on First to Hill before disbanding.

It is earnestly desired that this parade start on time and keep moving.

All persons should be in their seats at the Tribunes by 2 o'clock sharp as the naval battalion will give its physical drill within the enclosure.

MADISON T. OWENS,

Grand Marshal. LINE OF MARCH.

TRIPP'S RECORD.

The Identity of a Wounded Burgla

W. A. Tripp, the man who was shot by George Allen, better known as "Shorty," last night while attempting

to rob the New Santa Rosa, had not re-Tripp was not identified until yesterday, when Detectives Hawley and Au-ble discovered him to be a well-known character. According to them, they ar-

rested him twice, once last year for oplum smoking and once the year be-fore, when he was wanted on a felony charge at Whittier. This latter charge was dismissed. The detectives characterize him as no-account, and say that he has been an associate of the lower class of crim-

an associate of the lower class of criminals for years. He is better known as a "small grafter," and an opium flend. They say he and his companion were watching the New Santa Rosa for three nights, and declare that he and the man who escaped, whose name has not yet been learned, have intended for a week to attempt burglary.

According to the detectives, too, his shooting was rather providential at this time, since La Flesta is here, and they are disposed to look upon Allen as a public benefactor. They say they will do all in their power to set him free, if Tripp dies.

Changes of the Stars. Commencing today, the stars of the policemen will be changed so that the numbers will conform to the length of service of their wearers. The stars of the sergeants were changed yesterday, so that Sergt. Jeffries has No. 1 and McKeag, No. 4. There are but four sergeants.

sergeants.

The stars of the detectives were also changed, Auble, as oldest, getting No.

Officer Romans is the oldest patrolman and gets No. 1 of that order. House Officer Miles Long gets No. 62. This change is simply coincident with a general reorganization now contemplated.

Changes at Whittier.

Appointed.

The County Board of Supervisors met yesterday and transacted the following business:

In the matter of the petition of residents outside of the incorporated part of Lis Angeles Township for the formation of a new township, the new township was formed and established, as petitioned for, to be known as Burnark Township.

bank Township.

The bid of R. W. Pridham for 385 receipt books of 180 pages each, and 6500 extensions according to specifications, for the Tax Colector's office was

receipt books of 180 pages each, and 6500 extensions according to specifications, for the Tax Colector's office was accepted and he was instructed to file a bond of \$250. The books are to be examined by disinterested experts before being accepted by the county. Pridham's bid for the work was \$352.75, Kingsley, Barnes and Neuner's \$374.35; R. Y. McBride's \$410, and Glass & Longs \$425.

In the matter of the vacation of streets, and the restoration to government subdivisions of certain pr.)perty in Chatsworth Park, a hearing was set for May 5, and the matter ordered published. A like disposition was made of the petition in the matter of the vacation of a portion of Garfield avenue. It was voted that the District Attorney be directed to furnish the board with a statement of all changes made by the last legislature in the laws bearing upon road and the general dutes of boards of supervisors. It was also voted that the board visit Saugus April 24, to inspect the complete grading of the San Francisquito Cafion road.

C. G. Kellogg, J. M. Thomas and E. H. Rust were duly appointed a board of horticultural commissioners as provided by an act of the Legislature, to protect the horticultural interests of this State. The sum of \$50 was transferred from the general road fund to the Gallatin road fund, and \$1000 was transferred from the unapportioned money fund to the hospital fund.

The following-named indigents were allowed the respective sums named to apply on transportation: Mrs. Georgie Sage, by railway to San Francisco, \$6.05; Isabel Fardler and Jesus Meramontes, by railway to San Francisco, \$5.06; Isabel Fardler and Jesus Meramontes, by railway to San Francisco, \$5.06; Isabel Fardler and Jesus Meramontes, by railway to San Francisco fraham to Saginaw, Mich., \$23.15.

The following-named indigents were adopted in the matter of issuing school district bonds of La Mirada School District:

"Whereas, the returns from the election held in the district on June 15,

adopted in the matter of issting school district bonds of La Mirada School District:

"Whereas, the returns from the election held in the district on June 15, 1896, to determine whether the district should issue its bonds in the sum of \$2000, contain no statement nor certificate as to the valuation of the taxable property in the district nor as to the present outstanding indebtedness thereof, without which information it is impossible to know whether or not the bonds can legally issue. Therefore, be it

"Resolved, that the Board of Supervisors do hereby refuse to issue the bonds of La Mirada School District."

The board invited Joseph Craig, Harold Allen, H. J. Woollacott, C. J. Fox and others interested to hake a proposal to the county for a modification of the right-of-way of Santa Anita road No. 1, with a view of opening their road into Precipice Cañon.

The claims of George A. McBain for \$6.64, T. J. Matlock for \$29.75, D. C. Norton for \$4, and M. G. Willard for \$22 were disallowed and rejected.

OBSTREPEROUS MINER. Bad Man and a Gun Loose in Rands burg.

B. D. Carle has just returned from Randsburg, and brings with him a tale that savors of the old mining camp of romance. Last week, Al Rice, whom Mr. Carl calls a "bad man," came into Randsburg one night, deter-mined to show his prowess. He commenced in the theater, where he was loudly obstreperous. His "shooting iron" protruded, and his knife glittered in Brete Harte style. Hank, the local constable, attempted to eject him. Rice, it is said, has three "notches" to his credit, and Dan Cain, another constable, went to Hank's assistance. Opinion is unanimous that it was a lively scrap, and that Rice was bearing off the hon-ors when officer Shields of the local po-lice force went to the assistance of the congrebles.

he constables.

During the fracas some of the lights were shot out, chairs were overturned, and sundry brave miners sought the safety of the starlight. Rice had finally placed himself with his back to a post, when Shields went up behind and pinloned him. Then it was all fought over again, which accounts for the cut in Shieds's coat and the sore spot on his ear.

ear.

Rice was finally overpowered and put in Jall.

Mr. Carle says the town of Randsburg is now very quiet, all the miners having gone to the hills, and that there are ten men prospecting now where a little while ago there was one.

ANNUAL CONVENTION OF CALIFOR-NIA BANKERS.

John P. Irish Describes the Currency System as the Result of Haste and Partisan Compromise—Gen. man's Address.

The fifth annual convention of the California Bankers' Association met in the rooms of the Concordia Club, No. 542 South Main street, at 10 o'clock yesterday morning. The association numbers 150 members, fifty of whom registered their attendance. Gen. Charles Forman, president of the Los Angeles Chamber of Commarce, welcomed the delegates in the following address:

"It is with sincere pleasure that I welcome you to our city. That your association has chosen Los Angeles in which to hold its fifth annual conven-The fifth annual convention of the

which to hold its fifth annual convention is a source of much gratification to our citizens, especially as it is held during La Fiesta week, which will enable you without detriment to the business of your meeting to participate in and enjoy our annual carnival, which will demonstrate, we believe, in a very forcible manner the marvelous progress our city and vicinity has made since you honored us by selecting Los Angeles as the birthplace of your organization—March, 1891. which to hold its fifth annual conve arch, 1891. As we realize that our banking insti-

tutions are to so great a degree an in-dex of our business and commercial prosperity, we shall watch with much dex of our business and commercial prosperity, we shall watch with much interest your deliberations, which, we doubt not, will be upon lines promoting the welfare of the whole State, and result in mutual benefit to all concerned; and permit me to express the hope that your association, together with like organisations in other States, may be able to suggest such legislation as will eliminate any weak elements from our financial system, and provide a sound and stable system of currency and banking, to the end that the fear of return to the old issue by State banks or any other form of debased currency may no longer disturb the business of the country.

"While in our city I understand you

tations, not only as a body, but as individuals.

"Again I extend to you a most sincere
and hearty welcome. Gentlemen, our
latch-string is out, and we are glad to
meet and have you with us."

This was responded to by J. A.
Thompson of San Francisco, who said:

"Our arrangements for today contemplated the presence of Mr. Phelan,
who is not only Mayor of San Francisco, but, more to our purpose, is
president of the Mutual Savings Bank.
He would have responded in fitting
terms to the cordial address just made.
In his absence it is my duty to thank
our good friends of Los Angeles for
their welcome, and to assure them of
our appreciation for their cordiality."

The president then read a short address, in which he dwelt on the advisability of bankers taking more prominent part in legislation. He congratulated the association on the result of
their efforts exercised during the last
Presidential election, and drew their attention to the high taxation, State,
county and municipal, which discourages the investment of capital in California.

Treasurer G. W. Kline of the Crocker-

ance of \$243.56 in the treasury. The secretary, R. M. Welsh, reported that out of the 280 banks and recognized banking firms in California, 24 national banks, 85 State commercial banks, 7 private and 31 savings banks are now members of the association.

N. J. Hawkins of Hollester, J. K. Mott of San Francisco and H. J. Fleischman of this city were appointed an auditing committee. The new Committee on Resolutions was named in the persons of J. A. Thompson and J. Steinhart of San Francisco, H. H. Hewlett of Stockton and Alex Goldstein of Freeno. E. B. Pond of San Francisco, William Beckman of Sactamento and J. E. Baker of Alexander were named as the Committee on Nominations.

The happer which commanded the most protound statention was read during the afternoon by John P. Irish, who, though not a member of the association, had been invited to address the delegates. He said, in part:

"The banking and currency legislation of this country since 182, is the result of emergencies, met by hasty action. These emergencies have been of various kinds. Some of them arose in the war, and the readjustments which followed. The most serious errors, however, have their radix in emergencies purely partisan. Of these the compromises of the several refunding acts are examples.

"The net result of haste and compromise is a system of fictional legislation unbecoming a modern commercial nation. Our national banking system has been outgrown as a means of distributing the surplus capital of the country with fair equality, and is by law compelled to be an instrumentality for contracting the currency at the very time when it should be expanded. The vices of the system has when have had Wisdom dictates that we discard the vices of the system when ke fail, and the record of liquidations shows a less percentage of loss to creditors than under any other system when ke fail, and the record of liquidations shows a less percentage of loss to creditors than under any other system when the was ignorant and a demagozue was evident when he proposed t

our ranchers in the West, by compulsion make wasteful and inconvenient use of their credit. They are carried by the country storekeeper, whose experience warns him to indemnify himself by an average advance of 25 percent. in prices, and interest on the running account. This leads finally to an accumulated credit that must be disposed of by a mortgage, which represents 25 per cent. more than value received, and bears from twice to four times the interest that should be paid upon a business accommodation. Under improved distribution that large class of business men who are neither merchants nor professional men, would have access to the use of their credit upon equally favorable terms. They would be trained in more exact business methods; would be less often misled into speculation, and, above all, would feel themselves part of the great business community, and equal citizens of the commonwealth.

"But these are not the only sufferers

Inaye access to the use of their credit upon equally favorable terms. They would be trained in more exact business methods; would be less often misled into speculation, and, above all, would feel themselves part of the great business community, and equal citizens of the commonwealth.

"But these are not the only sufferers from the torments of our inadequate currency and banking systems. We have the second largest foreign trade in the world, and carry it under conditions of peculiar difficulty. If an American merchant buy a cargo in Yokohama, Hongkong, Singapore, Calcutta, or the Ionian Isles, he settles for it in London, and its value is expressed in English money. That is to say, that the inexorable law of trade selects for the clearing-house of the world's commerce the nation that has the most scientific and stable system of currency and banking. Our merchant in effect deposits the price of his cargo in London to the credit of the seller. In its final analysis commerce in the exchange of products—money is the medium of exchange. For every cargo that leaves a country finally a cargo comes back in exchange. The nature of trade is that the involce and bill of exchange as country finally a cargo comes back in exchange for head of exchange for the complementary cargo which completes the exchange of commodities, These conditions germinated in England, when Fatterson founded the Bank of England, and Locke and Newton, as a royal commission, smote a mixed-and confused currency and brought out of chaos order and system, and stability the most admirable.

"I am sure it is a worthy and patriotic ambition that this republic shall achieve equally, by striving to attain

confused currency and brought out of chaos order and system, and stability the most admirable.

"I am sure it is a worthy and patriotic ambition that this republic shall achieve equally, by striving to attain a currency and system in which may be safely expressed the value of every article of commerce, wherever produced. We have by far the greatest sea coast and navigable river mileage of any country on the planet. The seas are our highway and avery busy city that sits on every east and shore is our commercial field. When our currency and banking are revised and reformed and foreign invoices follow bills of exchange, to New York and not London, we will no longer lose one-half our commercial force in making a vacuum in trade for another to fill."

Ben C. Wright read a paper on "The Currency of the Future," in which he advocated the withdrawal of the silver dollar from use. "The present sliver dollar from use. "The saddum of exchange than two half-dollars, though its buillion value is greater. It is too clumsy to be popular, as well as too weighty, and for all practical purposes might as well be converted into half-dollars and the seignorage resulting from the change turned into the sliver profit fund."

Other papers were read by E. B. Pond of the San Francisco Savings Union, Charles Altschul of the London, Paris and American Bank, limited; Frank A. Glbson of the First National of this city, H. W. Magee, Bank

Commissioner, and J. E. Baker of the Bank of Alameda.

A resolution was passed, referring to the National Banking Association of New York, the desirability of banks creating a new system whereby they might retain original checks, or vouchers, giving the customer a receipt showing the payee and amount of the check when balancing at the end of the month. This, they claim, will obviate to a great extent the frequent charge by dishonest customers, made after the voucher has been returned and destroyed, that the check was a forgery, thus compelling the bank to sustain a loss for the amount. Another sesion will be held this morning, when some interesting papers are anticipated. The list of delegates present yesterday is as follows:

OFFICE OF THE TIMES, Los Angeles, April 19, 1897.
MINING INVESTMENTS. A good
many capitalists are restrained from investing in mining enterprises because they entertain the idea that the expenses of mining still bear about as large a proportion toward the income as they did a quarter of a century ago. How erroneous this supposition is may be seen from the following in-teresting list of compared mining ex-penses in the State of Colorado, pub-lished by the Rocky Mountain News:

lished by the Rocky Mou	Trestin	740 111
'Article-	1870.	1897
Glant powder, per pound	\$ 1.00	\$ .12
Steel, per pound	.40	.08
Rope, per pound	.60	.15
Iron, per pound	.25	.03
Giant caps, per 100	3.00	. 55
Fuse, per 100 feet,	3.00	.55
Lumber, per 1000 feet	60.00	14.00
Candles, per box	20.00	4.00
Trails, per keg	20.00	3.00
Coal oil, per gallon	3.00	20
Wood, per cord	8.00	3.00
Picks, each	3.75	1.00
Shovels, each	2.75	1.00
Miners, per day	4.00	3.00
Teaming, per day	12.00	4.00
Stamp-mill charges, per ton	5.00	2.00
Smelting charges, per ton	60.00	7.00

Stamp-mill charges, per ton... 60.00 7.00

These changes in the cost of materials used in the mining business are not only remarkable, but in many cases astonishing. Commenting upon this subject, a Denver correspondent of the United States Investor says:
"During all these years gold, the product, remained the same, \$20.67 per ounce. During the same period the science of gold mining and ore treatment in Colorado has seen wonderful discoveries, inventions and progress. The geological and mineral formations of the various mining districts, as opened up by workings, have been carefully studied by experienced careful and reputable mining engineers.

as opened up by workings, have been carefully studied by experienced careful and reputable mining engineers.

"The hand drill has largely given way to drills operated by compressed air. The primitive and expensive method of transporting supplies to the mine and ore from the mine, along steep mountain trails, on pack animals, usually donkeys, has been supplanted in many cases by aerial wire tramways, or, by tunnels, utilizing natural gravity and obviating expensive pumping. The mountain streams have been harnessed by means of water wheels and electrical appliances to furnish motive power for mines and mills at a great reduction of expense.

"Every year has seen the continued successful evolution of ore treatment processes — smelting, amalgamation, concentration, 'chlorination, cyanide. etc., all getting nearer to the ideal maximum of gold being extracted at the minimum of cost. At the same time, the skill of the miner, the mechanic, the stamp-mill men, the concentrating mill man, the smelter man and the men operating other, ore treatment processes, has constantly increased. All of the above tend to the more economical production of gold, and to reduce the business of mining to a mathematical business proposition, which means the safer investment of money."

### COMMERCIAL.

AFRICAN FRUIT IN LONDON.
Both South Africa and New Zealand
have been encouraged by the result of
shipments of fresh fruit to the London
market, and it is said will increase such shipments of fresh full to the London market, and it is said will increase such shipments from now on. An exchange notes that the third consignment of South African fruit to London arrived at its destination in generally good condition, and was rapidly disposed of. There were in all 900 boxes of fruit, 230 of which consisted of grapes and 191 boxes of pears the rest being peaches and nectarines. The grapes brought from \$3.36 to \$3.75 per box of about thirty pounds. Nectarines brought from \$2.40 to \$4 a box, containing from twenty-four to forty-eight nectarines. Peaches sold from \$2.88 to \$3.36 per box of twenty-five. The greater quantity of years was sold at \$2.16 per box of from sixteen to twenty each. The grapes were of the black Hermitage variety; they were small, but in generally good condition. The pears were of the William variety, and are described in a London trade paper as being of delicbous flavor, and being ripe and juicy.

PLENTY OF WATER. It is stated that during the past year water enough to irrigate a thousand acres enough to irrigate a thousand acres has been developed from sinking wells between San Dimas and San Bernardino, a section of the country which only a short time ago was known as "the forty-mile desert." There is no doubt that we have scarcely begun to realize the possibilities in the line of water development which are open to us in Southern California. The prospecting for oil in the neighborhood of Los Angeles has opened the eyes of many people to the fact that there is an people to the fact that there is an abundance of underground water in places where it was never supposed to

LOCATING PETROLEUM LANDS. A petroleum law of much importance to Southern California has gone into effect. Its passage was brought about by a ruling of the Commissioner of the General Land Office last year, that petroleum lands could not be legally taken up under the mineral laws of the Inited States, though recollected. taken up under the mineral laws of the United States, though people had been taking them up for twenty-five years. This ruling was a blunder, and there was then no way left for men to take up petroleum lands. For this reason the oil men had the new law considered and passed.

PEANUTS. The peanut is coming into greater prominence every year, as a factor in the world's supply of things needful, and there is hardly any limit to the predictions of the uses to which it may be put. At the same time, the territory in which it may be grown is rapidly extending, and it is not too much to hope that it soon may become a really important crop in this country. Peanut oil is now highly valued in Europe, and peanut flour, said to be extremely nutritious, is used extensively in Europe, especially in hospitals. The Farm News announces that an oil factory, with a capacity sufficient to use five tons of peanuts daily has been established at Norfolk, Va. In a prospectus issued by the company, it is calculated that the receipts from five tons of peanuts will amount to 235 gallons of refined oil, at \$1 per gallon; 125 gallons of crude oil, at \$2 cents and 3300 pounds of stock feed at \$60 cents per 100 pounds, making the total gross receipts \$415.90 per day, which, it is estimated, would give a yearly profit on a five-ton factory of \$18,728.

CHERRY STEMS. Cherry stems, that

CHERRY STEMS. Cherry stems, that CHERRY STEMS. Cherry stems, that part connecting the fruit itself and the branch upon which it grows, are an article of commerce. They are purchased in San Francisco chiefly by French bakerles, where they are used to convey to confections the cherry flavor. The chemical property that does this is hydrocyanic acid. The stems sell at retail at 5 cents an ounce, or 75 cents a pound.

## LOCAL PRODUCE MARKETS.

The opening of flesta week finds business very brisk in the wholesale district, in atriking contrast with the dull trade of the latter part of last week. The anticipated influx of flousands of visitors to the flesta has naturally estimulated the local demand for provisions, and produce desiers have about all the orders they can fill. Not in many days have commission men been so busy.

Butter is especially influenced by the expectation of the service of

traordinary demand, which, coupled with a let-up in the supply and the organized effort of the local dairymen, has resulted in a stiffening of prices. Dairymen up the Ceast are packing most of their product, and supplies by steamer have fallen off accordingly. A raise of about 2½c a roll all around has gone into effect and the market is kept almost bare even at top prices.

Eggs are firm at a range of 10@12c. Poultry remains dull at bedrock quotations.

Flour is firmer, owing to the boom in wheat for export caused by the European war news, but quotations remain unchanged.

New hay is coming in and the result is a drop of about 1.00 per ton all around.

Potatoes and onions remain in good demand at last week's quotations, which are about as high as they will get before the new crops come in. New potatoes are as yet small and scarce.

Strawberries are becoming plentiful and

arce.
Strawberries are becoming plentiful and
twe dropped to 9@11c per box.
Tomatoes are scarce and go as high as 2.00
or box.

## NEW YORK MARKETS.

Stocks and Bonds.

[BY ASSOCIATED PRESS WIRE.]

NEW YORK, April 19.—Nothing outside the news of the war between Turkey and Greece had much interest in Wall street today. Traders in stocks are accustomed to look with reticence to the course on the foreign exchanges to guide them in their dealings in properties likely to be affected by European affairs. The abence of this index today, on account of closing of the exchanges in London and Paris over the Easter holidays, left the minds of traders in some confusion, and, as a result, the movement of prices was at times very erratic, without any corresponding change in the tenor of news to justify it. It was evident at the opening, however, that this market was bearing the brunt of whatever selling was a result of the war, not only by local holders, but by those in London and Paris and in Boston, where the exchange also was closed. The scene at the opening was an exciting one, and there was heavy pressure to sell throughout the whole day. There had been many stop-orders placed before the opening in anticipation of a slump, and these were speedily uncovered, running sales of from 1800 to 4000 shares, being made at the opening in many stocks. The international slocks, of course, were most affected and declined the most, Louisville and Nashville being the most conspicuous example, with a fall of 3%. Other international shares lost over a benefit of the course of the TBY ASSOCIATED PRESS WIRE.1

Visible Supply.

NEW YORK, April 19.—The statement of the visible supply of grain in store and affoat on Saturday, April 17, as compiled by the New York Produce Exchange is as follows: Wheat, 36.979,000 bushels; decrease 86,-000; oats, 13.657,000 bushels, decrease 370,000; parley, 3.630,000 bushels; decrease, 12.000; barley, 3.293,000 bushels; increase 588,000.

Particleum.

NEW YORK, April 19.—Petroleum was

## GENERAL EASTERN MARKETS.

Grain and Produce.

[BY ASSOCIATED PRESS WIRE.]

CHICAGO. April 18.—As was expected wheat was wild and excited at the opening, the news that war has actually begun producing consternation among the shoats and the utter disregard or actually begun producing consternation among the shoats and the utter disregard or actually begun producing consternation among the shoats and the utter disregard or actually begun producing consternation among the shoats and the prices they paid at their first on-rush. May wheat when Saturday closed at 73%, are should be Grain and Produce.
[BY ASSOCIATED PRESS WIRE.] heavily. Before the price settled down in the manner indicated it had touched 74% on its downward course and reacted to around 75 cents. It rose again to 76% once more, got down to 75, and closed at that. Chicago received six carloads of wheat and 83,000 hushels were taken out of store. Minneapolis and Duluth receipts were 580 carloads, against 477 the corresponding day of the year before, and 682 cars a week ago. Clearances since Saturday from the four principal Atlantic ports were equal in wheat and flour together to 285,000 bushels. Corn was influenced chiefly by the excited feeling in wheat, and much resembled that market in the wide range of prices. Oats opened firm on account of the war scare, and sympathy with wheat and corn, and for a time exhibited considerable strength, with free covering by shorts. Provisions were excited for a few minutes at the start by the war talk. The leading futures closed as follows: Wheat, No. 2— Closing.

PASADENA.

FIRST DRILL OF THE AMERICUS CLUB IN FULL UNIFORM.

The City Trustees Take a Holiday The Street-railway Situation, Deport of the Public Schools for the Past Month-Visitors at Wilson's Penk.

PASADENA, April 19.—[Regular Correspondence.] The Americus Club presented a brilliant appearance at its drill this atterngon. The men turned out in full uniform, and won much admiration as they marched through the streets with fluttering pennons. Many were unable to attend, as the drill was held during business hours, but over higher and men turned. drill was held during business hours, but over hirety officers and men turned out. Maj. Bangham was in command of the battalion, supported by his staff. Ca. A was commanded by Capt. James H. Cambell, Co. B by Lieut. C. W. Bell. and Co. C by Capt. F. J. Coleman, At the conclusion of the drill, Maj. Bangham addressed the men briefly, relative to the final arrangements for Friday's parade. He requested every member of the battalion to provide bunches of marguerites. which are to be worn with a shoulder which are to be worn with a shoulde sash of smilax. The men will meet at noon on Friday and will go in to Los Angeles by the Terminal.

Another and final drill will be held

Wednesday evening.

NO COUNCIL MEETING. No meeting of the City Council was held today. Trustee Reynolds was the only member who put in an appearance at the hour of meeting. Several papers have been filed with the City Clerk, and will probably come up for consideration at next Monday's session Among them is W. W. Polk's report upon the accounts of the city officials. He finds the books correct except for

two or three trifling errors.

Street Superintendent Buchanan has filed a report upon the proposition to use the waste water from the Villa-street reservoir for flushing the sev-ers on the east side. He estimates the cost of a seven-inch steel pipe from the reservoir to the Marengo-avenue sever at \$397.

STREET RAILWAY MATTERS.

STREET RAILWAY MATTERS.

A committee of the bondholders of the electric road was held today. On Wednesday a meeting will be held of sill the signers of the communication presented to the Council at its meeting last week. Though the purchase of the stock of the Electric Light and Power. Company. has not yet been made, there is little room for doubt that a substantial understanding has been reached between the intending purchasers, and the present owners of atthe stock.

The following statement from E. C. Webster was today filed with the City. Clerk to be presented to the Council: The good not be say that a satisfactory understanding has been reached in case it should be desired to enter into the proposition of lighting your city, which we will be prepared to offer next Monday. The offer is still spes for the purchase of the control of the stock, or the whole, and the money is still on deposit in the First National Bank, and the same offer holds good until one week from today, when the whole matter will be determined.

ART UNION EXHIBIT. ART UNION EXHIBIT.

ART UNION EXHIBIT.

The final exhibit for the season of the Pasadena Art Union has been in progress this afternoon and evening at the Board of Trade rooms. The exhibit attracted a considerable number of visitors, but deserved more general appreciation than it received.

Many of the sketches displayed were of more than usual merit. Miss Marie Johnson's richly-colored interiors were especially pleasing and her flower pieces were much admired. A number of sketches and paintings of still life in oils were exhibited by Mrs. Ellen B. Farr, whose work is well known to Pasadena people. Some dainty sketches by Miss Edith White and by Miss Anna L. Meeker are worthy of especial mention.

I. Lodovici's drawings in black and white show clever work and attracted much attention.

W. L. Judson exhibited some excel-

L. Judson exhibited some excel-Southern California landscapes.

lent Southern California landscapes.

His work shows careful study and a keen appreciation of the rich and varied coloring peculiar to this region.

The evening exhibit was much matred by the poor light, which seriously interferred with the enjoyment of the pictures.

PUBLIC SCHOOLS. The report of Prof. James D. Graham, supervising principal of the public schools of Pasadena, presents the fol-lowing statistics for the month ending

lowing statistics for the month ending April 16:

Number of days taught, 20; whole number of days attendance, 35,346.5; number of days absences, 1739; whole number of tardinesses, 334, of which 259 were excused; total enrollment, 1959, of which 963 were boys and 996 were girls; average number belonging, 1854, with an average daily attendance of 1767 or 95.3 per cent.

The total number of pupils carried over from the previous month was 1878, 41 old pupils reëntered during the month, 18 were received by transfer and 22 new pupils were admitted.

The trustees made 4 visits during the month, the superintendent 41, patrons 168, teachers 78, others 152, a total of 496.

This week the schools are closed for the regular spring vacation. They will reopen next Monday.

THE SHAKESPEARE CLUB.

At the meeting of the Shakespeare Club last Saturday, Mrs. Frank Parker and Mrs. F. Wallace were appointed a committee to cooperate with the committees appointed by the Twilight Club and the Board of Trade, to promote the establishment in Pasadens of a coffege for women. An interesting paper was head by Dr. Rachel Reid upon the subject, "What Has the W.C.T.U. Done for Women?"

'Arrangements were completed for the annual banquet, to be held at Hotel Green on April 27, in conjunction with the Twilight Club.

WILSON'S PEAK ARRIVALS.
Recent visitors at Wilson's Peak include: Walter Engle, Miss Mabel Adams, Mr. and Mrs. C. H. Hanchett, Mrs. Sever, Mr. and Mrs. H. D. Newcomb, Chicago; E. I. Taylor, Buffalo; Mrs. Wanahe, Frank Wanahe, Archie Wanahe, Rev. N. T. Edwards, Los Angeles; Mrs. H. C. Crilly, I. Leonard, Charles Livermore, John L. Crilly, Charles D. Manning, Miss Lizzie Craig, Mrs. F. Craig, Mrs. Westernoon, Charles Livermore, John L. Crilly, Miss Gertie Craig, Mrs. F. Craig, Mrs. Westernoon, Mr WILSON'S PEAK ARRIVALS.

### SAN DIEGO COUNTY.

ONS OF THE AMERICAN REVOLU-TION CELEBRATE.

snakes for La Flests-Rancher Hubbert's Eye Shot Out-Easter

SAN DIEGO, April 19.—[Regular Correspondence,] Members of the Society of Sons of the American Revolution meet here tonight to celebrate the one hundred and twenty-second anniver-sary of the battle of Lexington, and also the anniversary of the final disbanding of the Continental Army in 1783. Of-ficial action is expected toward the rec-ognition by the society of the presence in the city of Mrs. Lovey, the widow of one of the soldiers of the Continental Army. This woman is in the possession of her faculties and enjoys life as thor-oughly as a woman a generation behind her in years. Mrs. Lovey draws a penner in years. Mrs. Lovey draws a pen-sion from the national government. A toole for discussion will be the courtesy of H.M.S. Comus in firing a salute in this harbor February 22, in honor of the anniversary of George Washington's birth. This patriotic society is in a very flourishing condition here, and has among its members the foremost men of this city.

SNAKES FOR LA FIESTA.

Three hundred pounds of live rattlesnakes have been consigned to Los Anseles from Escondido for exhibition
purposes. There are 104 snakes in the
consignment. The reptiles were capturned during the past month by boys
in the Escondido Valley, who received
at for each snake. The captures were
made by slipping a strong noose attached to a string over the heads of the
rattlers. In this way they are easily
caught and safely handled.

ONLY AN EYE LOST. SNAKES FOR LA FIESTA.

ONLY AN EYE LOST. It now appears that P. Hubbert, the It now appears that P. Hubbert, the San Luis Rey rancher accidentally shot by his daughter on Saturday, will not lose his life, but only his eye. The girl, while attempting to remove the cap from the nipple of a muzzle-loading shotgun, allowed the hammer to slip from her finger, causing the discharge of the gun. The heavy charge went through a partition, entering the left shoulder and neck of the girl's father, and so injuring his left eye that he will lose it.

EASTER DECORATIONS. The most elaborately-decorated church in this city yesterday was the First Presbyterian. Enthusiastic women First Presbyterian. Enthusiastic women decorators worked all Saturday night and until 9 a.m. Sunday to complete the giant arches over the pulpit, which contained 4000 callas and other flowers. The Methodist Church was well decorated. The Rev. L. M. Hartley had 100 Knights Templars to listen to his morning sermon. St. Joseph's Catholic Church was exquisitely adorned with flowers, and the music attracted crowds, Miss Elise Arden, Mr. Mannix and Mrs. Arden rendered conspicuous service in presenting an exceptionally interesting musical programme.

Antonio Sepulveda, companion of José Morales, the murderer, is re-ported to have been seen on the Mexi-can line last Saturday. The former is wanted in Riverside for horse-stealing wanted in Riverside for norse-stealing and the latter for murdering Deputy Sheriff Wilson, near Monrovia, Los Angeles county. Morales is also wanted in Mexico for crimes committed in Lower California.

The revenus cutter Corwin is ordered to sail for Sitka, April 21. Capt. Her-ring will take command at San Fran-cisco, succeeding Lieut. Reed, who will become the executive officer of the

A Moosa rancher set out seventy-five lemon trees two years ago. They have not been irrigated, but thrive and bear fruit as well as do irrigated trees, according to the report of the rancher. The young son of Ed Eppley of De Luz, while leading a horse, wound the rope about his second finger. The horse, gave the rope a jerk severing the finger at the first joint.

A barking dog directed attention to

A barking dog directed attention to a large rattlesnake colled on the thresh-

head off with a shotgun.

The Tia Juana Fruit Company, a stock company of locomotive engineers, with a capital stock of \$60,000, is about planting sixty acres to lemons and grape fruit.

REGULAR MEETING OF THE BOARD

andalism in the West End of Sants Over a New Street Railway.

SANTA ANA, April 19.—[Regular Correspondence.] At the meeting of the Board of Supervisors today (Monday) County School Superintendent Gree-

Board of Supervisors today (Monday)
County School Superintendent Greeley requested permission of the board
to print a supplement to the school
manual. Granted.

Hearing on the petition of R. E.
Larter and others, asking the board to
change the location of a portion of the
Anaheim Landing county road was set
for Monday, July 6.

The petition of A. J. Chaffee and
others for forming a protection district along the Santa Ana River south
and west from the Olive bridge, was
laid over for consideration, May 4.

The petition of George W. Ford et
al., asking that a horticultural commission for the county, as provided in
the statutes of 187, be appointed, was
considered. Definite action upon it was
deferred until May 4.

The petition of the Birby Land Company for a public highway in the Buena
Park and Westminster road districts,
hertofore referred to a committee, was
reported upon favorably, and the
prayer of the petitioners was granted.
The application of Felipe Zarate for
a saloon license was granted.
Supervisor Hawkins, upon request,
was granted a sixty days' leave of abseñce.

The District Attorney was instructed.

The District Attorney was instructed to appear for and in behalf of the county in the suit of the Hall Safe and Lock Company vs. Orange county. The board adjourned to Tuesday, May 4.

MORE VANDALISM. For some time residents of the West End have been greatly bothered by acts of rowdyism that have presumably of rowdyism that have presumably been committed by boys in the neightorhood. The Marshal has been requested to arrest the offenders. This seems to have been taken by the "smart" young men as an insult. A few nights ago they made bold to commit other and more serious depredations. The West End Schoolhouse was visited and a shot was fired through the building by a Winchester rifle or a large pistol, the ball going through the wall of the building, tearing off plastering and paper, and burying itself in the wall on the opposite side of the room. The members of the School Board are desirous of making an example of the offenders, and they will do it if they can be apprehended.

AN INFANT'S SUNDAY BATH.

AN INFANT'S SUNDAY BATH. While William Sackman of this city was driving in the vicinity of Villa Park, Sunday, he arrived at a canal crossing just as a small child tumbled headlong into the water from the bank. the child was carried rapidly away with the current. Mr. Sackman jumped into the water and rescued the little one. Only a few weeks ago a fatal accident happened above Orange from a simila

## TO THE CALIFORNIA POPPY.

Whence thy color's silken glory,
Flower the foothills love to frame?
Color shames the ruddlest orange,
Duils the leaping, quivering flame!

Proud thou standest, like a princess Well I know thy secret hidden

Years agone there fell upon thee Drop of blood from far, fair Spain. Now there thrills throughout thy being All the fire played in her glance. Open to me now, forever,
Thou'rt a page from old romance.
J. W. COOK.

The reproduction on a large scale of the all but extinct American bison or buffalo of the plains has been decided upon by Henri Menier, the millionaire chocolate manufacaturer of Paris, and now proprietor of the island of Anticosti. He has purchased a young buffalo cow. which was for some time kept in captivity by a Quebec dealer in furs, and his agents are now in correspondence with the proprietors of the few remaining private herds of this noble animal, with a view to the purchase of as many as possible of them for breeding purposes.

NEW CITY FATHERS INSTALLED IN OFFICE.

Flaw in the Bond of the New City Treasurer-Southern Pacific Company to Forfeit a Heavy Bond. Many Would-be Saloon-keepers.

POMONA, April 19.—[Regular Correspondence.] The City Trustees met this (Monday) morning to canvass the returns from the election and found the results as already announced. There vere 1168 votes cast.

were 1168 votes cast.

E. H. Hutchinson, president of the board, and E. A. Hibbard retired as City Trustees, making way for C. P. Patterson and Elliott Hinman, the newly-elected Trustees. The latter are license men. The retiring men were elected by the anti-saloon party. Messrs. Raynes and Landon declined

Messrs. Raynes and Landon declined nomination for the presidency of the board, and Trustee Patterson was chosen for that honor.

Judge Gallup, on behalf of the high-license party, then presented to President Patterson an orange-wood gavel.

The bond of F. J. Fleming as City Attorney was presented, bearing the names of Peter Fleming and E. A. Hubbard as bondsmen, in the sum of 11000. After the acceptance of the bond Mr. Fleming was installed in office.

The bond of A. B. Caldwell as Marshal was presented, with Peter Fleming, James Fryer, A.—T. Currier and H. P. Wilkinson as sureties, in the sum of \$2000. Upon taking the oath of office President Patterson, on behalf of friends, presented him with a badge of office.

office.

J. A. Gallup presented his bond, in
the sum of \$1000, with O. M. Gallup
and L. H. Gallup as sureties, and was
sworn in as Recorder.

Joseph Mullen gave as sureties in the
sum of \$1000, George and Andrew Osgoodby, and was sworn into the office
of Assassar.

sum of \$1000, George and Andrew Osgoodby, and was sworn into the office of Assessor.

A motion was passed expressing appreciation of the services rendered by Mr. Garthside during a long series of years as clerk. Another motion expressed appreciation of the impartial services of Mr. Hutchinson as president of the board.

The bond of C. H. Lee as Clerk, in the sum of \$1000, with C. B. Messenger and J. E. McComas as sureties, was approved.

The bond of F. H. Thatcher as Treasurer, in the sum of \$40,000, contained a flaw which led to its being laid over until Tuesday of next week. One of the signers of the bond had qualified in the sum of \$10,000, but it seemed evident that the signer had not that amount of real estate, though a wealthy man. On that account the bond was rejected.

Applications for positions were received as follows: For Superintendent of Streets, H. C. Clair, T. J. Einbeck, J. J. Henry and W. T. Martin; for driver of garbage wagon, H. M. Reld, J. H. Pettus; for janitor, G. S. A. Maynard; for positionant, J. C. Barnes, John Deck, L. E. Patterson and J. W. Pettus.

It was ordered that the attorney pre-

It was ordered that the attorney pre pare an ordinance changing the time of regular meetings to 2 p.m. on the first Tuesday of each month.

It was ordered that an advertisement be published calling for bids for street sprinkling.

A FORFEITED BOND. A petition was received from the Southern Pacific Railroad Company A petition was received from the Southern Pacific Railroad Company asking the city to extend the time eighteen months for the completion of the railroad from Pomona to Riverside. The petition gave the very surprising information that the company had been prevented by injunctions from proceeding with the construction of the road. To casual observers it had appeared that the company had simply procrastinated, and had shown no disposition to keep its agreement with the city. It would appear, however, that the city is in a way to hold the company responsible for its failure to keep its pledge, and from what can be learned, it seems that the Trustees are disposed to do so.

On November 11, 1895, the Southern Pacific Railroad was granted a franchise through the city for the branchise through the city from Pomona to Riverside, the company agreeing that the road should be completed and in operation within eighteen months. To guarantee to the city that the company would keep its pledge, it issued a bond in the sum of \$10,000, with John D. Bicknell and William Banning as sureties.

From the day of the signing of the hond till a month ago the road has

From the day of the signing of the bond till a month ago the road has never given any indication of its intenthe only evidence that it is giving any thought to the matter is the fact that get a right-of-way through a piece of land between Pomona and Chino, and the petition presented today.

As the time allowed for the building

As the time allowed for the building of the road under the agreement and the bond will expire May 11, it is very evident that the contract cannot be fulfilled. When the matter was brought before the Trustees, they expressed themselves very forcibly about the attitude of the company in the past in ignoring its pledge, and later, when interviewed, the Trustees gave out the impression that they would hold the company to the letter of the agreement, and proceed to collect the bond when forfeited.

MANY LICENSES WANTED.

MANY LICENSES WANTED. It is understood that there are about a dozen men in town working to secure saloon licenses, and that there is a prospect that the new Trustees will be prospect that the new Trustees will be overwhelmed with applications. It is understood that but two licenses will be issued, and if these are put up at auction, as has been suggested, it is not improbable that the treasury will be well filled.

The Times will be sent postpaid, for one week, including the special La Flesta Number, to any address in America for 20 cents.

## ESCONDIDO.

Visit of Santa Fe Officials-A New

ESCONDIDO, April 19.-[Special Correspondence.] General Manager Nevin, General Freight Agent Chambers and Chief Engineer Perris of the Southern California Railroad have been here in vestigating a proposition relative to the removal of the company's depot to more convenient grounds. The busi-

more convenient grounds. The business men of the town are taking a lively interest in the matter, and the citizens generally hope to see it accomplished.

The Bueno Ranch Company has been organized with a capital stock of \$150,000. The stockholders- are Patterson 50,000. The stockholders- are Patterson 51,000. The stockholders- are Patterson 52,000. The stockholders- are Patterson 52,000. The stockholders- are Patterson 53,000. The ranch consists of 600 acres of 20,000. The ranch consists of 6

Several Escondido citizens will visit Los Angeles this week to see the wonders of La Fiesta.

The farmers have commenced to make hay, of which there promises to be a heavy yield.

It is now threatening rain. Should it come, much good and some damage would be done. The grain crop needs the rain; the hay does not.

Easter was a glad day for the churches. Flowers and song, with general good cheer among the children prevailed in all the sanctuaries.

The Odd Fellows are to have a celebration on the 26th inst. in commemoration of the seventy-eighth anniversary of the order in the United States.

Preparations are already under way for the exercises on Memorial day. Escondido makes more of that day than any other, and well she does, for many are the veterans here.

The Times will be sent postpaid, for

any other, and well she does, for many are the veterans here.

> N. J., a fine specimen of an otter some thirty-six inches long, which was captured in a trap at Indian Mills.
>
> Bath, England, now boasts of three canary birds hatched out of one egg.
>
> The little fellows were roout the size of bumble bees, but are alive and growing.

The frog barometer, used in Germany and Switzerland, consists of a glass of water, a frog and a little wooden step-ladder. If the frog comes out and sits on the steps rain is expected. An attempt to acclimatize ostriches

in south Russia has proved successful. The ostriches born in Russia are much less sensible to cold than the imported ones, and their plumes are equally

good.

One of an order of rat traps which a Christian county, Ky., farmer ordered from a neighboring city, reached him with half a dozen rats in it, which it was supposed to have been caught at some station.

some station.

The bee as a pet is proving useful in eastern parlors. He perfumes the air with a debelous incense. But when a visitor accidentally sits down on the pet, the incensed nature of his remarks leaves a sulphurous smell that is stronger than perfume.

Bees must always be bariered, to sell them is considered most unlucky. A bushel of corn or a small pix is held to be a fair equivalent for a swarm. Bertered bees are happy, but to be "guilty of selling them is a grievous omen, indeed, than which nothing can be more dreadful."

than a teaspoonful of honey in an entire season. So say the best authorities on bees and bee keeping.

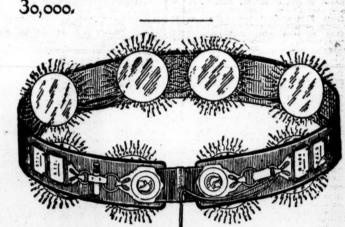

The instinct of brutes and insects can be the effect of nothing else than the wisdom and skill of a powerful, ever-living agent.—Newton.

There is on exhibition in Mt. Holly,

Nature is true to herself

# Victory is Won

Dr. Sanden's Electric Belt has won the favor of people who are tired of drugging. It is used in every town and hamlet in the country, and its cures number over

Don't make an apothecary shop of your poor stomach, especially if you want to live long. Drugs give no nermanent relief, and their presence in your system is injurious.

Nature is true to herself and supplies us with the means of regaining health that has been wasted. Elec-tricity comes from nature, and its cure is natural and and its cure is natural and permanent. DR. SANDEN'S ELECTRIC BELT is an appliance that gives sparks of life into your nerves. Sparks that you feel. Its power is felt upon the surface of the body n one moment. It permeates every vital function of your body. Every lecturer on the public platform, every physician of note, every scientific work that you read tells you that "Electricity is Life." Every element of your being gives demonstra-tions of the truth of this ssertion. It is a fact. No one doubts t. With your vital nerves and blood charged with this electric force there is no chance for disease, no

place for weakness. It is the fundamental principle of vigorous manhood and womanhood. Where it is, disease cannot be.

Dr. Sanden's Electric Belt infuses a continuous flow of electricity into the body for hours at a time. Every moment that the Belt is on the body its sparkling, vitalizing powers are felt penetrating the nerve tissues, filling them with new life, new healthy vigor and charging the blood with the vital force which nature in childhood bestowed upon the body. Thousands of grateful patients testify to the curative powers of Dr. Sanden's Electric Belt. None are too well to be aided by this wonderful appliance, as it brings the human body as near the goal of perfection in vital force as it ever can get. None are too low to be aided by it, as it can take as a foundation the smallest spark of vitality and build upon it the fullest perfection of vigorous manhood. If you are weak, sick or crippled, see this Belt at once, and a test of its power and a look at the volume afer volume of proof of its cures will convert you to the altar of Nature's truths, and health will be yours from this wouderful ap-

It is now about six weeks since I began wearing your No. 5 Belt, and I thought I would report to you the progress so far attained. I can say that I have been benefited very much by your treatment, particularly my stomach and back. I have had no constipation nor looseness of the bowels since I began wearing your Belt; my back is much better and I am improving more and more as the weeks pass by much better and I am improving more and more as the weeks pass by CHAS. C. MOERS. Flagstaff, Aris.

"I am a carpenter, and for many years worked very hard, which debilitated my system. I purchased your Belt, and I wish to thank you for the good it has done. My stomach was in such had shape that I could not digest my food, but I am now pleased to say that your Belt has cured me, and I can now enjoy my food. My back is much stronger, and I will at any time be pleased to verify my statement.

C. U. COOKE.

"217 N. Hancock St., Los Angeles, Cai."

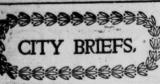

One of the reasons for the great success of Dr. Snden's Electric Belt is the personal attention which Dr. Sanden gives to his patients. Before applying the Belt every patient is given a thorough examination, free of charge, to determine the nature of the complaint, and during the treatment Dr. Sanden spares no pains to cause a quick Sanden has always dealt with his patients on the principle that one cure is the means of selling twenty more Belts, and he prefers not to sell a Belt rather

there is help for you in his Electric Belt. Consultation and examination free. If you cannot call, send for his late illustrated book, "Three Classes of Men," sent, sealed, by mail free.

LEAVE THE SHIP.

Wrecked Yaquina.

Wrecked Yaquina.

The captain and crew of the steamer Yaquina, wrecked a week ago on the beach at Hueneme, have gone back to San Francisco. After a week spent in rescuing as much of the cargo as could be reached, Capt. C. E. Hinkle and his men left Hueneme Sunday morning on men left Hueneme Sunday morning on the steamer Coos Bay, abandoning the Yaquina as a total wreck. Off Santa Monica the men were transferred to the Monica the men were transferred to the Santa Rosa in order that they might reach San Francisco the sooner.

Capt. Hinkle has been exonerated by the steamship company from all blame, as the wreck was due to a shifting bar, which broke the vessel's rudder while she was still a hundred feet beyond the end of the wharf, and rendered her totally unmanageable.

It was the first trip Capt. Hinkle had ever made as skipper, and on the third day out from port. It is said that he is to be put in command of another freight boat at once. The crew of the Yaquina were very hospitably received at Hueneme.

High School Flesta Tally-ho. The question of a tally-ho in the fiesta floral parade is causing much trouble in the ranks of the High School trouble in the ranks of the High School students. Friday afternoon, without previous notice, the High School students were called upon to choose one representative from each room to ride in a taily-ho full of young girls which should represent the school in the floral parade. The choice was made, and after the students had dispersed for the vacation it was found that the mothers of some of the girls would not permit them to go, and that a number of the others had determined to resign from the unwelcome honor. Now the question is to find enough willing ones to fill the tally-ho.

More Ordinance Violations. The cfty ordinance making it a misdemeanor to take sand from the banks of the Los Angeles River within the city limits is regularly being violated by contractors and their employes. Yesterday four arrests were made for violation of this munipical law. The men taken into custody were: S. C. Smith, N. B. English, F. Frazier, Daniel Mowrey and J. F. Burk. They were allowed to go on their own recognizance. leanor to take sand from the banks
